주: 실업률은 계절조정 기준(연간 제외)이며 국고채 수익률 · 종합주가지수 · 원/달러 환율은 기말 기준, 유가(두바이)는 기간평균 기준, 주택가격은 전년대비 증가율 기준임.

요약 및 평가※

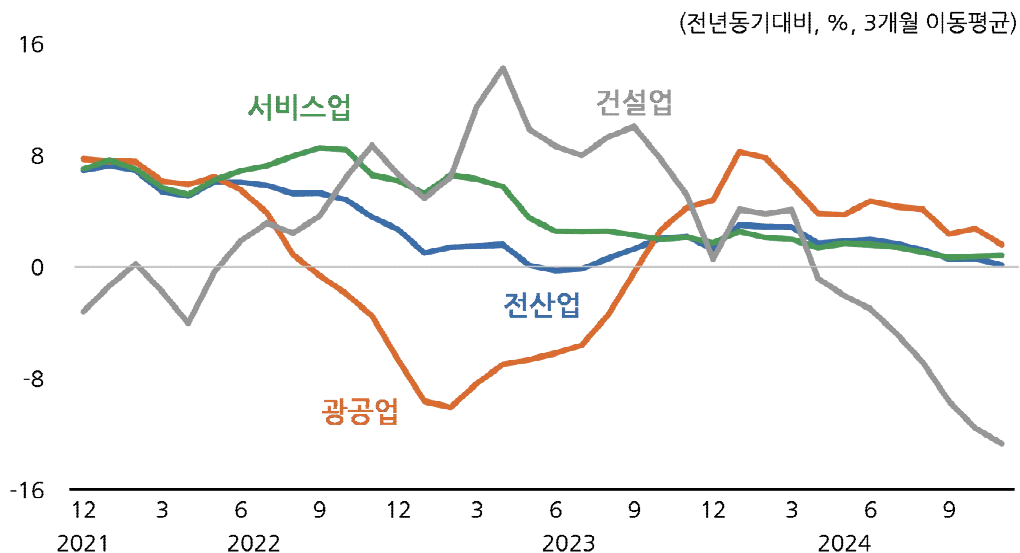

- **최근 우리 경제는 생산 증가세가 둔화되면서 경기 개선이 지연되는 가운데, 불확실성 확대에 따른 경제심리 위축으로 경기 하방 위험이 증대되는 모습**
 - 반도체생산이 높은 증가세를 이어갔으며, 관련 설비투자와 수출도 양호한 흐름을 유지
 - 그러나 반도체를 제외한 생산과 수출은 증가세가 둔화되고 있으며, 건설업을 중심으로 내수 경기도 미약한 흐름을 보임.
 - 건설업생산이 큰 폭의 감소세를 지속하고 있으며, 서비스업과 반도체를 제외한 제조업의 생산도 둔화되는 모습
 - 상품소비와 건설투자의 부진이 장기화되며 경기 개선을 제약
 - 대외 불확실성이 확대되는 가운데, 국내 정치 상황으로 경제심리도 악화
 - 최근 정국 불안에도 환율 및 주가 등 금융시장 지표의 동요는 제한적인 수준에 머물렀으나, 가계와 기업의 심리지수는 큰 폭으로 하락(Box 참조)

※ 별도의 언급이 없을 경우 모든 증가율은 전년동월대비 기준임.

■ 건설업을 중심으로 생산 증가세가 둔화되는 등 경기 개선이 지연되는 가운데, 대내외 불확실성이 확대되며 경제심리가 위축

- 11월 전산업생산(2.4% → -0.3%)은 산업 전반에서 증가세가 둔화되며 감소
 - 계절조정 전월대비로도 9월(-0.4%)과 10월(-0.2%)에 이어 0.4% 감소
 - 건설업생산(-10.8% → -12.9%)은 큰 폭의 감소세를 보이며 부진이 지속
 - 광공업생산(6.3% → 0.1%)은 반도체(11.1%)의 높은 증가세에도 불구하고, 자동차(-6.7%), 전자부품(-10.2%) 등이 감소하면서 증가폭이 축소
 - 서비스업생산(2.1% → 1.0%)도 도소매업(1.0% → -3.2%), 전문·과학·기술서비스업(2.4% → -1.8%) 등이 감소하며 둔화 흐름을 이어감.
- 재고율(112.3% → 111.8%)이 전월에 이어 높은 수준을 기록한 가운데, 평균가동률(72.3% → 71.8%)은 하락하는 등 제조업생산의 둔화를 시사하는 지표가 점증
 - 계절조정 전월대비 기준으로 출하가 내수출하(-4.1%)를 중심으로 0.4% 감소

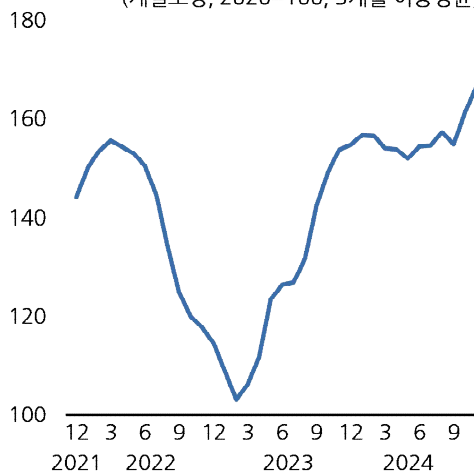

산업별 생산지수

- 반도체부문의 양호한 흐름은 유지되고 있으나, 상품소비와 건설투자의 부진이 지속되며 내수 경기는 미약한 수준에 그침.
 - 반도체 생산과 수출이 높은 증가세를 지속하며 경기 하방 압력을 완화
 - 그러나 반도체를 제외한 부문의 생산과 수출은 점차 둔화되고 있으며, 상품소비와 건설투자의 부진이 장기화되며 내수 회복이 지연되는 모습
- 최근 국내 정국 불안이 금융시스템의 불안으로 이어지지 않는 모습이나, 경제심리 위축으로 경기 하방 위험은 증대
 - 2016~17년 정국 불안 시기와 비교해 보면 금융지표의 동요는 제한적인 모습이나, 가계와 기업의 심리지표는 더 큰 폭으로 악화(Box 참조)

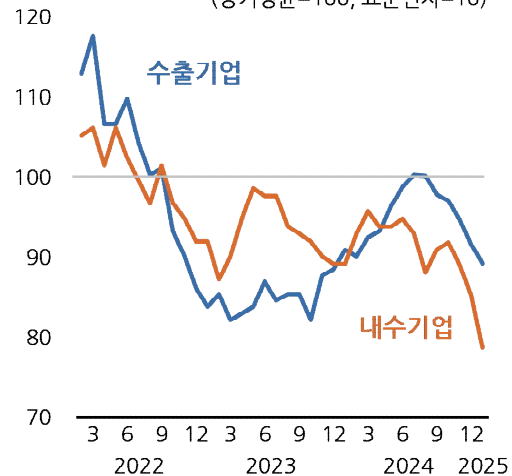

반도체 계절조정 생산지수

(계절조정, 2020=100, 3개월 이동평균)

제조업 업황전망 BSI

(장기평균=100, 표준편차=10)

Box. 과거와 최근 정국 불안 시기에서의 금융시장 및 심리 지표

■ 금번 정국 불안 시기(2024년 12월 3일 이후)에 금융시장이 다소 불안정하였으나, 과거 정국 불안 시기(2016년 10월 24일 이후)에 비해서는 안정된 모습을 유지

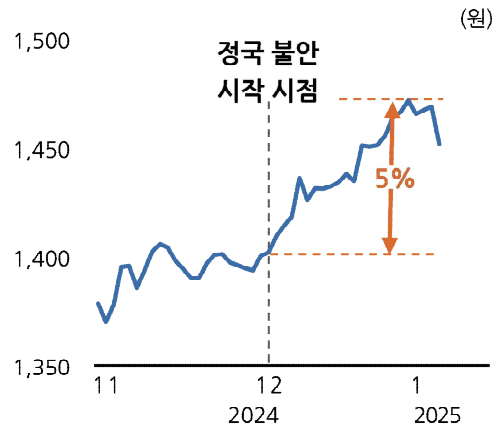

● 과거에 비해 원/달러 환율 상승폭이 제한적인 가운데, 국가부도 위험을 반영하는 CDS프리미엄도 낮은 수준에서 소폭 상승하는 데 그침.

원/달러 환율

2016~17년 정국 불안기

2024~25년 정국 불안기

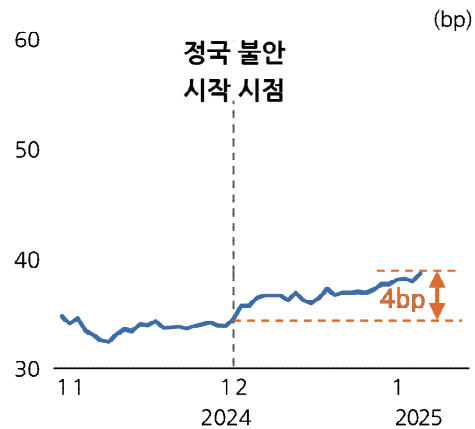

CDS프리미엄

2016~17년 정국 불안기

2024~25년 정국 불안기

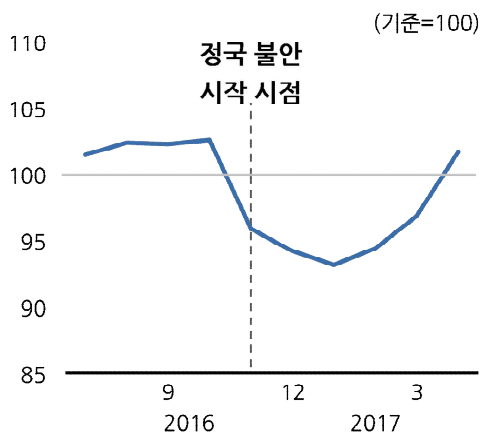

■ 반면, 가계와 기업의 심리는 과거에 비해 더 큰 폭으로 위축

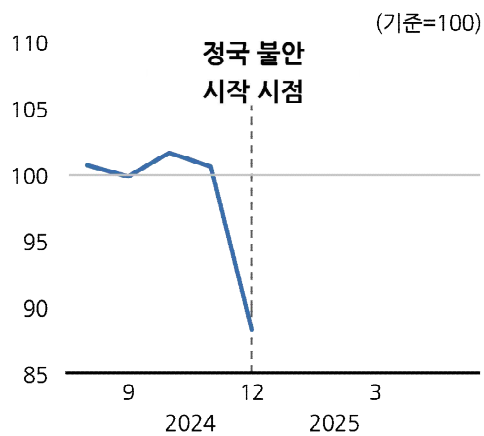

- 소비자심리지수가 과거에는 3개월에 걸쳐 9.4p 하락한 반면, 최근에는 1개월 만에 12.3p 하락하였으며, 기업심리지수도 과거와 달리 비교적 큰 폭으로 하락

소비자심리지수

2016~17년 정국 불안기

제조업 및 비제조업 업황전망 BSI

2016~17년 정국 불안기

2024~25년 정국 불안기

■ **상품소비를 중심으로 소비 부진이 지속되는 가운데, 소비자심리가 위축되면서 하방 위험이 확대되는 모습**

● 상품소비는 대부분의 품목에서 부진한 모습

- 11월 소매판매(-0.9% → -1.9%)는 승용차(-7.9%), 가전제품(-4.5%), 통신기기 및 컴퓨터(-6.2%), 화장품(-9.8%) 등 주요 품목에서 부진함에 따라 감소폭이 확대

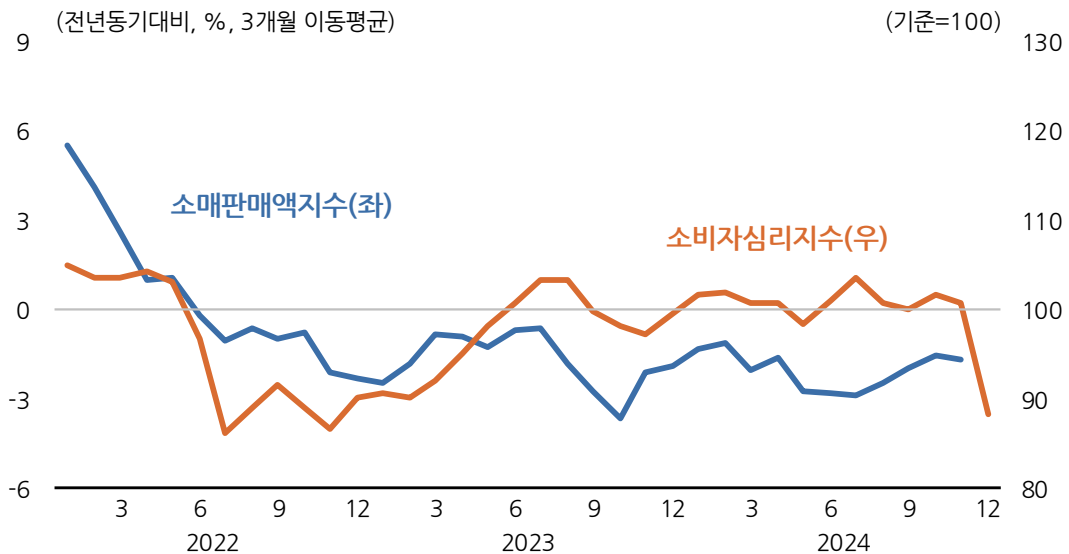

● 서비스소비도 주요 업종을 중심으로 미약한 증가세를 나타냄.

- 숙박·음식점업(0.1%), 예술·스포츠·여가관련서비스업(0.3%), 교육서비스업(-0.5%) 등 소비와 밀접한 서비스업에서 낮은 생산증가세가 지속

● 이와 함께 정국 불안의 영향으로 12월 소비자심리지수는 전월(100.7)에 비해 대폭 하락한 88.4를 기록

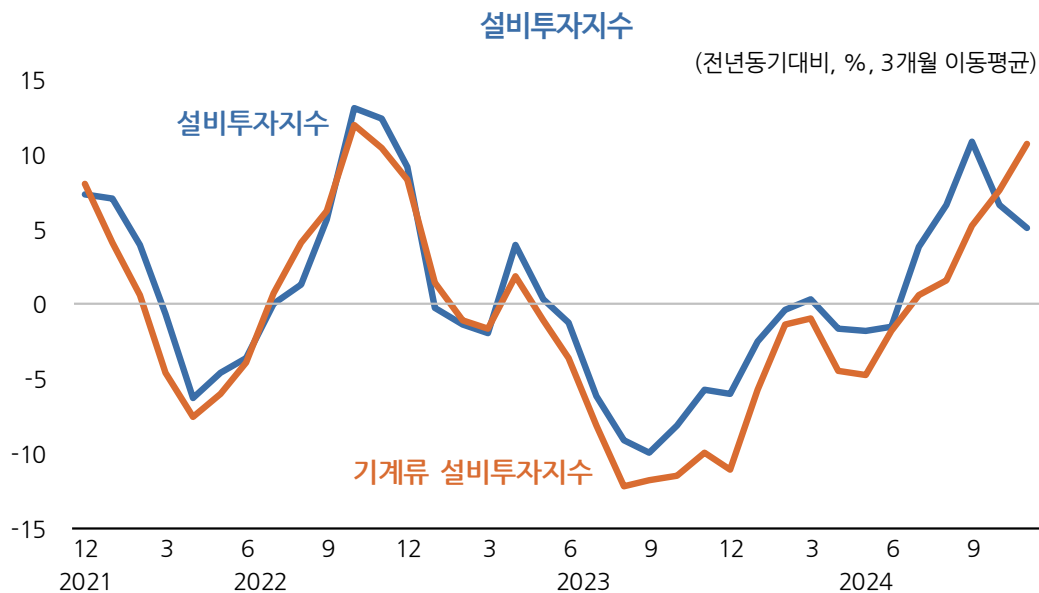

- 특히 현재경기판단(70 → 52)과 향후경기전망(74 → 56)이 급락

소매판매액지수 및 소비자심리지수

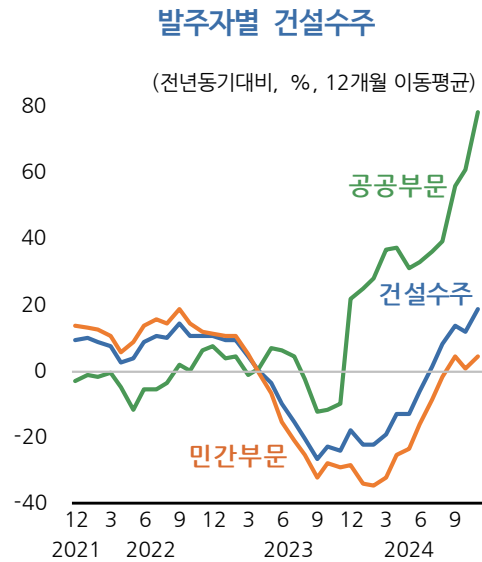

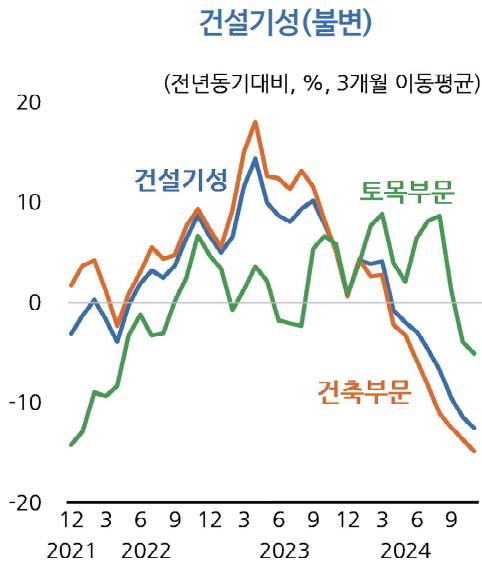

■ 설비투자는 반도체 관련 투자가 개선되면서 완만한 회복세를 지속

- 11월 설비투자(5.5% → 2.6%)는 변동성이 높은 운송장비의 감소에도 불구하고 기계류가 반도체를 중심으로 양호한 흐름을 이어가면서 완만한 증가세를 유지
 - 기계류(12.2% → 9.7%)는 반도체제조용장비(58.7% → 63.3%)를 중심으로 높은 증가세를 유지
 - 다만, 일반산업용기계(-3.9% → -9.2%), 전기 및 전자기기(-5.6% → -6.8%), 기타기기(-4.8% → -9.7%) 등 반도체를 제외한 기계류의 감소폭은 확대되었으며, 운송장비(-14.6%)도 기타운송장비(-16.4%)와 자동차(-13.5%)가 큰 폭으로 감소하며 부진한 모습
- 선행지표도 반도체 관련 투자의 호조세는 이어지겠으나, 여타 산업에서의 설비투자 여건은 개선되지 못하고 있음을 시사
 - 12월 기계류 수입액(7.8% → 27.1%)은 반도체제조용장비(77.4% → 42.6%)를 중심으로 높은 증가세를 지속
 - 반면, 국내기계수주 증가율(-5.9% → -15.3%)과 제조업 평균가동률(72.3% → 71.8%)은 전월에 비해 하락하며 반도체를 제외한 산업의 설비투자는 부진이 지속될 가능성을 시사

■ 건설투자는 건설기성의 감소폭이 확대되면서 부진한 흐름을 지속

- 11월 건설기성(-10.8% → -12.9%)은 건축부문을 중심으로 큰 폭의 감소세를 지속
 - 계절조정 전월대비로도 7개월 연속 감소하면서 건설기성의 부진이 심화
 - * 건설기성(계절조정 전월대비, %): (9월) -2.0 → (10월) -4.1 → (11월) -0.2
 - 건축부문(-11.8% → -16.5%)은 주거용과 비주거용 모두 대폭 감소하였으며, 토목부문(-7.7% → -0.5%)도 여전히 부진한 모습
- 반면, 선행지표인 건설수주는 공공부문을 중심으로 개선세를 지속
 - 건설수주(경상, 62.9%)는 기저효과와 공공부문의 주택공급 확대에 주로 기인하여 큰 폭으로 증가
 - 다만, 건설수주의 개선은 상당한 시차를 두고 건설투자에 반영될 것으로 판단됨.

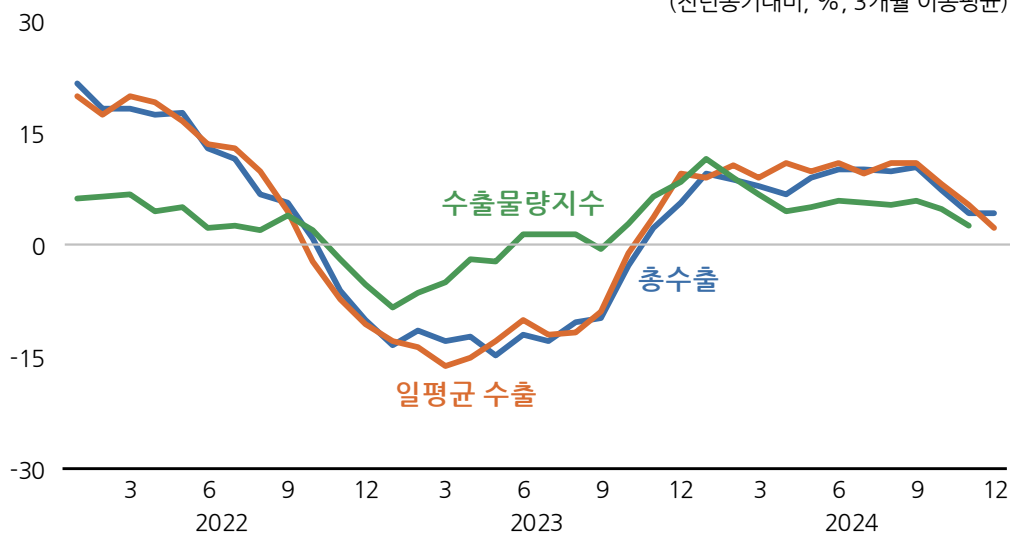

■ 수출은 ICT 품목의 호조세는 유지되고 있으나, 여타 품목을 중심으로 그동안 높았던 증가세가 조정되는 모습

- 12월 수출은 전월(1.4%)보다 높은 6.6%의 증가율을 기록하였으나, 일평균 기준으로는 전월(3.5%)과 유사한 4.3%의 증가율을 기록
 - 품목별로는 일평균 기준으로 ICT 품목(25.8% → 27.9%)의 높은 증가세가 이어졌으나, 이를 제외한 품목(-3.6%)은 글로벌 수요 부진으로 감소
 - * 다만, ICT를 제외한 품목의 감소는 전년동월(11.5%)의 높았던 증가율에 따른 기저효과에도 일부 기인한 것으로 이들 품목의 둔화 흐름은 완만한 것으로 판단됨.
 - 국가별로는 일평균 기준으로 對미국 수출(-3.1% → 3.2%)이 자동차, 일반기계의 감소에도 불구하고 반도체의 호조에 따라 증가로 전환되었으며, 對중국 수출(1.4% → 6.2%)도 반도체를 중심으로 완만한 증가세를 지속
- 수입(-2.4% → 3.3%)은 국제유가 하락에 기인하여 주요 에너지자원(-12.2% → -18.1%)이 감소하였으나, 이를 제외한 품목(1.3% → 12.2%)을 중심으로 소폭 증가
 - 특히 ICT 품목 수출과 밀접한 반도체(25.4% → 30.9%)의 수입 증가세가 지속
- 이에 따라 무역수지(55.9억달러 → 64.9억달러)는 흑자 기조를 이어감.
- 미국 통상정책 불확실성이 높은 수준을 지속하면서 수출 여건은 다소 악화되는 모습

총수출, 일평균 수출 및 수출물량지수

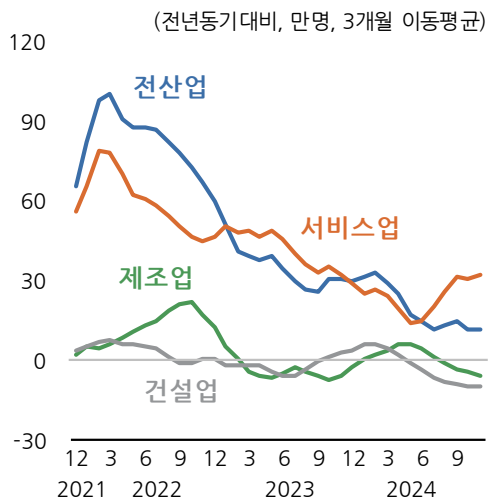

(전년동기대비, %, 3개월 이동평균)

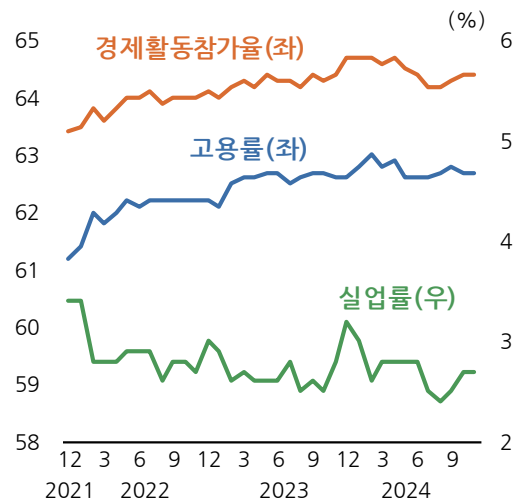

■ 노동시장은 건설업과 제조업을 중심으로 고용 여건의 완만한 둔화 흐름이 지속

- 11월 취업자 수는 전월(8.3만명)에 이어 12.3만명의 낮은 증가폭을 기록
 - 건설업(-9.3만명 → -9.6만명)이 큰 폭의 감소세를 지속한 가운데, 제조업(-3.3만명 → -9.5만명)도 감소폭이 크게 확대
 - 반면, 서비스업(27.5만명 → 35.7만명)은 보건·사회복지(9.7만명 → 11.3만명), 교육(8.3만명 → 10.6만명)을 중심으로 증가폭이 확대
- 다만, 계절조정 고용률(62.7%)이 전월 수준을 유지한 가운데, 실업률(2.7%)도 낮은 수준에 머무르는 등 고용 여건은 비교적 완만한 속도로 둔화되는 모습
 - 청년층(15~29세) 및 50대의 고용률이 하락세를 지속한 반면, 30~40대 고용률은 상승세를 유지하며 15세 이상 계절조정 고용률은 매우 완만한 속도로 하락하는 흐름을 보임.

주요 산업별 취업자 수 증감

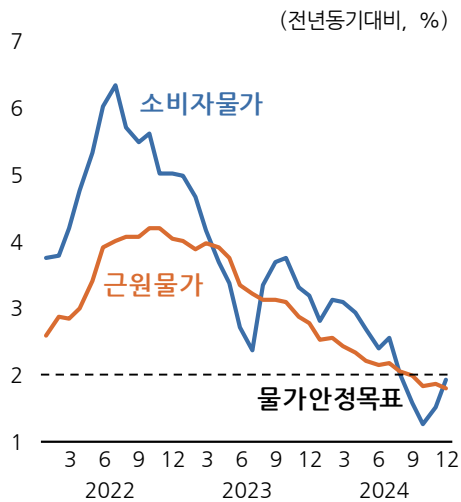

주요 고용지표(계절조정)

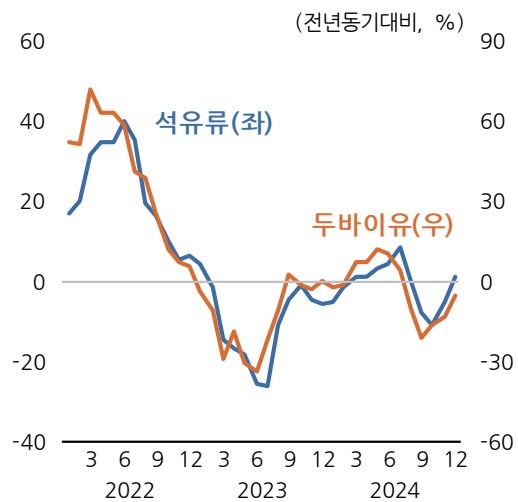

■ 변동성이 높은 석유류를 중심으로 소비자물가 상승폭이 확대되었으나, 물가상승세의
기조적인 둔화 흐름은 지속

- 소비자물가(1.5% → 1.9%)는 상품물가를 중심으로 상승폭이 확대
 - 국제유가 하락폭이 기저효과에 주로 기인하여 축소됨에 따라 석유류(-5.3% → 1.0%)가 상승으로 전환되면서 상품물가(0.9% → 1.8%)의 상승폭이 확대
 - * 두바이유(전년동월대비, %): (10월) -16.5 → (11월) -13.1 → (12월) -5.3
 - 반면, 서비스물가는 전월과 동일한 2.1%의 상승률을 기록
- 그러나 내수 부진으로 기조적 물가상승세의 둔화 흐름은 지속되었으며, 최근 소비심리가 위축되며 향후 추가적인 하방 압력으로 작용할 가능성
 - 기조적 물가상승세를 반영하는 근원물가는 전월(1.9%)보다 소폭 낮은 1.8% 상승
 - 상품소비를 중심으로 소비 부진이 지속되는 가운데 소비자심리지수(100.7 → 88.4)도 급락

소비자물가 및 근원물가

석유류가격 및 국제유가

■ **금융시장은 국내 정치 불확실성 확대 등으로 다소 불안정한 모습을 보였으나, 금융 전반의 시스템 리스크로 이어지지는 않은 것으로 평가**

● 국내 정치 불안으로 12월 원/달러 환율이 전월 말 대비 5.6% 상승하고, 종합주가지수가 2.3% 하락한 가운데 변동성도 확대

- CP스프레드(38bp → 59bp)와 신용스프레드(59bp → 69bp)도 일부 확대되며 금융시장의 불안을 반영

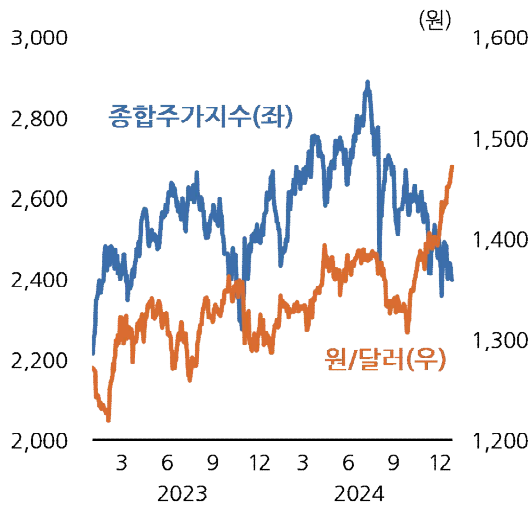

- 다만, 원/달러 환율 상승은 미국 금리 인하 지연 가능성에 따른 달러화 강세(2.6%)에도 일부 기인

● 그러나 시장 안정화 조치 등에 따라 국고채금리(3년물, 2.61% → 2.60%)와 CDS프리미엄(34.0bp → 37.8bp)은 비교적 안정된 모습을 유지

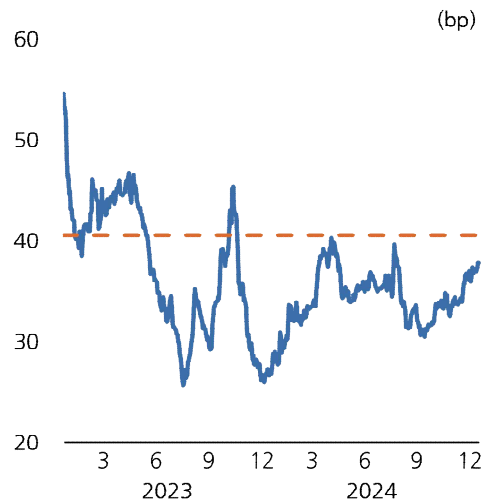

● 한편, 가계대출은 은행권을 중심으로 증가세 둔화 흐름을 지속

- 전 금융권 가계대출 증가액(조원): (8월) 9.7 → (9월) 5.3 → (10월) 6.5 → (11월) 5.1

주가 및 환율

CDS프리미엄

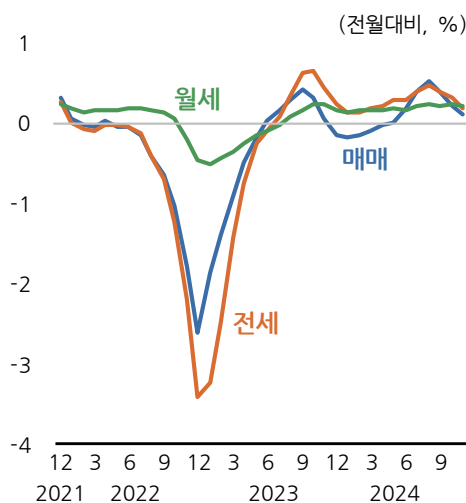

주: 점선은 2015년 이후 평균.

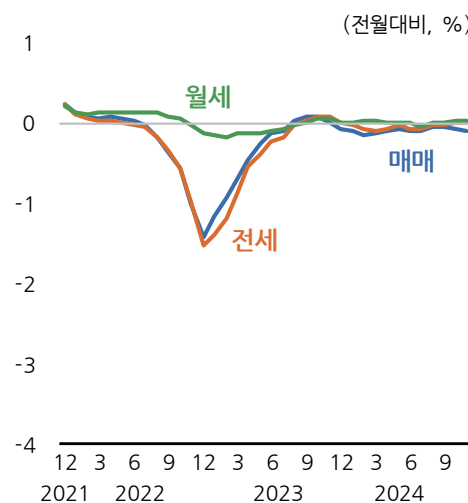

■ 주택시장은 가계대출 규제에 따른 수요 둔화로 매매가격 상승폭이 축소

- 11월 주택매매시장은 대출 규제 강화가 이어지면서 매매가격 상승폭이 축소되고 거래량 감소세가 지속
 - 상대적으로 강한 규제가 적용된 은행권(기간 중 증감액, 3.6조원 → 1.5조원)을 중심으로 주택담보대출(5.5조원 → 4.1조원) 증가폭이 축소
 - 이에 따라 주택매매가격은 수도권(전월대비, 0.22% → 0.11%)에서 상승폭이 축소되었고 비수도권(-0.06% → -0.09%)에서는 하락세가 지속
 - 이와 함께 매매거래는 수도권(2.2만호)과 비수도권(2.7만호) 모두 전월(수도권: 2.5만호, 비수도권: 3.2만호)보다 감소
- 주택임대시장에서도 전세가격(전월대비, 0.16% → 0.09%)과 월세가격(0.13% → 0.12%) 모두 낮은 상승세를 지속
- 주택공급 선행지표인 주택착공과 주택인허가는 수도권을 중심으로 향후 주택공급 부족 가능성을 시사
 - 주택착공(2.2만호)은 전년동월(3.5만호)보다 감소하였고, 11월 누계(1~11월) 기준 수도권 주택착공(13.5만호)도 최근 3년(2021~23년) 누계 평균(17.5만호) 대비 낮은 수준을 기록
 - 이와 함께 11월 누계 기준 수도권 주택인허가(11.6만호)도 최근 3년 누계 평균(17.9만호)을 크게 하회하면서 향후 수도권 주택공급 부족 가능성을 시사

수도권의 주택 매매, 전세 및 월세 가격

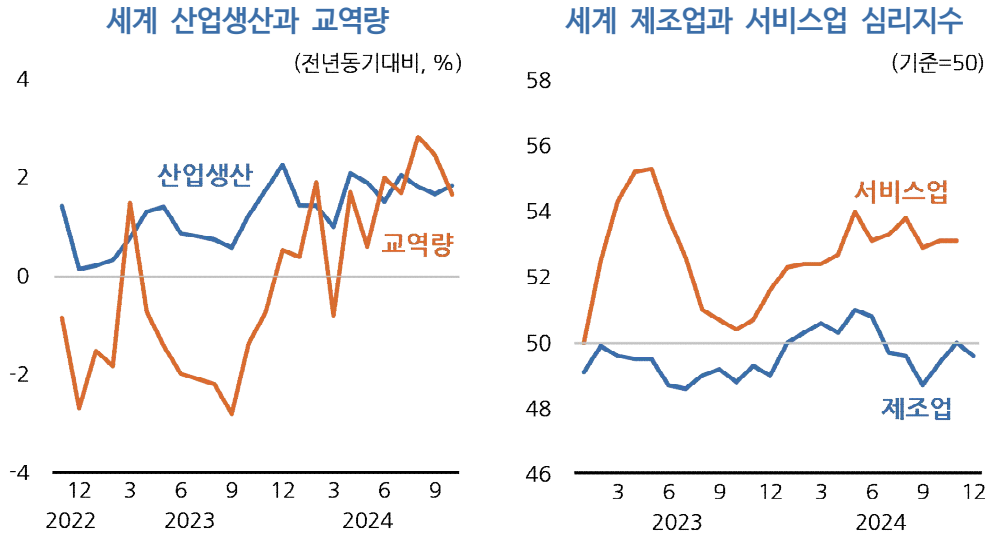

비수도권의 주택 매매, 전세 및 월세 가격

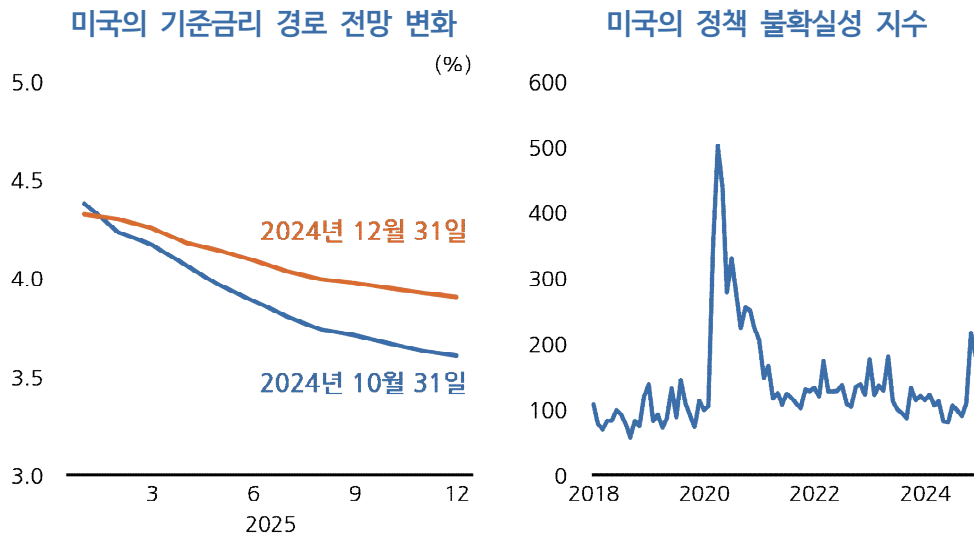

■ 세계경제는 완만한 성장세를 지속할 것으로 전망되고 있으나, 미국의 정책 불확실성, 지정학적 위험 등이 제약요인으로 작용할 가능성

- 상품교역 증가세 둔화와 제조업 업황 부진에도 불구하고, 선진국의 소비 회복과 서비스업 경기 개선으로 글로벌 경기침체의 위험은 제한적인 상황

- 다만, 미국의 고금리 장기화 전망과 보호무역주의 우려가 확대되고 지정학적 긴장도 지속되는 등 경기 하방 위험은 높은 것으로 판단됨.

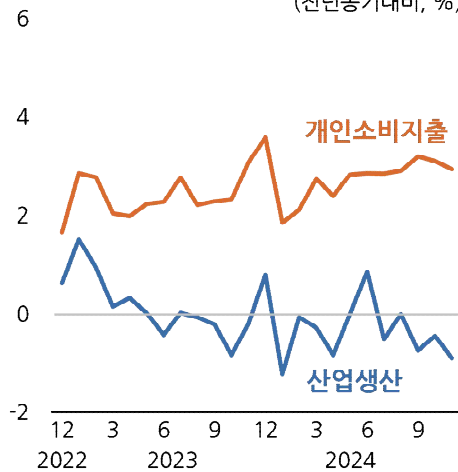

자료: Economic Policy Uncertainty.

- 미국경제는 제조업 경기 부진과 정책 불확실성 확대에도 불구하고, 소비지표가 양호한 흐름을 이어가면서 비교적 높은 성장세를 보일 전망

- 산업생산의 감소세가 지속되고 있으나, 소비가 높은 증가세를 유지하였으며 고용 증가세도 확대

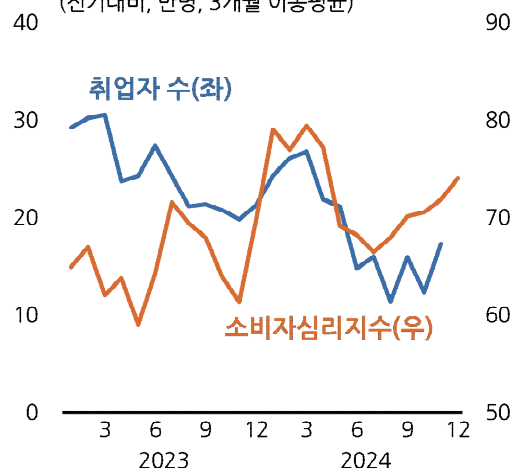

미국의 산업생산과 개인소비지출

(전년동기대비, %)

미국의 취업자 수와 소비자심리지수

(전기대비, 만명, 3개월 이동평균)

- 유로존은 고용 여건과 상품소비의 완만한 개선 흐름이 유지되고 있으나, 제조업 업황 부진으로 경기 회복에 대한 기대는 다소 약화

- 주요국의 낮은 성장세와 통상환경 악화 등 대내외 경기 하방 압력이 확대되고 있으며, 이에 따라 기준금리 인하 기조가 지속될 것으로 전망됨.

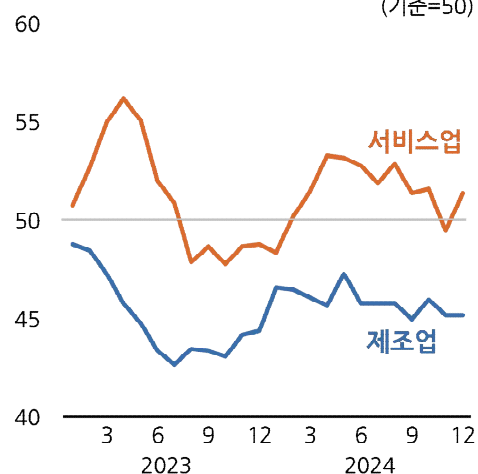

유로존의 산업생산과 소매판매

(전년동기대비, %)

유로존 제조업과 서비스업 심리지수

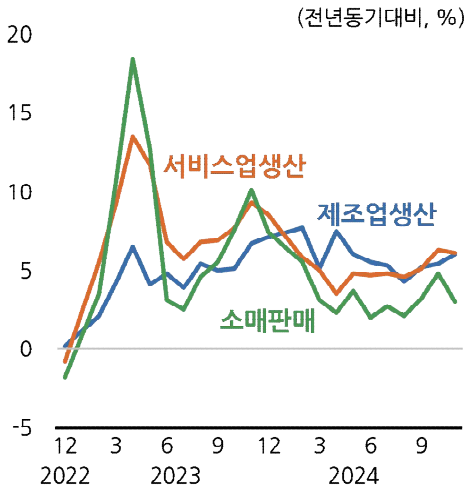

(기준=50)

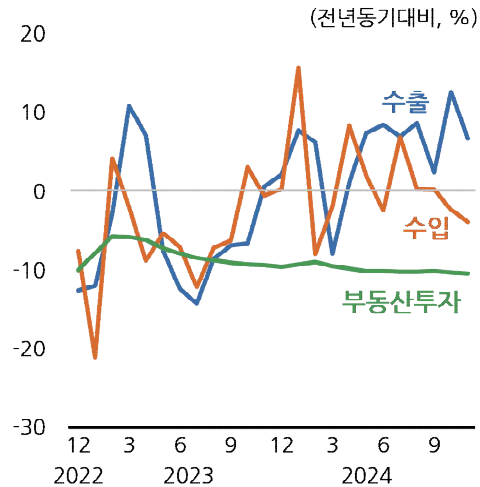

- 중국경제는 생산과 수출이 완만한 개선 흐름을 유지하였으나, 부동산투자의 부진과 미국과의 무역 갈등 우려로 경기 불확실성은 지속

– 주요 상품소비가 낮은 증가세에 그치고 수입 감소세도 지속됨에 따라 채권발행 확대, 완화적 통화정책 등 추가 경기 부양의 가능성이 증대

중국의 제조업과 서비스업 생산, 소매판매

중국의 수출입과 부동산투자

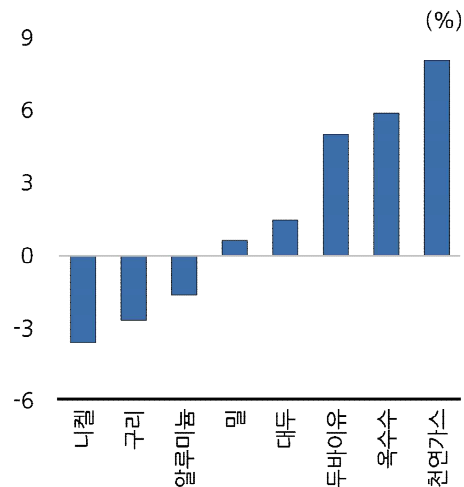

- 국제유가는 불안정한 모습을 보인 가운데 12월 중반 이후 미국의 재고 감소와 중국의 경기 부양에 대한 기대가 반영되어 상승으로 전환

– 한편, 천연가스는 유럽에서 지정학적 위험으로 공급 불안 우려가 확대되고 미국의 재고 전망도 하향 조정되면서 가파른 가격 상승세를 나타냄.

국제유가

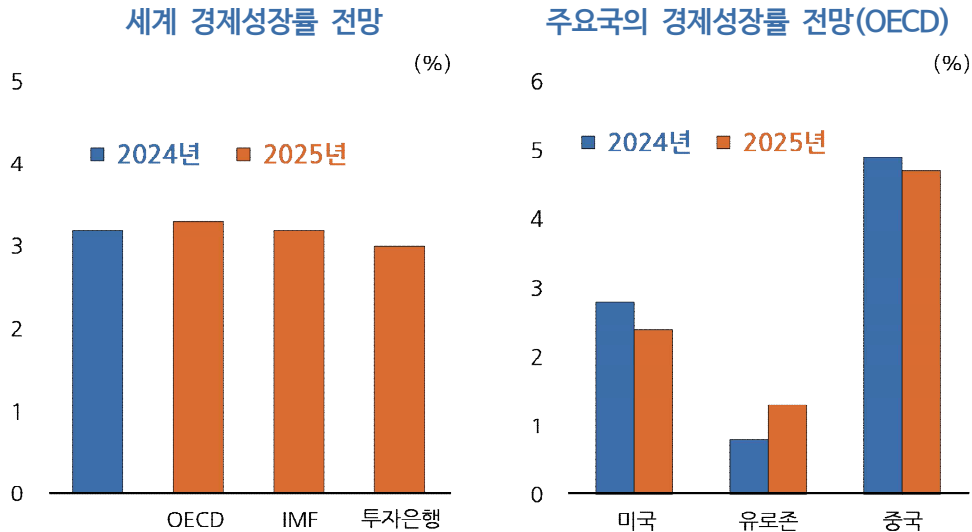

주요 원자재가격

주: 2024년 11월 말 대비 12월 말 기준.

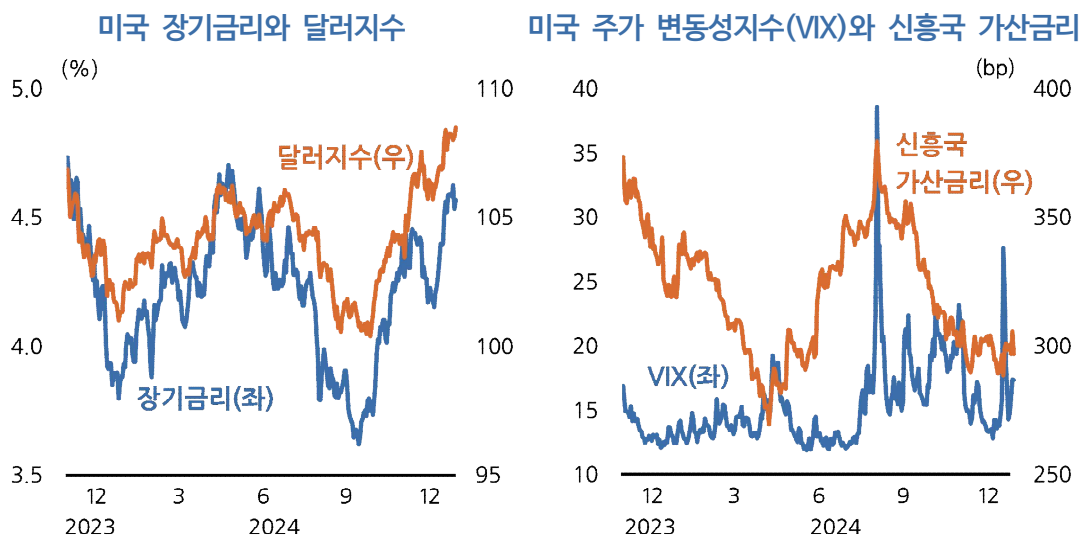

- 세계경제는 물가 안정과 이에 따른 금리 인하로 완만한 성장세를 유지하겠으나, 글로벌 통상환경 악화 우려와 지정학적 위험 등 경기 하방 압력도 높은 상태

– 유로존의 미약한 경기 회복에도 불구하고 미국이 양호한 성장세를 이어가면서 2025년 세계 경제는 2024년과 유사한 3%대 초반의 성장률을 기록할 전망

- 미국의 금리 인하에 대한 기대가 약화됨에 따라 달러화가 주요국 통화 대비 급등세를 보였으며, 장기금리도 큰 폭으로 상승

– 미국의 고금리 지속 전망과 통상환경 악화 우려로 투자심리가 위축될 때마다 주가 변동성이 급등하였으며, 미국과 다수의 신흥국에서 주가가 부진한 흐름을 나타냄.

Summary and Assessment※

- **The Korean economy is experiencing mounting downward pressure, as the economic recovery is delayed** by slowing production growth, accompanied by weakening economic sentiment amid growing uncertainties.
 - Semiconductor production maintained high growth, while related equipment investment and exports continued on a robust trajectory.
 - However, excluding semiconductors, production and exports in other sectors have slowed, and domestic demand remains subdued, particularly in the construction industry.
 - Construction production continues to decline sharply, while growth in services and non-semiconductor manufacturing is slowing.
 - Goods consumption and construction investment continues to exhibit prolonged weakness, weighing on economic recovery.
 - Amid growing external uncertainties, domestic political uncertainty is exacerbating economic sentiments.
 - Despite recent political turmoil, financial market indicators, such as exchange rates and stock prices, have remained relatively stable, although household and business sentiment indices have dropped significantly (see Box).

※ All growth figures are on a year-on-year basis unless otherwise noted. This document is an English translation of the original Korean version; the Korean version takes precedence in case of any ambiguities or discrepancies.

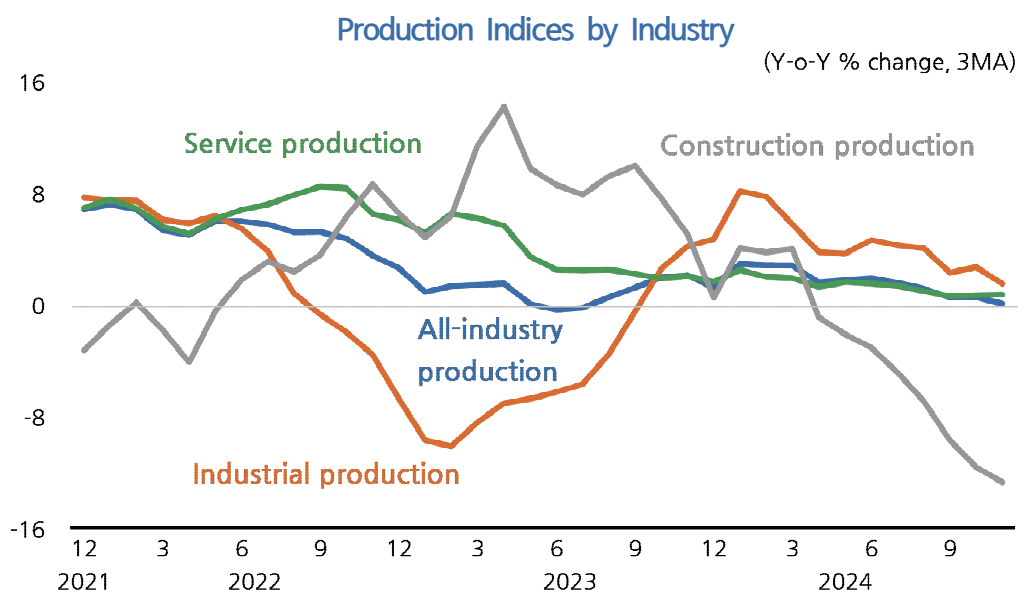

■ Amid a **delayed economic recovery**, evidenced by slowing production growth led by the construction industry, domestic and global uncertainties are mounting, **weighing on economic sentiment**.

● November all-industry production (2.4% → -0.3%) declined as growth slowed across industries.

- On a seasonally adjusted month-on-month basis, it decreased by 0.4%, following declines in September (-0.4%) and October (-0.2%).
- Construction production (-10.8% → -12.9%) continued significant declines, indicating persistent weakness.
- Industrial (mining and manufacturing) production (6.3% → 0.1%) receded despite high growth in semiconductors (11.1%), due to declines in automobiles (-6.7%) and electronic parts (-10.2%).
- Services production (2.1% → 1.0%) maintained a slowdown trend, with declines in wholesale and retail trade (1.0% → -3.2%) and professional, scientific, and technical activities (2.4% → -1.8%).

● Indicators suggesting a slowdown in manufacturing production are mounting, as evidenced by a persistently high inventory-to-shipment ratio (112.3% → 111.8%) from the previous month and a drop in the average capacity utilization rate (72.3% → 71.8%).

- On a seasonally adjusted month-on-month basis, shipments fell by 0.4%, led by domestic shipment (-4.1%).

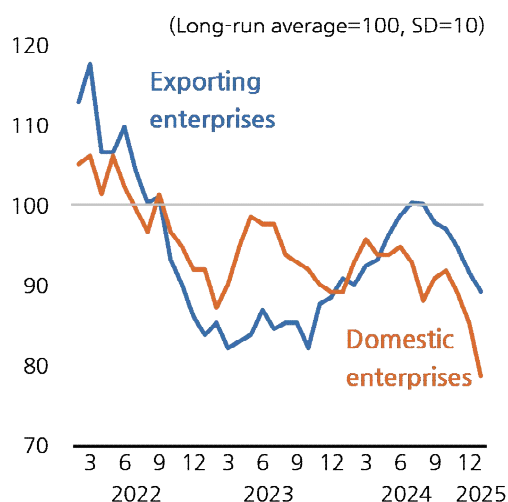

- Despite sustained favorable momentum in the semiconductor sector, goods consumption and construction investment remained sluggish, keeping domestic demand at a weak level.
 - Semiconductor production and exports maintained robust growth, alleviating downward economic pressures.
 - However, excluding semiconductors, production and exports in other sectors are gradually slowing, with prolonged weakness in goods consumption and construction investment delaying the recovery of domestic demand.
- While recent domestic political turmoil has not resulted in financial instability, economic sentiment has contracted, heightening downside risks to the economy.
 - Compared to the 2016-17 period of political turmoil, financial indicators show limited instability, but sentiment indicators for households and businesses have worsened by a much larger margin (see Box).

Semiconductor Production Index (SA)

Manufacturing Conditions Outlook BSI

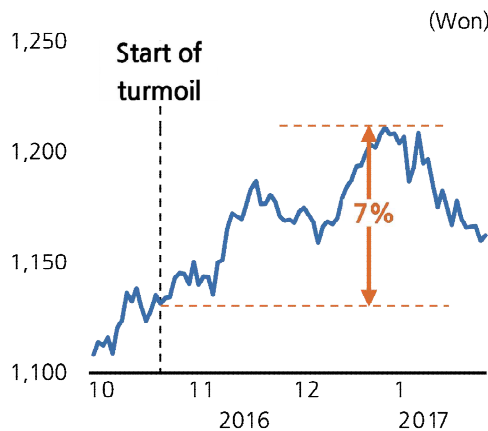

Box: Financial Market and Sentiment Indicators During Periods of Political Uncertainty: 2016~17 vs. 2024~25

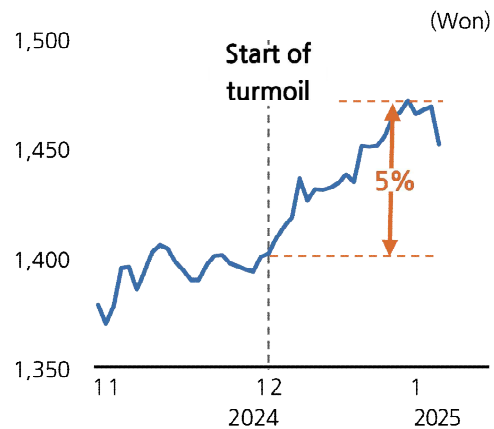

- During the recent political turmoil (from December 3, 2024), financial markets exhibited some instability but remained more stable compared to the turmoil in 2016 (from October 24, 2016).
- The rise in the won-to-dollar exchange rate was more limited than in the past, and the CDS premium, reflecting sovereign default risk, showed only a slight increase while remaining at low levels.

KRW-USD Exchange Rate

Political Turmoil in 2024~25

■ In contrast, household and business sentiment experienced sharper declines compared to the past.

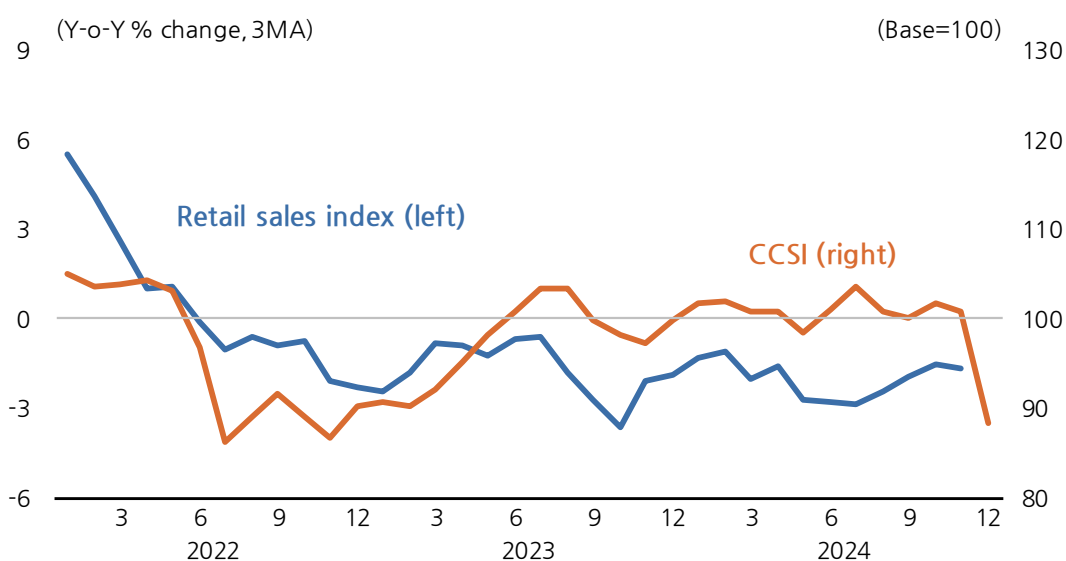

- The Composite Consumer Sentiment Index (CCSI) declined by 9.4p over three months in the past, whereas it dropped by 12.3p in just one month during the recent turmoil, with the Business Survey Index (BSI) also showing a comparatively sharper decline than before.

■ **Consumption remains sluggish, led by weak goods consumption, while consumer sentiment contracts sharply, amplifying downside risks.**

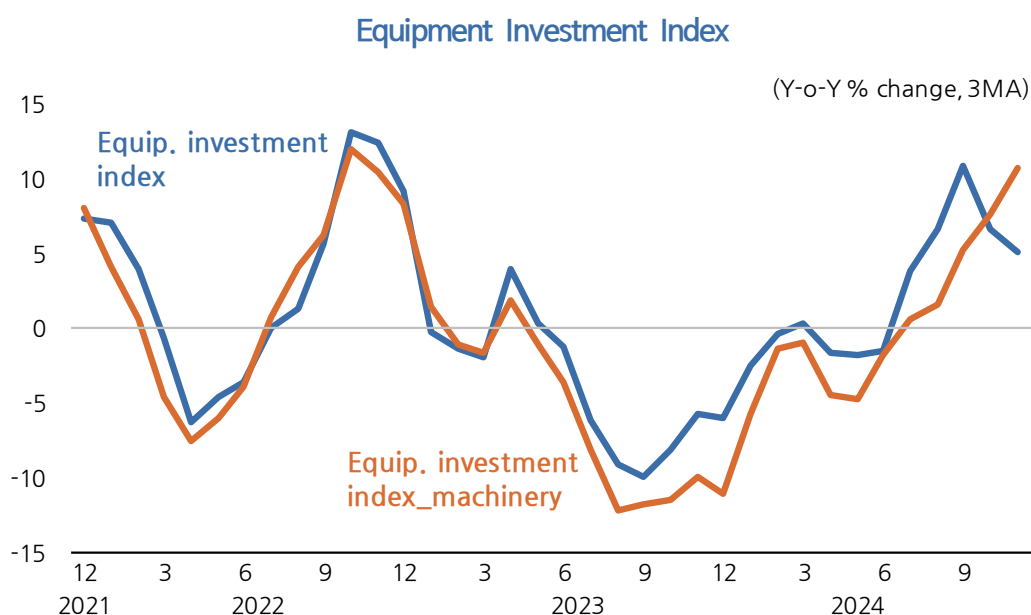

- Goods consumption showed weakness across most categories.
 - November retail sales (-0.9% → -1.9%) decline more sharply, driven by decreases in major categories, such as passenger cars (-7.9%), household electrical appliances (-4.5%), communication devices and computers (-6.2%), and cosmetics (-9.8%).
- Service consumption exhibited only modest growth, centered on major businesses.
 - Low production growth persisted in businesses closely tied to consumption, such as accommodation and food services (0.1%), arts, sports, and recreation-related services (0.3%), and education services (-0.5%).
- Reflecting the impact of political instability, the Composite Consumer Sentiment Index (CCSI) fell sharply to 88.4 in December from 100.7 in the previous month.
 - Notably, current domestic economic conditions (70 → 52) and prospective domestic economic conditions (74 → 56) saw significant declines.

Retail Sales Index and Composite Consumer Sentiment Index (CCSI)

■ Equipment investment continues its modest recovery, driven by improvements in semiconductor-related investments.

- In November, equipment investment (5.5% → 2.6%) maintained modest growth despite declines in highly volatile transport equipment, as machinery continued favorable performance, particularly in semiconductor-related equipment.
 - Machinery (12.2% → 9.7%) maintained strong growth, led by semiconductor manufacturing equipment (58.7% → 63.3%).
 - However, declines widened in non-semiconductor machinery, including general industrial machinery (-3.9% → -9.2%), electrical and electronic equipment (-5.6% → -6.8%), and other machinery (-4.8% → -9.7%). Transport equipment (-14.6%) also remained weak, with significant decreases in other transport equipment (-16.4%) and passenger cars (-13.5%).
- Leading indicators suggest that semiconductor-related investments maintain strong momentum, while investment conditions in other industries remain weak.
 - In December, machinery imports (7.8% → 27.1%) continued to show robust growth, led by semiconductor manufacturing equipment (77.4% → 42.6%).
 - Conversely, the growth rate of domestic machinery orders received (-5.9% → -15.3%) and the manufacturing average capacity utilization rate (72.3% → 71.8%) declined from the previous month, indicating that equipment investment outside the semiconductor sector is likely to remain weak.

■ **Construction investment remains sluggish**, with a sharper decline in the value of construction completed.

- The value of construction completed in November (-10.8% → -12.9%) continued its steep decline, driven primarily by the building construction sector.

- On a seasonally adjusted month-on-month basis, it declined for the seventh consecutive month, indicating a deepening downturn.

* Value of construction completed (SA, MoM, %): (Sept.) -2.0 → (Oct.) -4.1 → (Nov.) -0.2

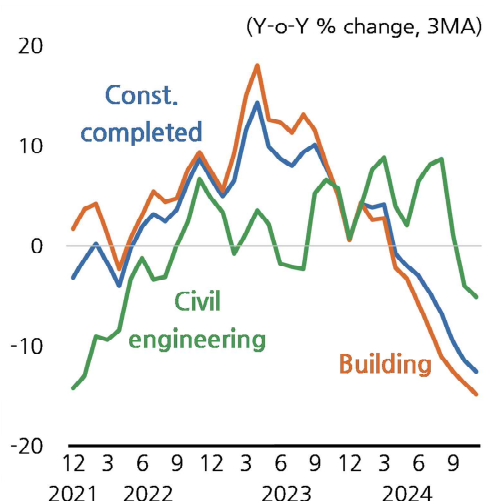

- The building construction sector (-11.8% → -16.5%) saw significant declines in both residential and non-residential construction, while the civil engineering sector (-7.7% → -0.5%) also remained weak.

- Construction orders received, a leading indicator, maintained improvement, primarily in the public sector.

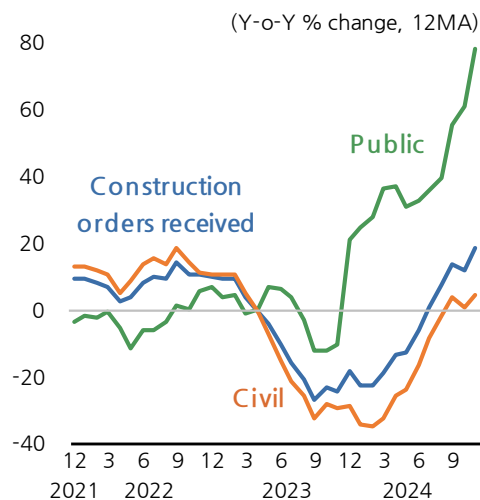

- The construction orders received (nominal, 62.9%) significantly, driven primarily by base effects and expanded housing supply in the public sector.

- However, the improvement in construction orders received is expected to take considerable time before fully translating into construction investment.

Construction Completed (Constant)

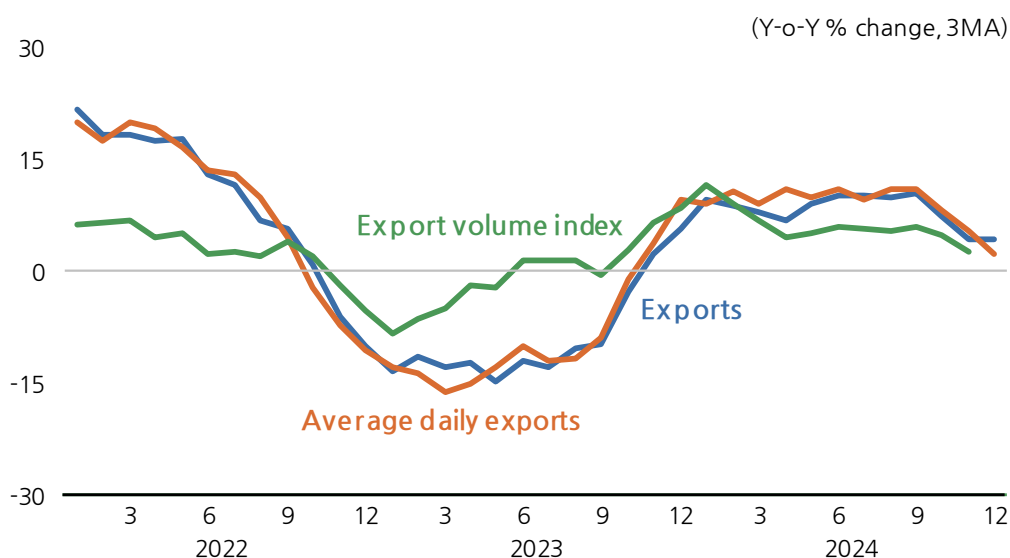

Construction Orders Received by Orderer

■ **Exports** maintains strong momentum in ICT items, though **the pace of growth appears to be moderating** from previously high levels, driven by other categories.

- December exports grew by 6.6%, up from 1.4% in the previous month; however, on a daily average basis, the growth rate was 4.3%, similar to the previous month's 3.5%.
 - By item, ICT exports (daily average, 25.8% → 27.9%) continued robust growth, while other items (-3.6%) declined due to weak global demand.
 - * The decline in non-ICT items appears partially attributable to base effects from high growth rate a year ago (11.5%), indicating a moderate slowdown.
 - By destination, on a daily average basis, exports to the U.S. (-3.1% → 3.2%) turned positive, supported by semiconductor gains despite declines in automobiles and general machinery. Exports to China (1.4% → 6.2%) also showed steady growth, led by semiconductors.
- Imports (-2.4% → 3.3%) increased slightly, driven by non-energy items (1.3% → 12.2%), despite a decline in major energy resources (-12.2% → -18.1%) due to falling oil prices.
 - Import of semiconductors (25.4% → 30.9%), closely tied to ICT exports, maintained their upward trend.
- The trade balance (\$5.59 billion → \$6.49 billion) remained in surplus.
- Export conditions have slightly deteriorated as uncertainty surrounding U.S. trade policies remains elevated.

Exports, Average Daily Exports and Export Volume Index

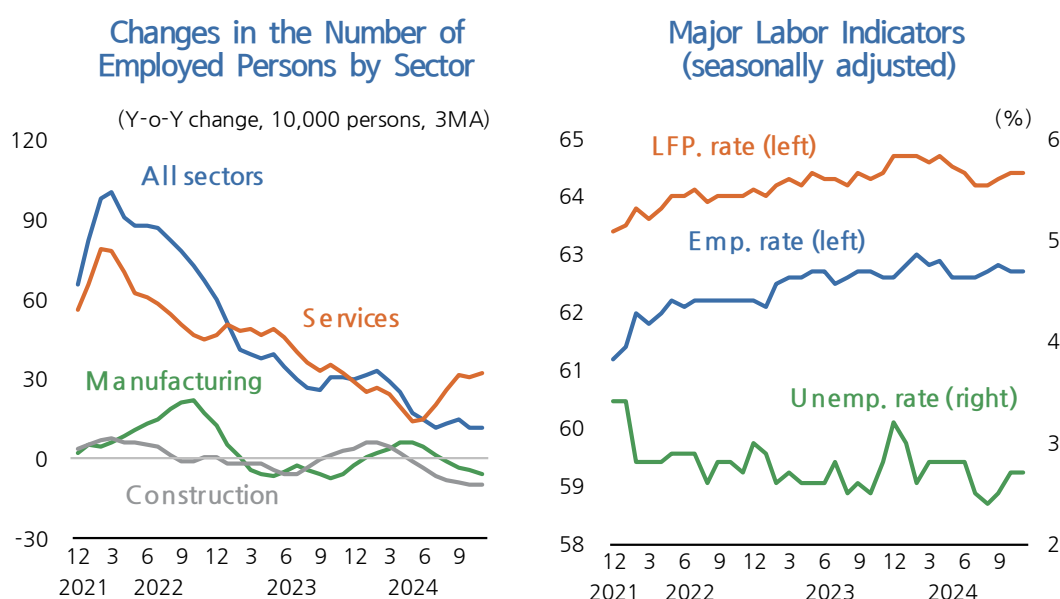

■ The labor market **continues its gradual weakening in employment conditions**, led by the construction and manufacturing sectors.

● In November, the number of employed persons increased by 123,000, maintaining modest growth following October's 83,000 gain.

- The construction industry (-93,000 → -96,000) sustained substantial losses, while the manufacturing industry (-33,000 → -95,000) recorded a pronounced contraction.
- Conversely, the service industry (275,000 → 357,000) exhibited robust growth, driven by human health and social work activities (97,000 → 113,000) and education (83,000 → 106,000).

● Nonetheless, on a seasonally adjusted basis, the employment rate (62.7%) remained unchanged from the previous month, and the unemployment rate (2.7%) stayed at a low level, suggesting a moderate pace of labor market slowdown.

- While employment rates among youth (15-29) and those in their 50s continued to decline, rates for those in their 30s and 40s maintained an upward trend, resulting in a gradual decline in the seasonally adjusted employment rate for those aged 15 and older.

■ Consumer price inflation accelerated, driven by volatile petroleum products, although **the underlying trend of price increases continues to moderate.**

- Consumer prices (1.5% → 1.9%) saw a larger increase, primarily led by commodity prices.

- As the decline in international oil prices moderated due to base effects, petroleum product prices (-5.3% → 1.0%) shifted to positive growth, contributing to the steeper rise in commodity prices (0.9% → 1.8%).

* Dubai crude oil price (YoY, %): (Oct.) -16.5 → (Nov.) -13.1 → (Dec.) -5.3

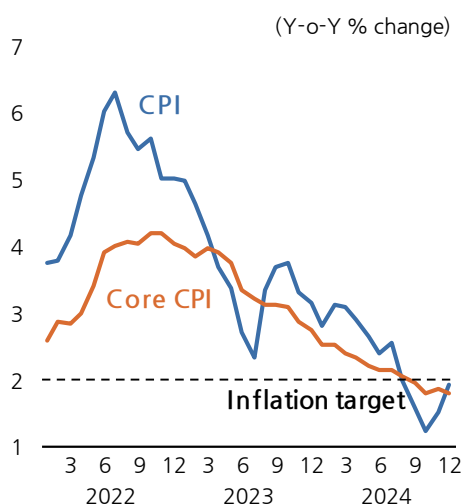

- Conversely, service prices maintained the same growth rate as the previous month at 2.1%.

- The ongoing weakness in domestic demand has sustained the moderation in the underlying inflation trend, while the recent decline in consumer sentiment could further amplify downward pressure moving forward.

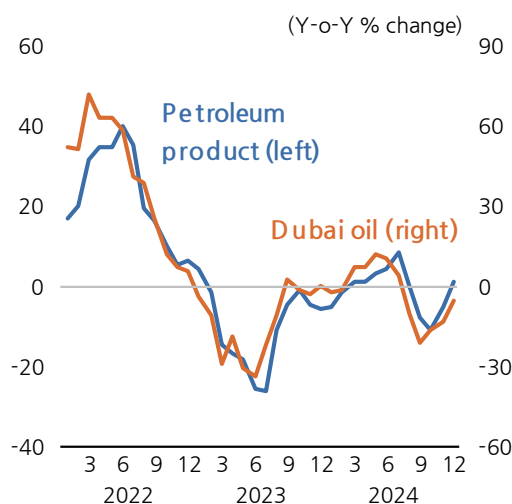

- Core inflation, which reflects the underlying trend, was 1.8%, slightly lower than 1.9% in the previous month.

- Amid continued weakness in consumer spending, particularly in goods consumption, the CCSI plummeted (100.7 → 88.4).

CPI and Core CPI Change

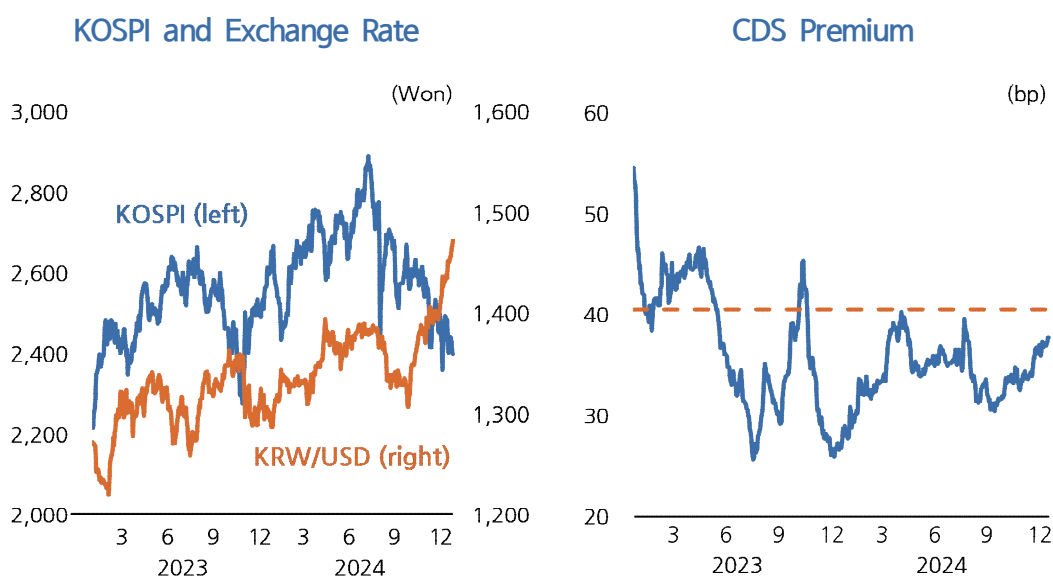

Petroleum Product Prices and International Oil Prices

■ **Financial markets appear somewhat unstable** amid heightened domestic political uncertainty, but this has not translated into systemic financial risks.

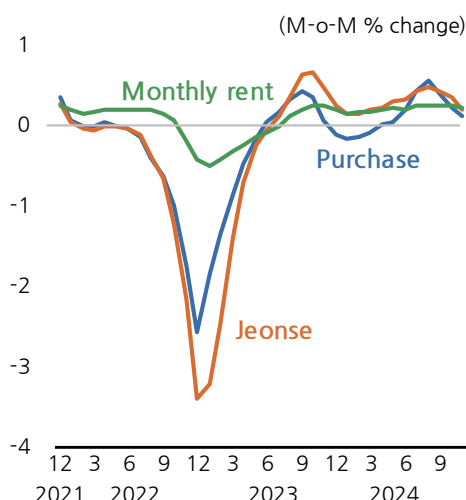

- Domestic political instability led to a 5.6% increase in the won-to-dollar exchange rate at the end of December compared to the previous month and a 2.3% decline in the KOSPI, accompanied by heightened volatility.
 - The CP spread (38bp → 59bp) and credit spread (59bp → 69bp) also widened, reflecting increased unease in the financial markets.
 - However, the rise in the won-to-dollar exchange rate was partly attributed to a stronger U.S. dollar (2.6%) driven by anticipated delays in U.S. rate cuts.
- However, due to market stabilization measures, the government bond yield (3-year, 2.61% → 2.60%) and CDS premium (34.0bp → 37.8bp) remained relatively stable.
- Household loans continued to decelerate, particularly in the banking sector.
 - Total household loan growth across all financial sectors (trillion won):
(Aug.) 9.7 → (Sept.) 5.3 → (Oct.) 6.5 → (Nov.) 5.1

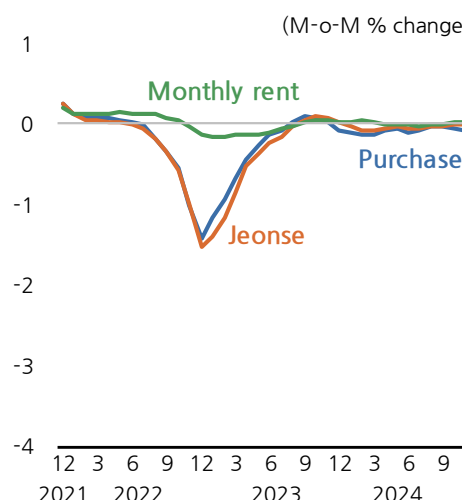

■ **The housing market exhibited a moderation in sales price increases** due to subdued demand stemming from tighter household loan regulations.

- Amid ongoing stricter lending regulations, November housing sales prices saw slower increases, while transaction volumes continued to decline.
 - The rise in home mortgage loans (5.5 trillion won → 4.1 trillion won) slowed, especially in the banking sector, where stricter regulations were applied (change during the period: 3.6 trillion won → 1.5 trillion won).
 - As a result, housing sales prices showed slower growth in the capital area (month-on-month: 0.22% → 0.11%) and continued to decline in non-capital areas (-0.06% → -0.09%).
 - Housing sales transactions also fell in both the capital area (22,000 units) and non-capital areas (27,000 units), down from the previous month (capital: 25,000 units; non-capital: 32,000 units).
- In the housing rental market, jeonse prices (month-on-month, 0.16% → 0.09%) and monthly rental prices (0.13% → 0.12%) continued modest growth.
- Housing starts and permits, leading indicators for housing supply, indicate a potential housing supply shortage centered in the capital area.
 - Housing starts (22,000 units) decreased from a year ago (35,000 units). The year-to-date cumulative total for housing starts in the capital area through November (135,000 units) remained below the recent cumulative three-year average (2021-2023: 175,000 units).
 - The year-to-date cumulative total for housing permits in the capital area through November (116,000 units) stayed well below the recent three-year cumulative average (179,000 units), signaling potential future housing supply shortages in the area.

Housing and Rent Prices (Capital)

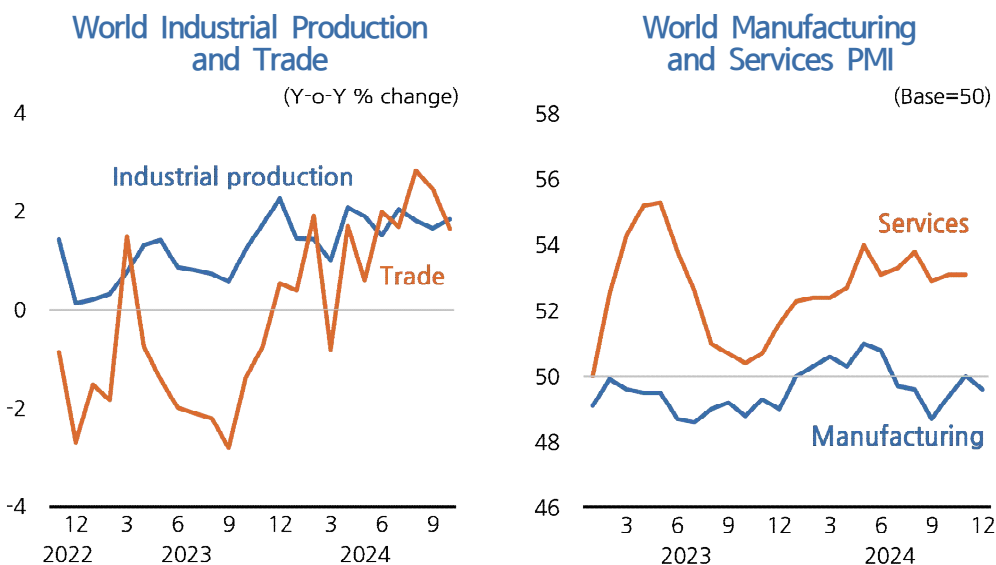

Housing and Rent Prices (Non-Capital)

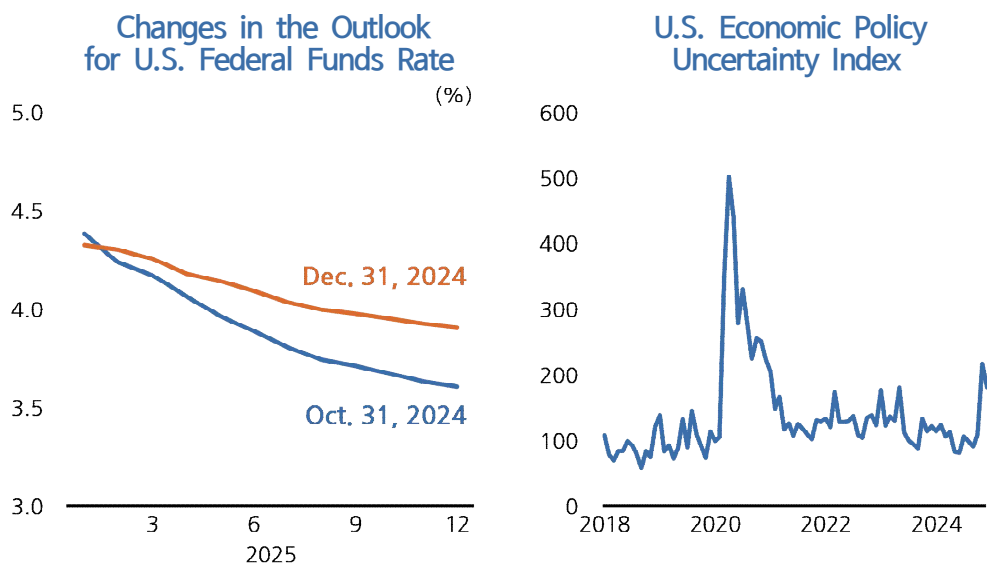

■ The global economy is expected to maintain moderate growth; however, uncertainties surrounding U.S. policies and geopolitical risks could act as constraints.

- Despite slowing goods trade growth and subdued manufacturing business conditions, the recovery in consumer spending and improvements in the service sector in advanced economies suggest a limited risk of a global recession.

- Nevertheless, downside risks remain elevated, as indicated by expectations of prolonged high U.S. interest rates, growing concerns over protectionism, and persistent geopolitical tensions.

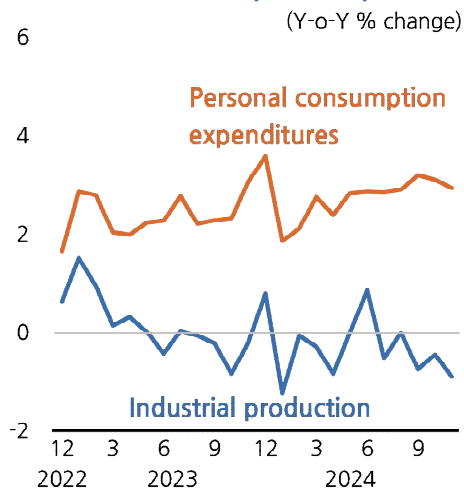

Source: Economic Policy Uncertainty.

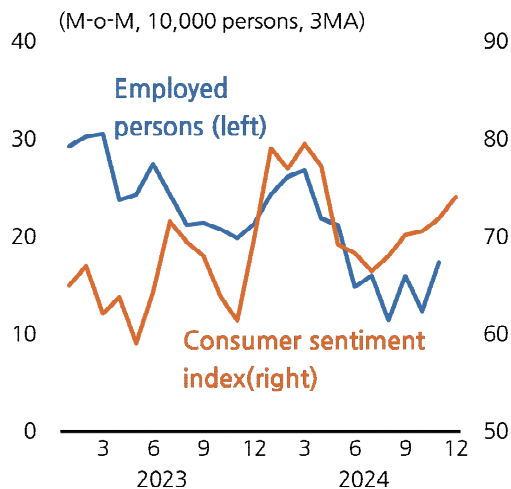

- Despite a sluggish manufacturing sector and expanding policy uncertainties, the U.S. economy is projected to experience relatively strong growth, supported by sustained robust consumer indicators.

- Industrial production continues to decline, yet consumption has maintained strong growth, accompanied by an expansion in employment growth.

U.S. Industrial Production and Personal Consumption Expenditures

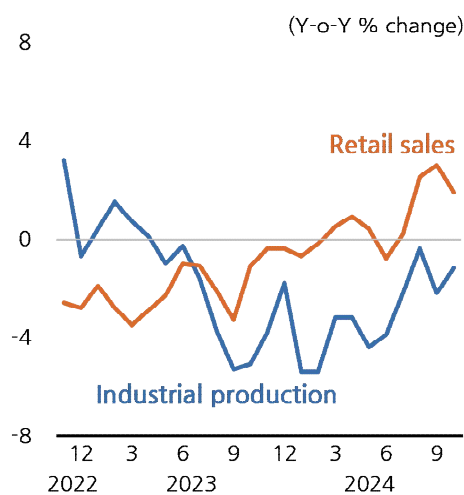

U.S. Employment and Consumer Sentiment Index

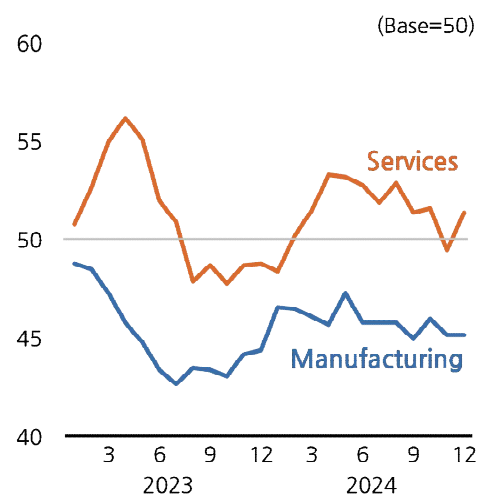

- The Eurozone shows sustained modest gains in employment and goods consumption, yet recovery prospects remain subdued due to weak manufacturing conditions.

- Heightened domestic and external downside pressures, including slow growth in major economies and worsening trade conditions, are expected to sustain the trend of policy rate cuts.

Industrial Production and Retail Sales in Eurozone

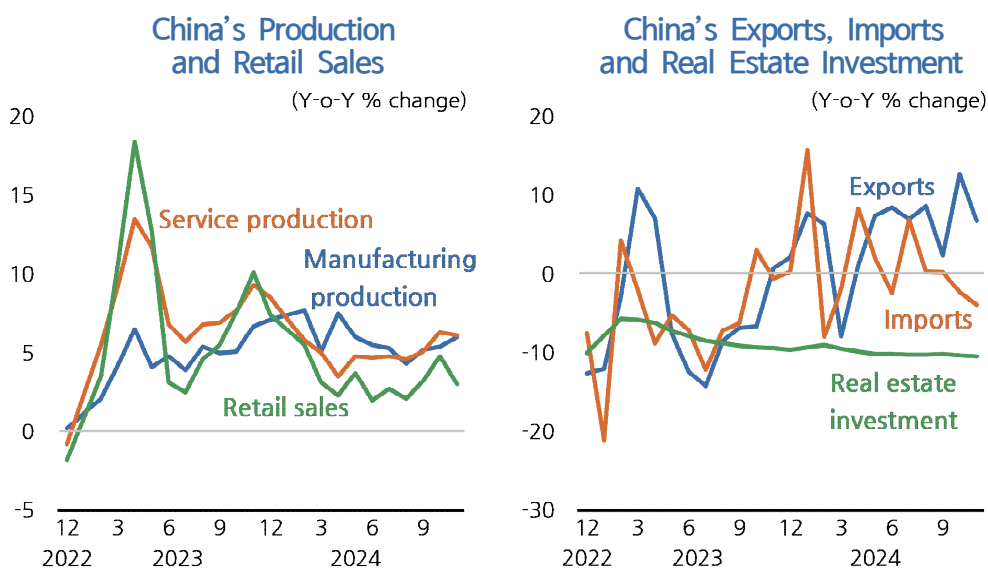

Manufacturing and Services PMI in Eurozone

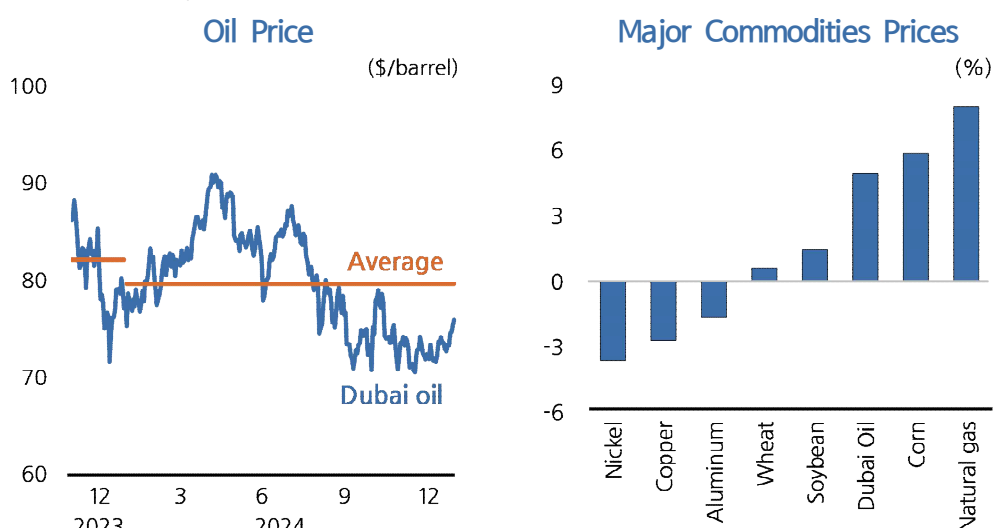

- China's economy continues to experience moderate improvements in production and exports, yet uncertainties persist due to sluggish real estate investment and concerns over trade tensions with the U.S.

- Growth in major goods consumption remained subdued, and imports continued to decline, increasing the likelihood of additional economic stimulus through expanded bond issuance and accommodative monetary policies.

- International oil prices exhibited volatility but began trending upward after mid-December, driven by declines in U.S. inventories and expectations of economic stimulus in China.

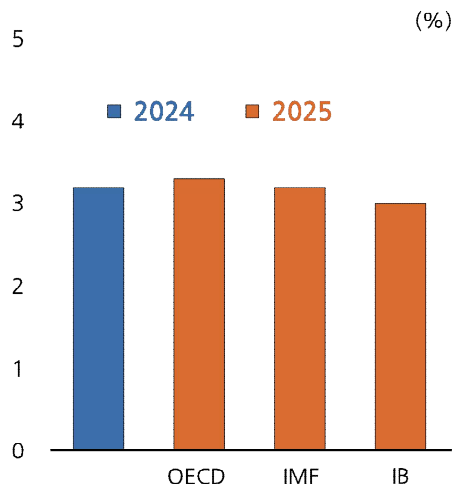

- Meanwhile, natural gas prices surged sharply due to heightened supply concerns in Europe stemming from geopolitical risks and downward revisions to U.S. inventory forecasts.

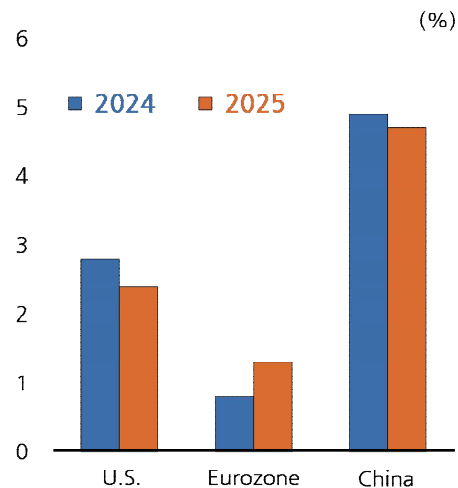

Note: Based on end-Dec. compared to end-Nov.

- With inflation stabilizing and interest rates declining as a result, the global economy is expected to maintain moderate growth, though concerns over intensifying trade tensions and geopolitical risks persist as significant downward pressures.
 - The global economy is projected to grow at a similar rate to 2024, in the low 3% range, in 2025, driven by the U.S. maintaining solid growth despite the Eurozone's weak economic recovery.

World Economic Outlook

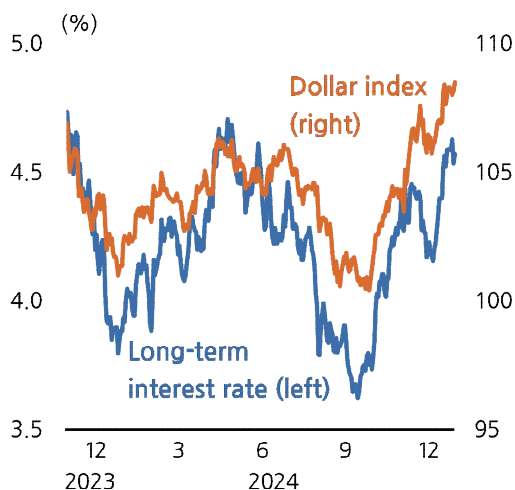

Major Countries' Economic Growth Forecast (OECD)

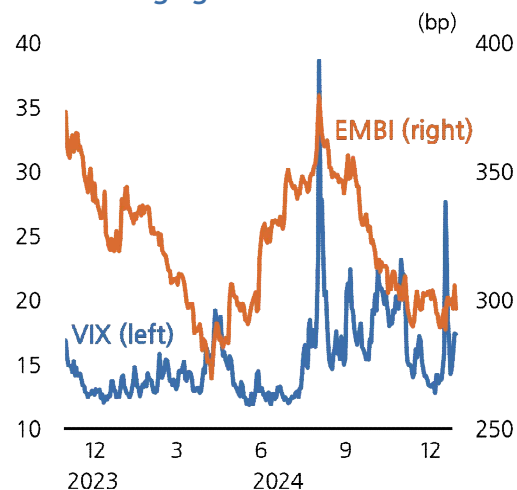

- The dollar surged against major currencies as expectations for U.S. interest rate cuts diminished, while long-term interest rates also rose significantly.
 - Stock price volatility surged whenever investor sentiment weakened amid expectations of prolonged high U.S. interest rates and a worsening trade environment, with stock prices remaining sluggish in the U.S. and many emerging markets.
