주: 실업률은 계절조정 기준(연간 제외)이며 국고채 수익률 · 종합주가지수 · 원/달러 환율은 기말 기준, 유가(두바이)는 기간평균 기준, 주택가격은 전년대비 증가율 기준임.

요약 및 평가※

- 최근 우리 경제는 **생산 증가세가 완만한 수준에 머무른 가운데, 대외 여건 악화로 경기 하방 위험이 높아지는 모습**
 - 반도체와 자동차를 중심으로 제조업이 개선되었으나, 건설업 부진에 기인하여 생산은 완만한 증가세를 나타냄.
 - 소비와 건설투자를 중심으로 내수 회복이 지연되고 있으며, 그동안 높았던 수출 증가세도 반도체를 제외한 부문을 중심으로 점차 둔화
 - 소매판매와 건설기성이 감소세를 지속하였으며, 가계와 기업의 심리지표도 낮은 수준에 머무름.
 - 수출은 반도체의 높은 증가세에도 불구하고 여타 품목을 중심으로 둔화
 - 정국 불안의 여파가 지속되는 가운데, 대외 불확실성이 확대되면서 경기 하방 위험이 증대
 - 미국을 중심으로 무역분쟁이 격화됨에 따라 통상환경 악화에 대한 우려가 확대

※ 별도의 언급이 없을 경우 모든 증가율은 전년동월대비 기준임.

■ 건설업 부진에 기인하여 생산 증가세가 낮은 수준에 머무른 가운데, 국제 통상환경 악화에 대한 우려가 확대되며 경기 하방 위험이 증대

● 12월 전산업생산(-0.3% → 1.4%)은 조업일수 확대(-0.5일 → +0.5일)와 광공업 개선에도 불구하고 건설업 부진에 기인하여 소폭 증가에 그침.

– 광공업생산(0.1% → 5.3%)은 반도체(11.7% → 13.9%)의 높은 증가세가 이어진 가운데, 부품사 파업 종료 등으로 자동차(-6.7% → 2.1%)가 반등하면서 증가폭이 확대

– 서비스업생산(0.9% → 1.2%)도 운수·창고업(8.7% → 9.0%), 전문과학·기술(-1.1% → 1.2%)을 중심으로 증가폭이 소폭 확대

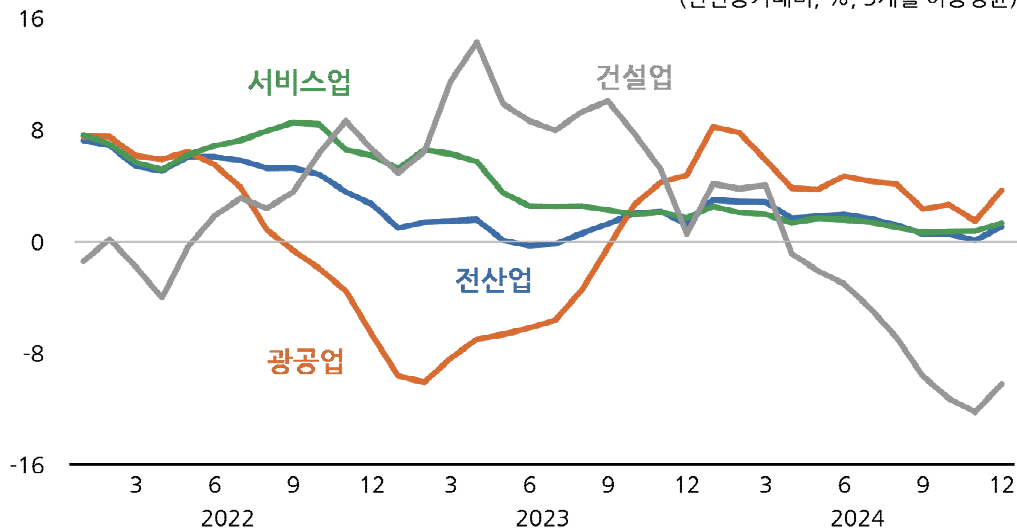

– 다만, 건설업생산(-12.5% → -8.3%)은 큰 폭의 감소세를 지속하면서 부진한 모습

● 재고율(113.6% → 101.2%)이 하락하고 평균가동률(71.6% → 73.5%)이 상승하는 등 제조업 관련 지표가 전월에 비해 개선

– 계절조정 전월대비 기준으로 내수출하(4.0%)와 수출출하(13.0%)가 모두 증가

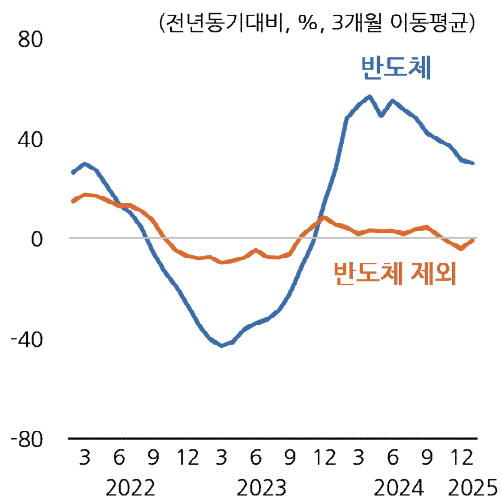

산업별 생산지수

(전년동기대비, %, 3개월 이동평균)

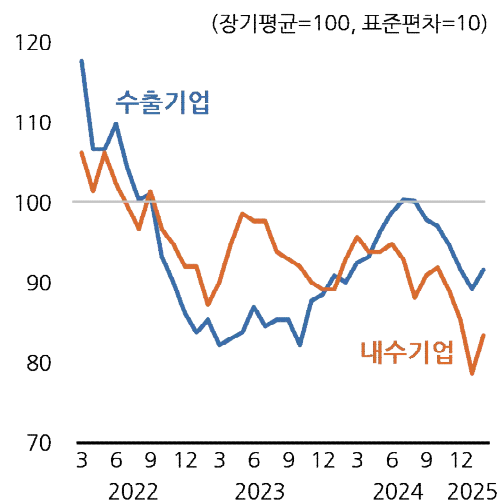

- 반도체의 호조세가 유지되며 생산 증가를 견인하였으나, 내수는 건설투자를 중심으로 부진한 모습
 - 반도체생산이 높은 증가세를 이어가고 관련 설비투자도 개선되었으나, 소매판매와 건설투자는 부진을 지속
- 정국 불안의 여파가 지속되는 가운데, 국제 통상환경 악화 우려가 확대되며 경기 하방 위험이 증대
 - 정국 불안으로 12월 중 급락한 가계와 기업의 심리지표가 1월에도 낮은 수준을 지속
 - 반도체를 제외한 품목의 수출 증가세가 둔화되는 가운데, 미국을 중심으로 무역분쟁이 격화됨에 따라 통상환경 악화에 대한 우려가 확대

품목별 일평균 수출

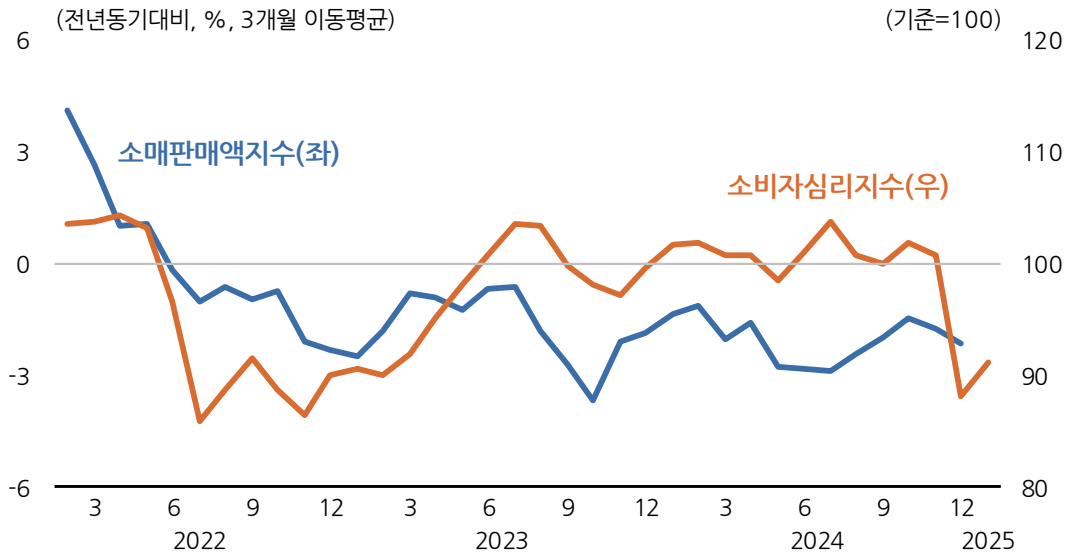

제조업 업황BSI 전망

■ 고금리 기조가 유지되는 가운데 정국 불안에 따른 가계심리 위축으로 소비 부진이 지속되는 모습

- 대부분의 품목에서 소매판매 감소세가 확대되는 등 상품소비 부진이 장기화되는 모습
 - 12월 소매판매(-2.2% → -3.3%)는 승용차(-11.5%), 가전제품(-7.5%), 의복(-1.3%), 차량 연료(-5.0%) 등을 중심으로 부진하였으며, 계절조정 전월대비로도 0.6% 감소
- 서비스소비도 주요 업종에서 감소세가 확대되는 등 미약한 흐름을 나타냄.
 - 정국 혼란, 여객기 참사 등에 따른 소비심리 위축으로 숙박·음식점업(-2.8%), 예술·스포츠·여가관련서비스업(-8.7%) 등 소비와 밀접한 서비스업의 생산이 비교적 큰 폭으로 감소
- 아울러 1월 소비자심리지수도 전월(88.2)에 이어 기준치(100)를 크게 하회하는 91.2에 그치면서 소비심리 위축을 반영

소매판매액지수 및 소비자심리지수

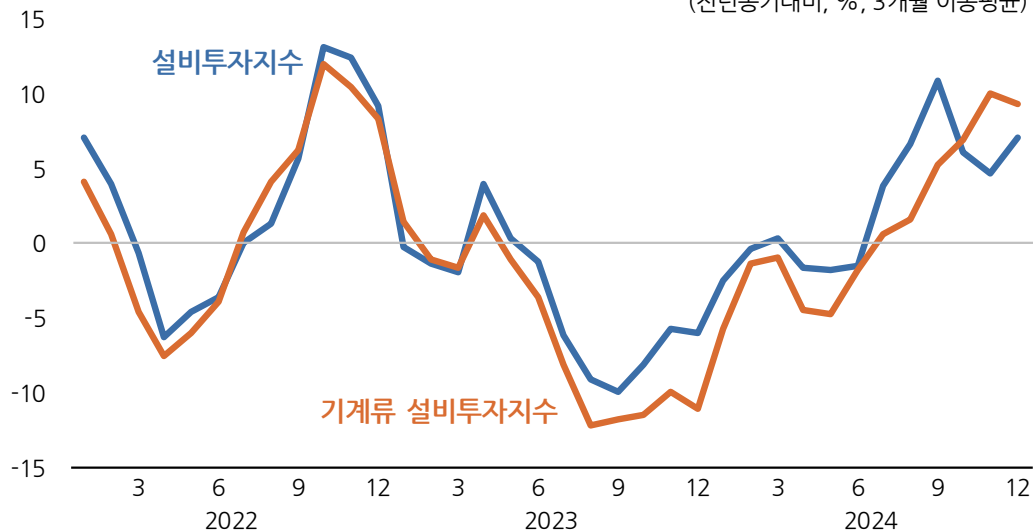

■ 설비투자는 반도체 관련 투자의 양호한 흐름이 이어지면서 회복세를 지속

- 12월 설비투자(2.7% → 13.1%)는 반도체를 중심으로 기계류의 높은 증가세가 유지되는 가운데, 운송장비도 급증하며 증가폭이 크게 확대
 - 기계류(9.5% → 8.5%)는 일반산업용기계(-11.4% → -6.6%), 전기 및 전자기기(-4.5% → -3.0%) 등이 부진하였으나, 반도체와 관련된 반도체제조용장비(62.1% → 27.2%)와 정밀 기기(7.7% → 27.3%)가 대폭 증가하며 개선세를 지속
 - 운송장비(-13.9% → 27.8%)도 선박, 항공기 등 변동성이 높은 기타운송장비(-14.2% → 70.0%)를 중심으로 높은 증가율을 기록
- 선행지표는 반도체 관련 설비투자의 개선 흐름이 이어질 가능성을 시사
 - 특수산업용기계수주(5.3% → 10.4%)와 1월 반도체제조용장비 수입액(42.6% → 6.5%) 등 반도체 관련 선행지표는 양호한 증가세를 유지
 - 다만, 일반산업용기계(-23.2%), 전기기계(-16.7%)의 국내기계수주가 감소하는 등 반도체를 제외한 부문은 부진한 모습

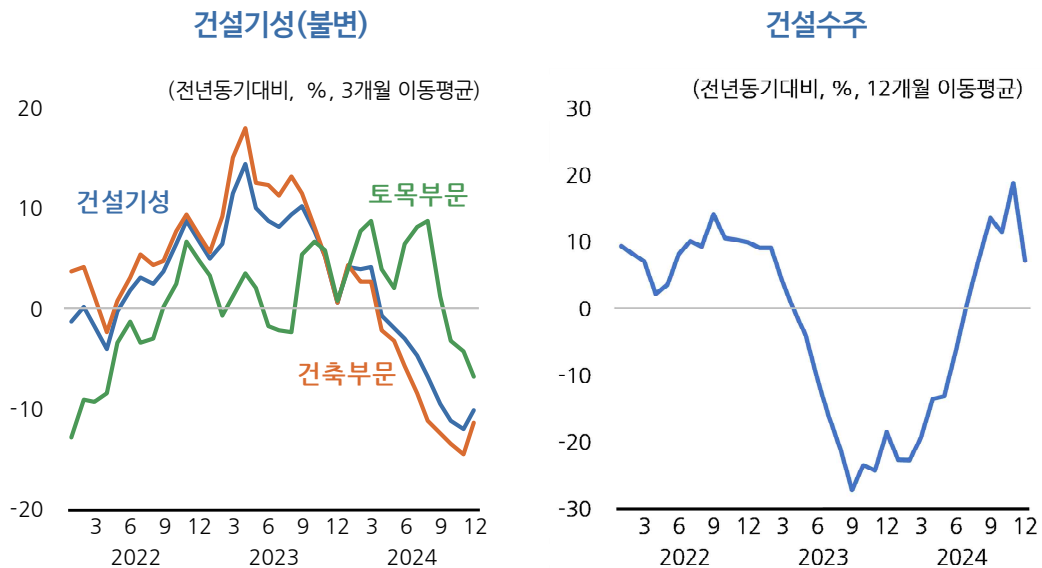

설비투자지수

(전년동기대비, %, 3개월 이동평균)

■ 건설기성이 큰 폭의 감소세를 이어가는 등 건설투자 부진이 지속

- 12월 건설기성(-12.5% → -8.3%)은 전반적으로 감소세를 지속하며 부진한 모습
 - 건축부문(-16.1% → -6.8%)은 주거용과 비주거용 모두 감소세가 이어졌으며, 토목부문(-0.4% → -11.4%)도 감소폭이 확대
- 최근 주택경기가 둔화 조짐을 보이고 있으나, 건설수주 등의 선행지표 개선세는 유지
 - 최근 주택경기가 둔화되는 가운데 4/4분기 건축착공면적(21.5% → -8.9%)이 감소로 전환
 - 반면, 2024년 건설수주는 전년대비 7.2% 증가하면서 극심한 부진에서는 벗어나는 모습

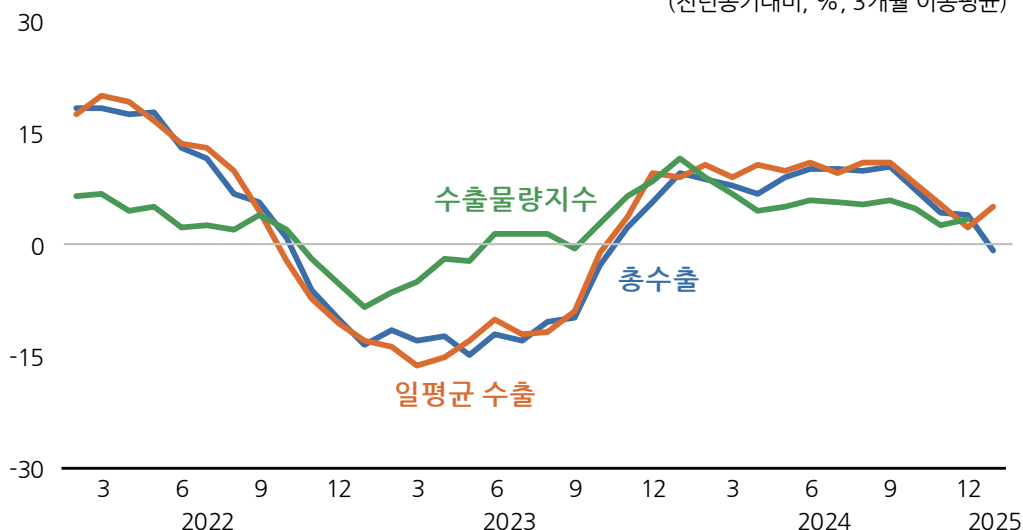

■ ICT 품목의 수출 호조세에도 불구하고, 여타 품목을 중심으로 수출 증가세가 둔화되는 모습

- 1월 수출(6.6% → -10.3%)은 조업일수의 축소(+0.5일 → -4.0일)에 주로 기인하여 감소하였으나, 일평균 기준으로는 전월(4.3%)에 이어 7.7%의 완만한 증가를 지속
 - 품목별로는 일평균 기준으로 ICT 품목(27.8% → 25.0%)의 높은 증가세가 이어진 반면, 글로벌 수요 둔화로 일반기계(-6.0%)와 석유제품(-15.8%)은 감소
 - * ICT 제외 일평균 수출액(%, 3개월 이동평균): ('24년 11월) -2.8 → (12월) -5.1 → ('25년 1월) -1.7
 - 2024년 국민계정상 실질상품수출도 점진적으로 조정되면서 4/4분기에는 2.5% 증가에 그침.
 - * 실질상품수출(%): ('24년 2/4분기) 8.7 → (3/4분기) 6.3 → (4/4분기) 2.5
- 수입(3.3% → -6.4%)은 주요 에너지자원(-18.2% → -12.3%)과 이를 제외한 품목(12.2% → -4.0%)이 모두 부진하며 감소로 전환
- 무역수지(-18.9억달러)가 조업일수 감소와 계절적 요인에 기인하여 일시적으로 적자를 기록
- 한편, 미국을 중심으로 국제 무역분쟁이 격화되며 수출 여건이 악화됨.

총수출, 일평균 수출 및 수출물량지수

(전년동기대비, %, 3개월 이동평균)

■ 내수 부진이 지속되면서 고용 증가세의 둔화 흐름이 이어짐.

- 12월 취업자 수(12.3만명 → -5.2만명)는 건설업과 제조업의 부진이 지속된 가운데, 일자리정책 종료의 영향도 더해지며 감소로 전환

– 건설업(-9.6만명 → -15.7만명)은 건설경기 악화가 지속되며 감소폭이 확대되었고, 제조업(-9.5만명 → -9.7만명)도 부진한 흐름을 이어감.

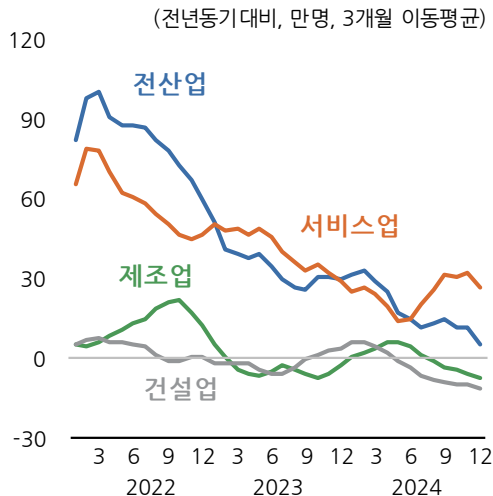

– 서비스업(35.7만명 → 17.5만명)은 내수와 밀접한 도소매업(-8.9만명 → -9.6만명), 숙박·음식점업(2.4만명 → 1.2만명)에서 부진한 흐름을 보인 가운데, 연말 정부일자리 사업 종료로 보건·사회복지(11.3만명 → -0.3만명), 공공행정(5.9만명 → 0.0만명)의 증가폭도 둔화

* 정부일자리 비중이 높은 60세 이상 연령대의 보건·사회복지(11.4만명 → -0.2만명), 공공행정(2.6만명 → -2.0만명)이 감소로 전환

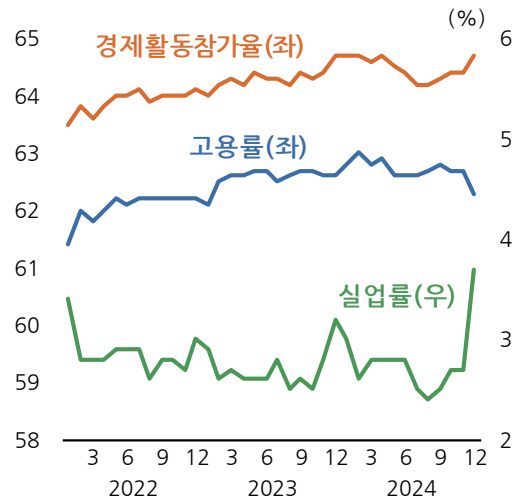

- 정부일자리 사업 종료의 영향을 감안하면, 계절조정 고용률(62.7% → 62.3%)의 급락과 실업률(2.7% → 3.7%)의 급등은 일시적 현상으로 판단됨.

– 정부일자리 사업의 영향을 적게 받는 15~64세 고용률(69.6%)은 전월(69.5%)과 유사한 수준을 지속

주요 산업별 취업자 수 증감

주요 고용지표(계절조정)

■ 최근 환율, 유가 등 변동성이 큰 요인에 주로 기인하여 소비자물가 상승세가 다소 확대되었으나, **미약한 내수가 물가 하방 압력으로 작용**하는 모습

● 1월 소비자물가는 상품과 서비스 가격 모두 상승세가 확대되며 전월(1.9%)보다 높은 2.2%의 상승률을 기록

– 최근 환율과 국제유가의 상승으로 석유류가격(1.0% → 7.3%)이 급등하면서 상품가격(1.8% → 2.2%)도 상승폭이 확대됨.

* 두바이유(달러/배럴): ('24년 11월) 72.6 → (12월) 73.2 → ('25년 1월) 80.4

– 서비스가격(2.1% → 2.3%)도 개인서비스(2.9% → 3.2%)를 중심으로 상승폭이 소폭 확대

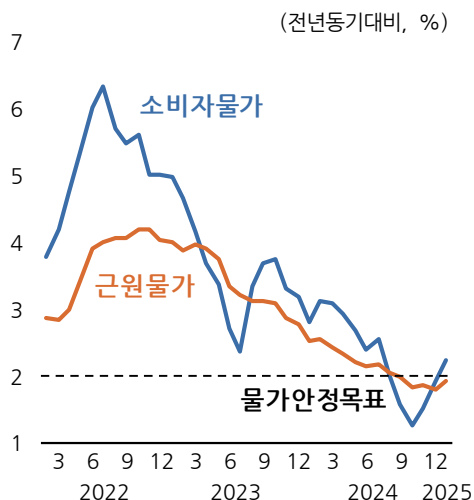

* 다만, 서비스가격의 상승폭 확대는 설 연휴가 작년에 비해 앞당겨지면서 여행 관련 서비스 가격이 조정된 것에 주로 기인한바, 전반적인 수요 확대로 해석하기는 어려움.

● 그러나 수요 압력이 낮게 유지되면서 근원물가는 전월(1.8%)과 유사한 1.9% 상승

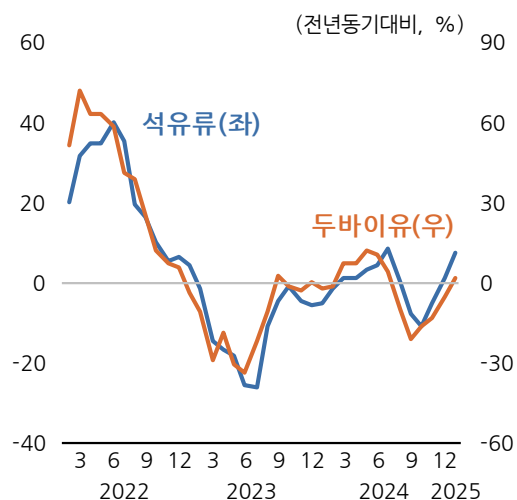

– 민간소비의 부진이 지속되고 있음을 감안할 때, 향후 물가 상승세의 둔화 흐름이 지속될 가능성

– 기대인플레이션(2.9% → 2.8%)도 전월보다 소폭 하락

소비자물가 및 근원물가

석유류 가격 및 국제유가

■ 금융시장은 대내 불확실성의 영향은 축소되었으나, 대외 불확실성이 지속됨에 따라 변동성은 높은 수준을 유지

- 1월 CP스프레드, 신용스프레드, CDS프리미엄이 하락하는 등 단기자금시장은 국내 정국 불안의 부정적 영향이 축소되면서 전월에 비해 안정되는 모습

- CP스프레드(62bp → 35bp), 신용스프레드(69bp → 63bp), CDS프리미엄(37.8bp → 32.9bp)
- 이와 함께 원/달러 환율은 1.3% 하락한 1,452.7원, 종합주가지수는 4.9% 상승한 2,517.4를 기록

- 그러나 미국 신행정부 출범으로 대외 불확실성이 지속되면서 변동성은 높게 유지

- 환율(0.37% → 0.41%), 주가(KOSPI, 1.1% → 0.7%)의 일간 변동폭이 전월에 이어 비교적 높은 수준을 기록

- 한편, 가계대출이 은행권을 중심으로 둔화 추세를 지속한 가운데, 내수 부진으로 국내 은행 연체율(0.48% → 0.52%)은 상승폭이 확대됨.

- 전 금융권 가계대출 증가액(조원): (9월) 5.3 → (10월) 6.5 → (11월) 5.0 → (12월) 2.0

CDS프리미엄

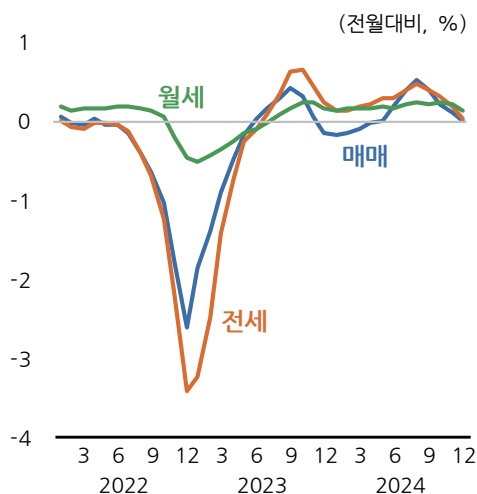

주가 및 환율

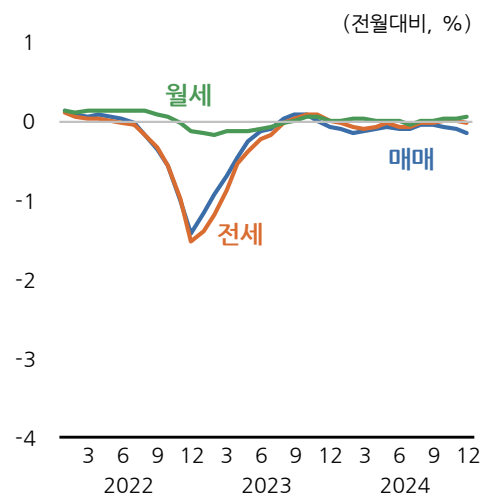

■ 주택매매가격이 하락하고 거래량이 감소하는 등 주택경기 둔화 조짐이 나타남.

- 12월 주택매매시장에서 매매가격(전월대비, 0.01% → -0.07%)이 하락하였으며, 거래량 감소세가 지속되고 미분양주택이 증가하는 등 주택경기 둔화를 시사
 - 주택 매매가격은 수도권(전월대비, 0.11% → 0.00%)에서 보합세에 그쳤으며, 비수도권 (-0.09% → -0.14%)에서는 하락폭이 확대
 - 매매거래는 수도권(2.0만호)과 비수도권(2.6만호) 모두 전월(수도권: 2.2만호, 비수도권: 2.7만호)대비 감소
 - 감소세를 지속하던 미분양주택(6.5만호 → 7.0만호)이 증가로 전환되었고, 준공 후 미분양 주택(1.9만호 → 2.2만호)도 비수도권을 중심으로 크게 증가
- 주택임대시장에서도 전세가격(0.09% → 0.01%)과 월세가격(0.12% → 0.10%) 모두 상승세가 둔화
- 아울러, 주택공급과 관련된 선행지표도 낮은 수준에 머무름.
 - 주택인허가(15.5만호)와 주택착공(6.5만호)이 비교적 큰 폭으로 증가했으나, 연간(주택인허가: 42.8만호, 주택착공: 30.5만호)으로는 최근 3년 평균(주택인허가: 49.9만호, 주택착공: 40.3만호)을 크게 하회하는 수준에 그침.
 - 아파트 분양물량(1.9만호)도 전년동월(2.9만호)대비 감소

수도권의 주택 매매, 전세 및 월세 가격

비수도권의 주택 매매, 전세 및 월세 가격

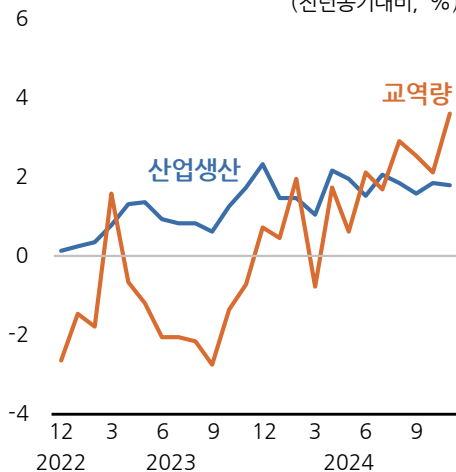

■ 세계경제가 완만한 성장세를 유지하였으나, 글로벌 통상환경 악화 우려는 더욱 확대

- 글로벌 상품교역과 제조업 업황이 개선되었으나, 주요국의 소비심리 위축이 장기간 지속되는 등 경제 불확실성은 여전히 높은 것으로 판단됨.

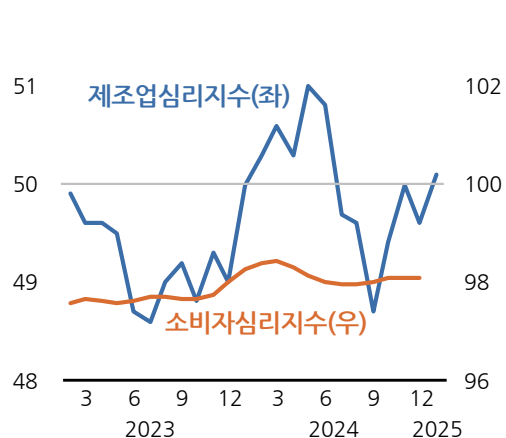

세계 산업생산과 교역량

(전년동기대비, %)

세계 제조업과 G20 소비자 심리지수

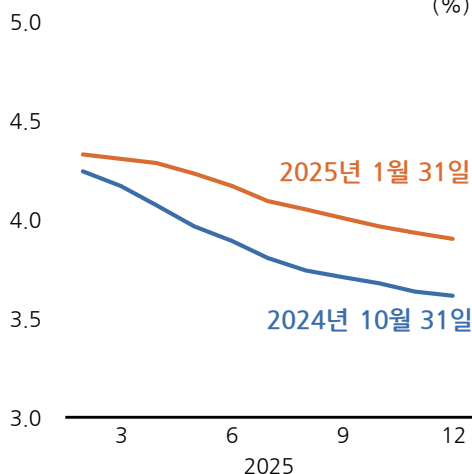

(기준=50) (장기평균=100)

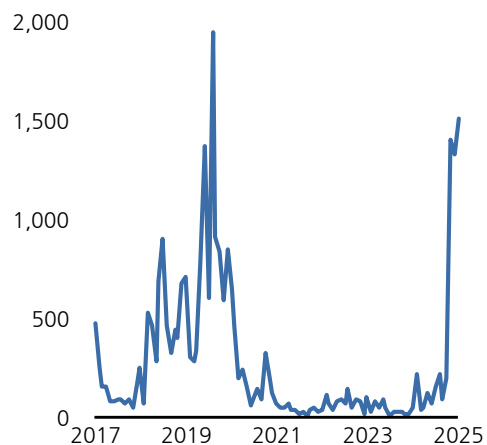

- 이와 함께 최근 들어 미국의 고금리 장기화 전망이 높게 유지되고, 주요국과의 무역 갈등도 격화되는 모습

미국의 기준금리 경로 전망 변화

(%)

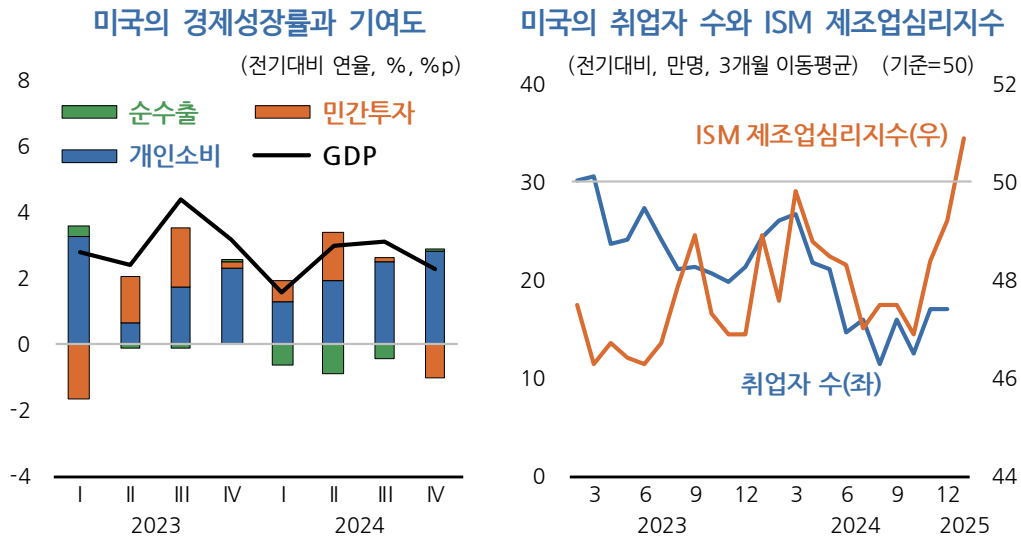

미국의 무역정책 불확실성 지수

자료: Economic Policy Uncertainty.

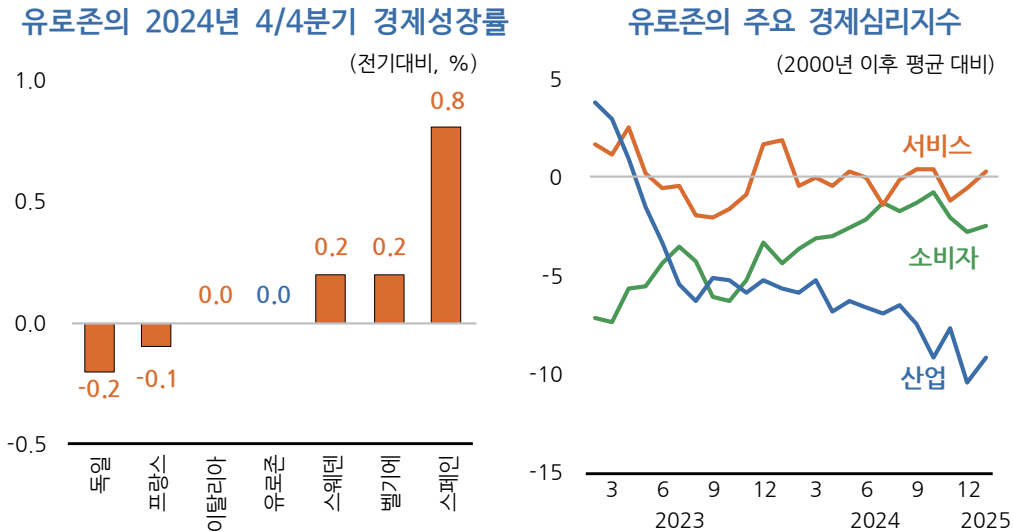

- 미국경제는 무역정책과 통화정책 관련 불확실성이 높게 유지되고 있으나, 민간소비 중심의 양호한 성장 흐름은 지속

- 작년 4/4분기 GDP 증가율(전기대비 연율)이 설비투자과 재고 감소에 기인하여 2.3%로 낮아졌으나, 양호한 고용 여건이 유지되면서 가계소비는 강한 성장세를 나타냄.

- 유로존 경제는 경기 부진이 지속되는 가운데, 제조업 위축과 대외 여건 악화 우려로 2025년 성장률 전망이 하향 조정되는 추세

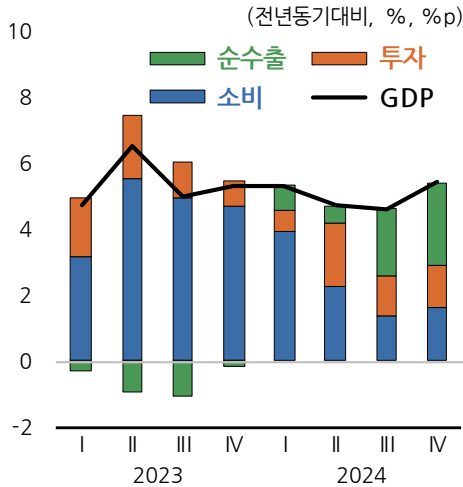

- 독일과 프랑스 등 주요국이 역성장을 기록하면서 작년 4/4분기 유로존의 성장률은 0.0%로 하락하였고, 가계와 기업의 심리지표도 장기간의 부진에서 벗어나지 못하고 있음.

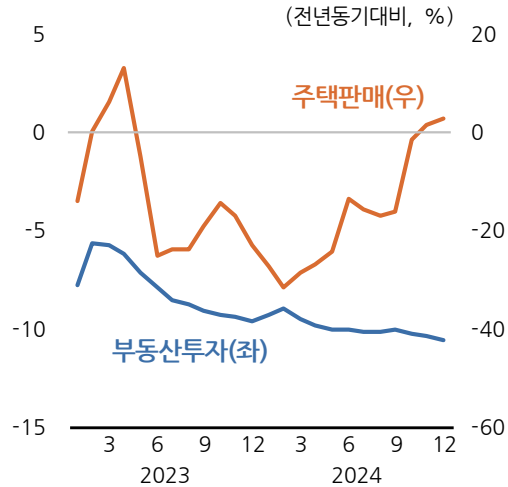

- 중국경제는 소비와 수출 증가로 성장세 둔화 우려가 일부 완화되었으나, 대외 여건 악화와 부동산투자 부진으로 하방 위험은 높은 것으로 평가

- 작년 4/4분기 경제성장률이 5.4%로 확대되고 12월 소매판매와 주택판매가 증가세를 보였으나, 부동산투자 부진 심화와 소비심리 위축 등 부정적 지표도 다수 존재

중국의 경제성장률과 기여도

중국의 부동산투자와 주택판매

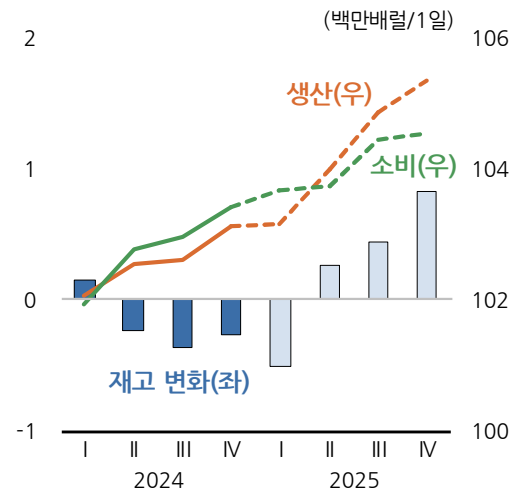

- 주요 원자재가격이 가파른 상승세를 보였으나, 국제유가 등의 에너지는 수급 불안 우려가 완화되면서 1월 중순 이후 급락

- 2025년 유가는 미국의 정책 불확실성과 지정학적 위험 등으로 높은 변동성을 보이겠지만, 공급 증가에 기인하여 작년 대비 하락한 70달러대 초중반으로 전망되고 있음.

국제유가

세계 원유 수요와 공급 전망

주: 2025년 1/4분기 이후는 EIA의 전망치임.

- 주요 기관들은 세계경제가 2025년에 완만한 성장세를 유지할 것으로 전망한 가운데, 글로벌 통상환경 악화가 경기 하방 압력으로 작용할 가능성을 제기

– 미국은 2025년에도 소비 중심의 양호한 성장세를 유지하겠으나, 유로존의 경기 부진은 지속될 전망

2025년 세계 경제성장률 전망(IMF)

(%)

전망 시점	세계	미국	유로존	일본	중국	인도	브라질	러시아
2024년 10월	3.2	2.2	1.2	1.1	4.5	6.5	2.2	1.3
2025년 1월	3.3	2.7	1.0	1.1	4.6	6.5	2.2	1.4

자료: IMF, *World Economic Outlook*, January 2025.

- 미국 AI 기업의 과잉투자 우려로 금융시장의 변동성이 일시적으로 확대되었으나, 물가 상승세 둔화와 무역 협상 가능성으로 1월 중순 이후 달러지수와 장기금리는 하락

– 그러나 2월 들어 미국과 주요국 간 무역분쟁이 격화되면서 주요 금융 지표는 다시 불안정한 흐름을 보임.

Summary and Assessment※

- The Korean economy maintains **modest production growth**, while **downside risks heighten** amid worsening external conditions.
 - While the manufacturing industry shows improvements, particularly in semiconductors and automobiles, overall production growth remains modest due to weaknesses in the construction industry.
 - Domestic demand recovery remains sluggish due to weak consumption and construction investment, while export growth is gradually slowing from its previous strength, particularly in non-semiconductor sectors.
 - Retail sales and the value of construction completed continue to decline, while household and business sentiment indicators remain at low levels.
 - Despite strong growth in semiconductors, exports are showing signs of slowdown mainly in other sectors.
 - As political uncertainty persists, rising external uncertainties are heightening downside risks to the economy.
 - Concerns are growing over contracting trade conditions as tensions, led by the U.S., intensify.

※ All growth figures are on a year-on-year basis unless otherwise noted. This document is an English translation of the original Korean version; the Korean version takes precedence in case of any ambiguities or discrepancies.

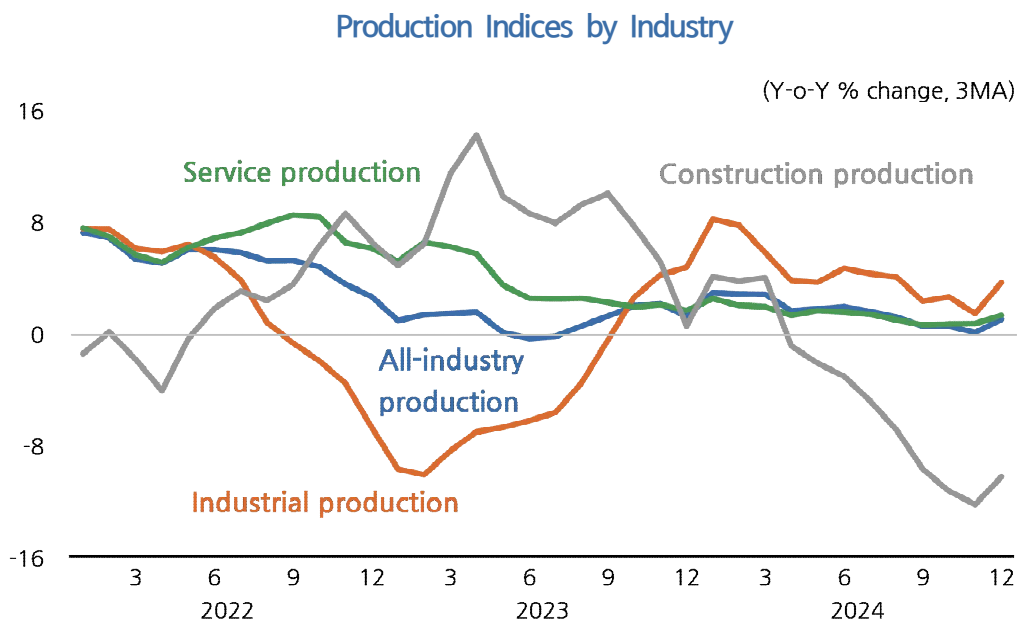

■ **Production growth remains modest** due to weakness in the construction industry, while growing concerns over **worsening international trade conditions add downward pressure on economic activity.**

- December's all-industry production ($-0.3\% \rightarrow 1.4\%$) showed only modest growth despite increased working days ($-0.5 \text{ day} \rightarrow +0.5 \text{ day}$) and improved industrial production, primarily due to sluggishness in the construction industry.

- Industrial production ($0.1\% \rightarrow 5.3\%$) expanded further as semiconductors ($11.7\% \rightarrow 13.9\%$) sustained high growth and automobiles ($-6.7\% \rightarrow 2.1\%$) rebounded following the resolution of parts suppliers' strikes.
- Services production ($0.9\% \rightarrow 1.2\%$) also increased slightly, led by transportation and storage ($8.7\% \rightarrow 9.0\%$) and professional, scientific, and technical activities ($-1.1\% \rightarrow 1.2\%$).
- However, construction production ($-12.5\% \rightarrow -8.3\%$) declined sharply, underscoring persistent weakness.

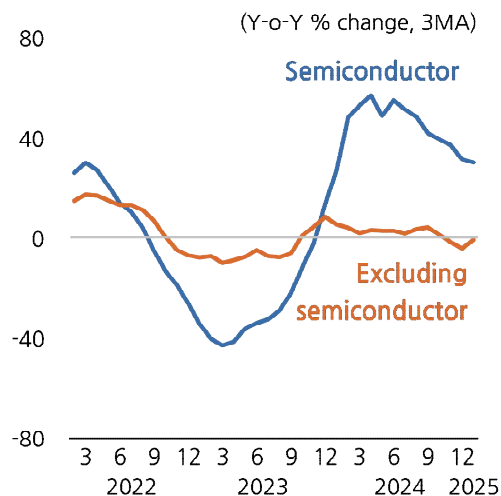

- Manufacturing-related indicators improved compared to the previous month, as shown in the inventory-to-shipment ratio falling ($113.6\% \rightarrow 101.2\%$) and the average capacity utilization rate rising ($71.6\% \rightarrow 73.5\%$).

- On a seasonally adjusted month-on-month basis, shipments increased for both the domestic market (4.0%) and exports (13.0%).

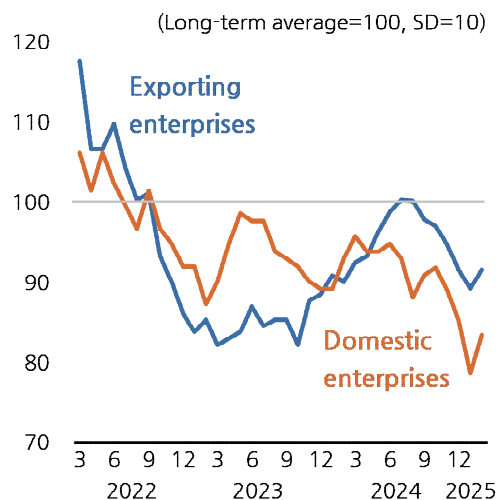

- While semiconductors continue to drive production growth with strong momentum, domestic demand remains weak, weighed down by sluggish construction investment.
 - Although semiconductor production maintains high growth rates and related equipment investment has improved, retail sales and construction investment remain subdued.
- As political uncertainty persists, concerns over deteriorating international trade conditions are heightening downside economic risks.
 - Household and business sentiment indicators, which plunged amid political turmoil in December, remained subdued throughout January.
 - Export growth is slowing across sectors except semiconductors, while concerns over a worsening trade environment deepen as trade disputes escalate, particularly involving the U.S.

Daily Average Exports by Category

BSI Future Tendency of Manufacturing

■ Amid persistent high interest rates, **consumption remains weak** as household sentiment continues to be dampened by political uncertainty.

● The weakness in goods consumption appears prolonged, as indicated by retail sales declining further across most categories.

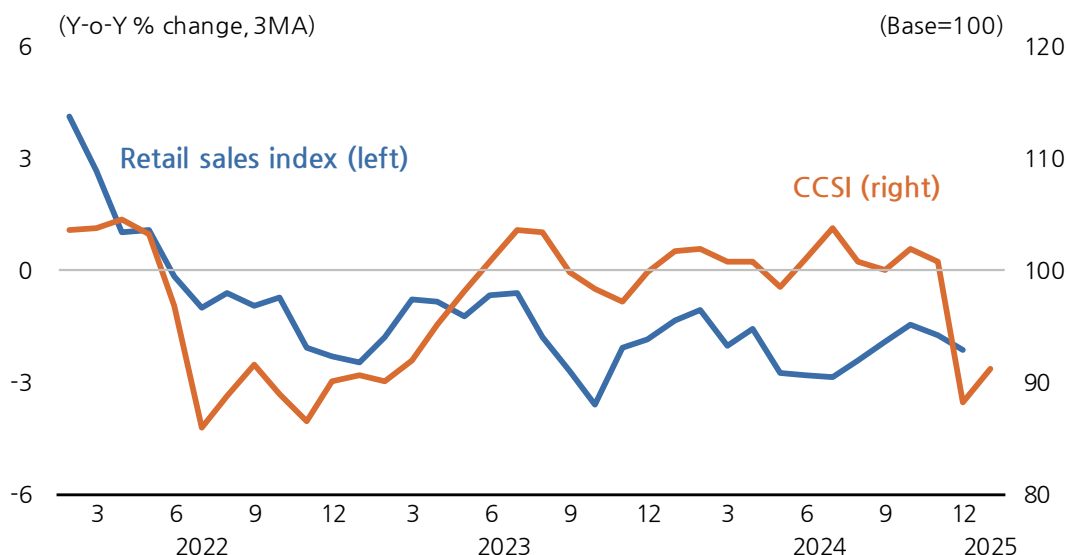

– December retail sales (-2.2% → -3.3%) declined, led by passenger cars (-11.5%), household electrical appliances (-7.5%), apparel (-1.3%), and vehicle fuel (-5.0%), with a seasonally adjusted month-on-month decrease of 0.6%.

● Service consumption also remains sluggish, as declines have widened across major industries.

– Weakened consumer sentiment, exacerbated by political turmoil and passenger aircraft incidents, led to significant declines in service sectors closely linked to consumer spending, including accommodation and food services (-2.8%) and arts, sports, and recreation-related services (-8.7%).

● Additionally, the January CCSI remained well below the baseline (100) at 91.2, extending the previous month's decline (88.2), underscoring the ongoing contraction in consumer sentiment.

Retail Sales Index and Composite Consumer Sentiment Index (CCSI)

■ **Equipment investment continues its pace of recovery** as semiconductor-related investment sustains favorable momentum.

- December equipment investment (2.7% → 13.1%) accelerated as machinery maintained strong growth led by semiconductors, while transport equipment also posted sharp gains.

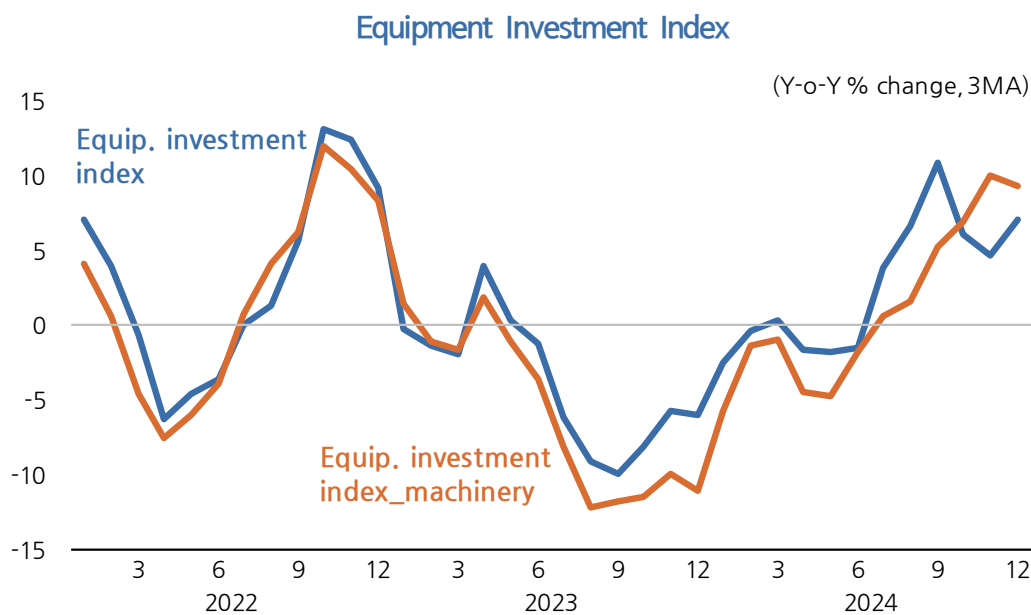

- Machinery remained on an upward trend (9.5% → 8.5%), as general industrial machinery (-11.4% → -6.6%) and electrical and electronic devices (-4.5% → -3.0%) showed weakness, but semiconductor manufacturing equipment (62.1% → 27.2%) and precision instruments (7.7% → 27.3%) posted strong gains.

- Transport equipment (-13.9% → 27.8%) recorded sharp growth, mainly driven by highly volatile components such as vessels and aircraft (-14.2% → 70.0%).

- Leading indicators point to sustained improvement in semiconductor-related equipment investment.

- Semiconductor-related leading indicators maintained positive momentum, as shown by orders received for special industrial machinery rising (5.3% → 10.4%) and January's semiconductor equipment imports (42.6% → 6.5%) continuing to expand.

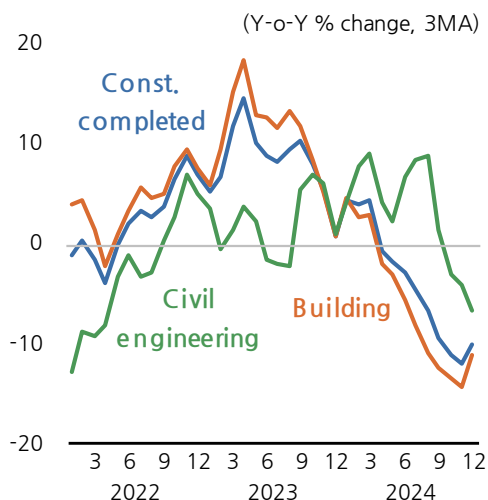

- However, investment in other sectors remains subdued, as indicated by declining domestic orders received for general industrial machinery (-23.2%) and electrical machinery (-16.7%).

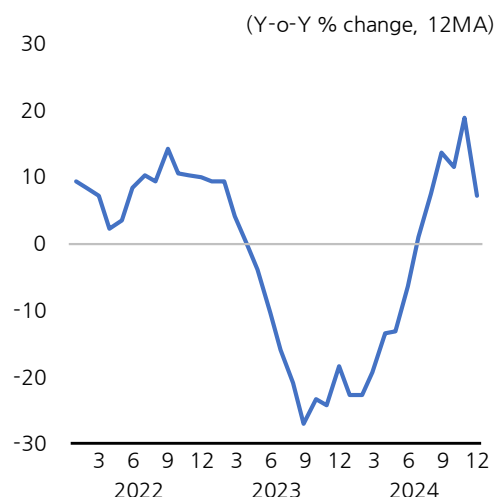

■ **Construction investment remains weak** as the value of construction completed continues to decline significantly.

- December value of construction completed (-12.5% → -8.3%) remained sluggish, continuing its overall decline.
 - The building construction sector (-16.1% → -6.8%) continued to contract in both residential and non-residential construction, while the civil engineering sector (-0.4% → -11.4%) saw an accelerated decline.
- While the housing market has recently shown signs of weakness, leading indicators, notably construction orders received, have maintained their improving trend.
 - Amid the recent housing market slowdown, the floor area of construction starts in Q4 shifted to a decline (21.5% → -8.9%).
 - In contrast, construction orders received in 2024 increased by 7.2% year-on-year, suggesting a recovery from severe weakness.

Construction Completed (Constant)

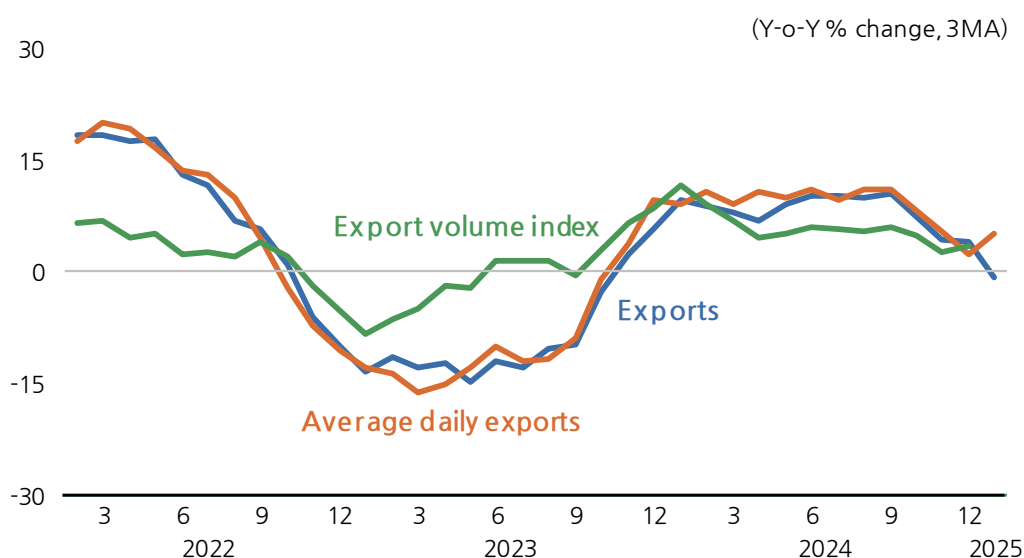

Construction Orders Received

■ **Export growth is moderating** despite strong ICT products, with growth slowing across other sectors.

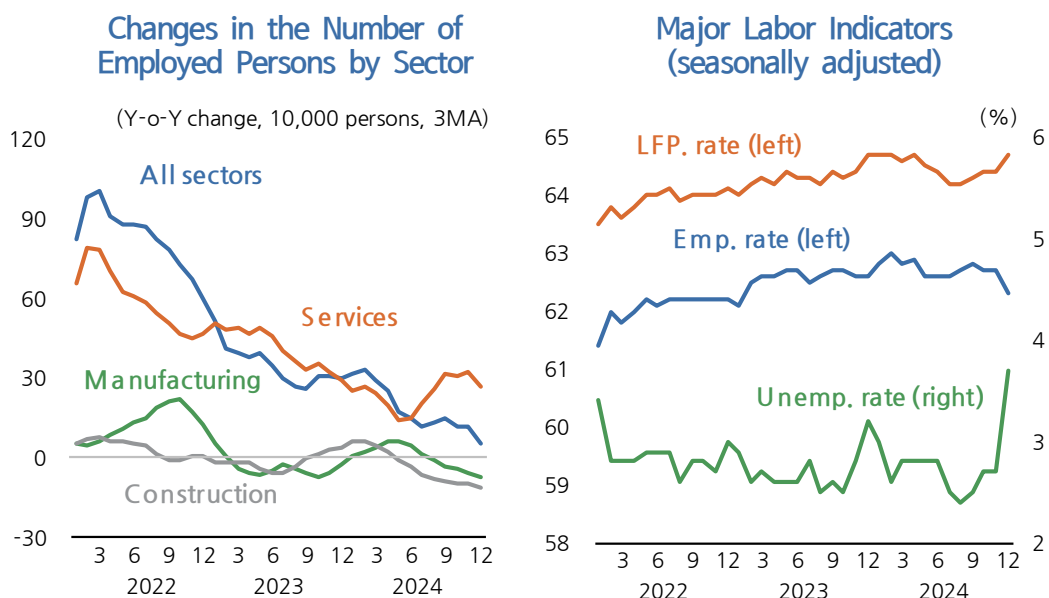

- January exports (6.6% → -10.3%) declined, mainly due to reduced working days (+0.5 day → -4.0 days), but maintained a modest increase on an average daily basis, rising 7.7% following the previous month's growth (4.3%).
 - By item, on an average daily basis, ICT products (27.8% → 25.0%) sustained high growth, while general machinery (-6.0%) and petroleum products (-15.8%) contracted amid slowing global demand.
 - * Average daily export value, excluding ICT (% , 3MA): (Nov. 2024) -2.8 → (Dec.) -5.1 → (Jan. 2025) -1.7
 - Real goods exports in national accounts for 2024 also underwent a gradual adjustment, with Q4 growth limited to 2.5%.
 - * Real goods exports (%): (Q2 2024) 8.7 → (Q3) 6.3 → (Q4) 2.5
- Imports shifted to a decline (3.3% → -6.4%), with contractions in both energy resources (-18.2% → -12.3%) and non-energy items (12.2% → -4.0%).
- The trade balance (-\$1.89 billion) posted a temporary deficit due to reduced working days and seasonal factors.
- Meanwhile, global trade tensions are intensifying, centered around the U.S., adding pressure to the export environment.

Exports, Average Daily Exports and Export Volume Index

■ Employment growth continues to slow as domestic demand remains weak.

- The number of employed persons in December turned negative (123,000 → -52,000), reflecting continued weakness in the construction and manufacturing sectors, alongside the impact of expiring government job programs.
 - The construction industry (-96,000 → -157,000) saw an accelerated decline amid the ongoing downturn in the construction market, while manufacturing (-95,000 → -97,000) remained weak.
 - The service industry (357,000 → 175,000) exhibited contraction in businesses closely tied to domestic spending, such as wholesale and retail trade (-89,000 → -96,000) and accommodation and food services (24,000 → 12,000), while growth also moderated in human health and social work activities (113,000 → -3,000) and public administration (59,000 → less than 1,000) due to the year-end completion of government job programs.
 - * Human health and social work activities (114,000 → -2,000) and public administration (26,000 → -20,000) saw a turnaround to a decline among those aged 60 and above, a group with high participation in government job programs.
- The sharp drop in the seasonally adjusted employment rate (62.7% → 62.3%) and spike in the unemployment rate (2.7% → 3.7%) appear to be temporary effects of expiring government job programs.
 - The employment rate for those aged 15-64 (69.6%), who are less affected by government programs, remained largely stable from the previous month (69.5%).

■ While consumer price inflation has edged up recently, largely due to volatile factors such as exchange rates and oil prices, **weak domestic demand is weighing on prices.**

● January consumer prices recorded a 2.2% increase, up from the previous month (1.9%), with both goods and services prices rising further.

– Petroleum product prices (1.0% → 7.3%) surged due to recent increases in exchange rates and international oil prices, contributing to higher goods prices (1.8% → 2.2%).

* Dubai crude oil (\$/barrel): (Nov. 2024) 72.6 → (Dec.) 73.2 → (Jan. 2025) 80.4

– Service prices rose modestly (2.1% → 2.3%), led by personal services (2.9% → 3.2%).

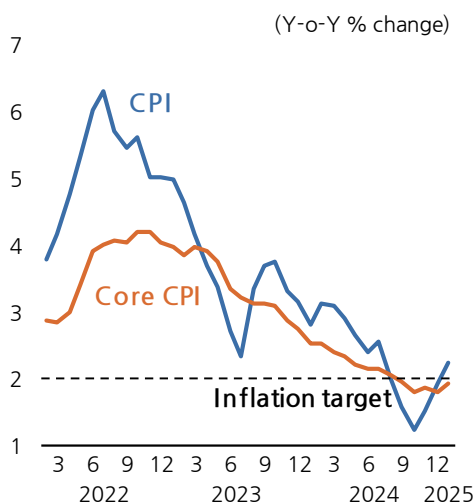

* However, the larger increase in service prices was largely driven by seasonal adjustments in travel-related services due to the earlier Lunar New Year holiday and does not necessarily signal a broad-based rise in demand.

● Core inflation remained stable at 1.9%, edging up slightly from the previous month (1.8%), as demand-side pressures remain muted.

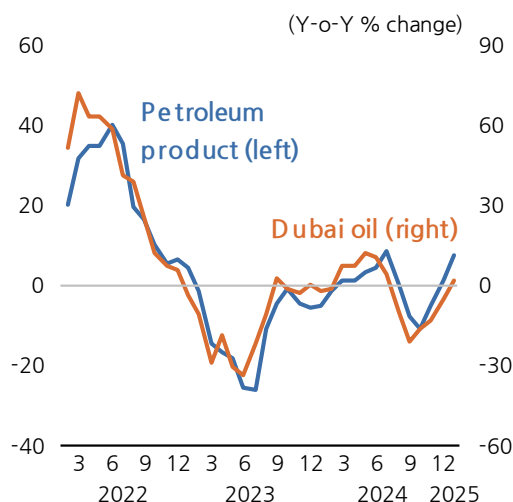

– Given the persistent weakness in private consumption, the underlying inflation trend is expected to remain subdued.

– Inflation expectations (2.9% → 2.8%) also edged down from the previous month.

CPI and Core CPI

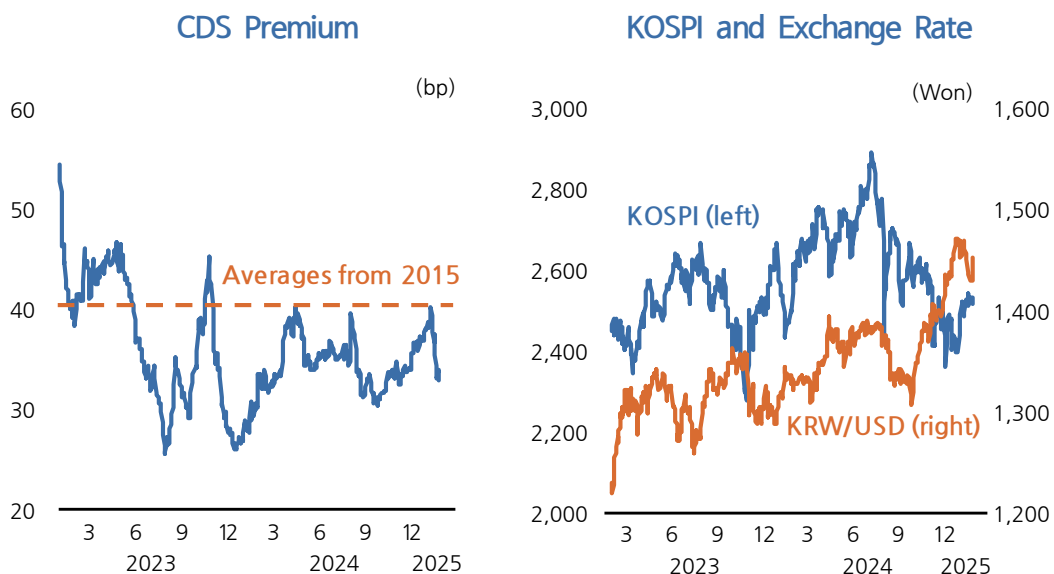

Petroleum Product Prices and International Oil Prices

■ **Financial markets saw a reduced impact of domestic uncertainties, but volatility remained high amid persistent external uncertainties.**

- As the negative impact of domestic political uncertainty moderated, the short-term money market edged toward stability in January compared to the previous month, as reflected in lower CP spreads, credit spreads, and CDS premiums.
 - CP spreads (62bp → 35bp), credit spreads (69bp → 63bp), CDS premiums (37.8bp → 32.9bp).
 - The exchange rate fell 1.3% to 1,452.7 won per dollar, and the KOSPI rose 4.9% to 2,517.4.
- However, volatility remained high as external uncertainties persisted with the inauguration of the new U.S. administration.
 - Daily volatility in exchange rates (0.37% → 0.41%) and stock prices (KOSPI: 1.1% → 0.7%) remained relatively high, continuing from the previous month.
- Meanwhile, household lending continued to slow, particularly in the banking sector, while bank delinquency rates edged up (0.48% → 0.52%) amid weak domestic demand.
 - Total household loan growth across all financial sectors (trillion won): (Sept.) 5.3 → (Oct.) 6.5 → (Nov.) 5.0 → (Dec.) 2.0

■ The housing market shows signs of a slowdown, as reflected in falling sales prices and declining transactions.

● In December, the housing market exhibited declining sales prices (month-on-month, 0.01% → -0.07%), continued transaction decreases, and rising inventory of unsold pre-sale units, indicating market weakness.

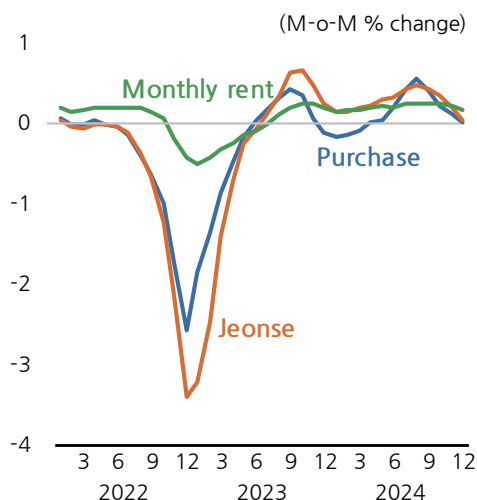

- Housing prices in the capital area remained flat (month-on-month, 0.11% → 0.00%), while the decline in non-capital areas deepened (-0.09% → -0.14%).
- Sales transactions fell in both the capital area (20,000 units) and non-capital areas (26,000 units) from the previous month (capital: 22,000 units, non-capital: 27,000 units).
- The inventory of unsold pre-sale units (65,000 → 70,000) turned upward, while unsold post-completion units (19,000 → 22,000) rose sharply, particularly in non-capital areas.

● The housing rental market also experienced a slowdown in price increases for both jeonse (0.09% → 0.01%) and monthly rental prices (0.12% → 0.10%).

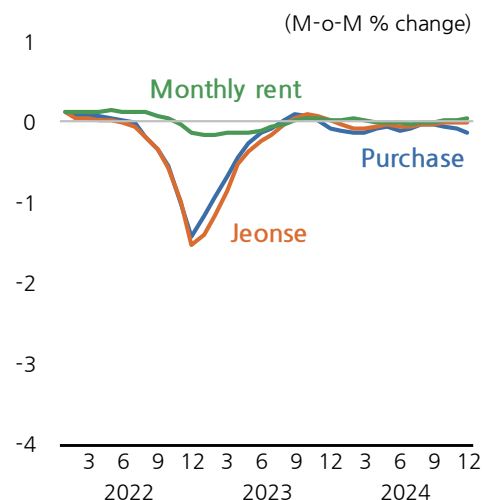

● Meanwhile, leading indicators related to housing supply remain weak.

- Despite significant increases in housing permits (155,000 units) and housing starts (65,000 units), annual figures (permits: 428,000 units, starts: 305,000 units) stayed well below the three-year averages (permits: 499,000 units, starts: 403,000 units).
- Pre-sale apartment volume (19,000 units) also fell compared to the previous year (29,000 units).

Housing and Rent Prices (Capital)

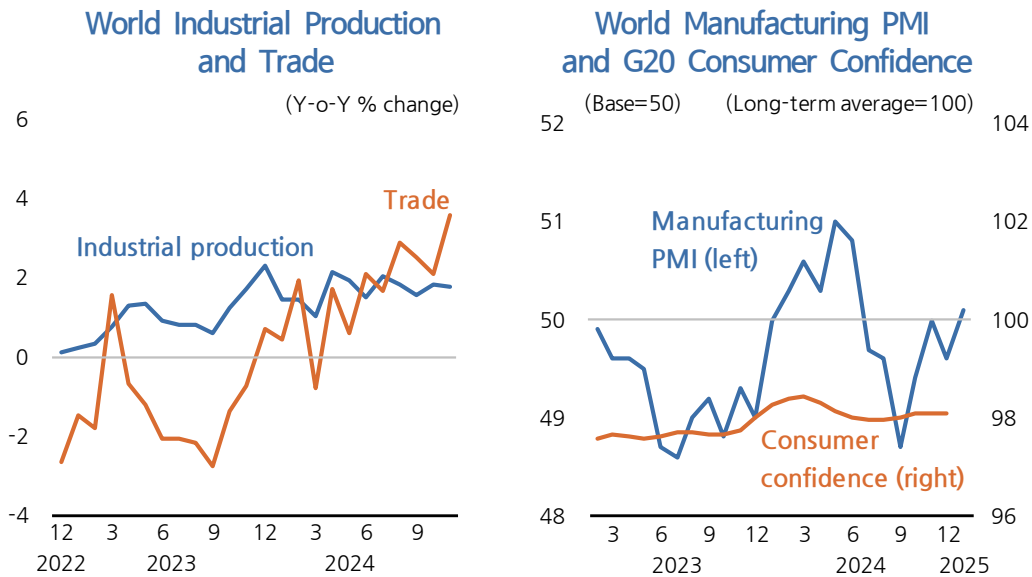

Housing and Rent Prices (Non-Capital)

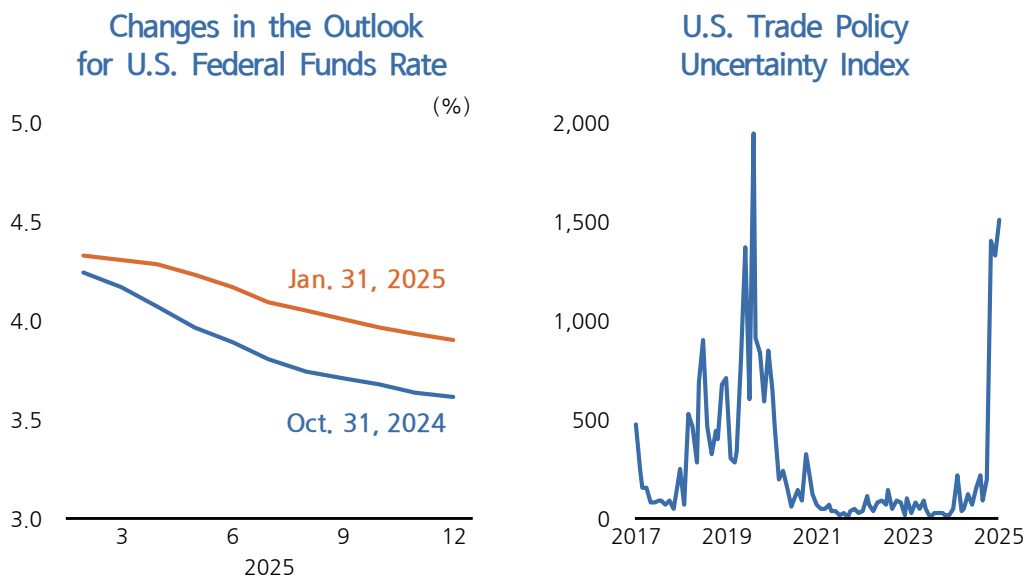

■ The global economy maintained modest growth, but concerns over deteriorating global trade conditions have intensified.

- While global goods trade and manufacturing business conditions showed improvement, economic uncertainty remains elevated, as reflected in the sustained weakness in consumer sentiment across major economies.

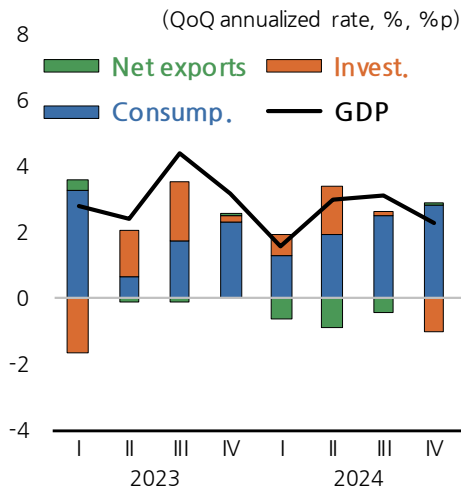

- Moreover, expectations for prolonged high interest rates in the U.S. continue, while trade tensions with major countries are escalating.

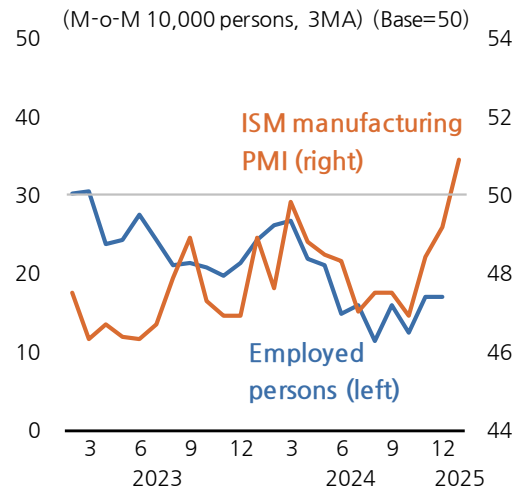

Source: Economic Policy Uncertainty.

- The U.S. economy maintains strong growth momentum, driven by private consumption, despite persistent uncertainty over trade and monetary policy.
 - Although Q4 GDP growth (annualized quarter-on-quarter) moderated to 2.3% due to declines in equipment investment and inventory, household consumption remained robust amid sustained favorable employment conditions.

U.S. GDP Growth Rate and Degree of Contribution by Sector

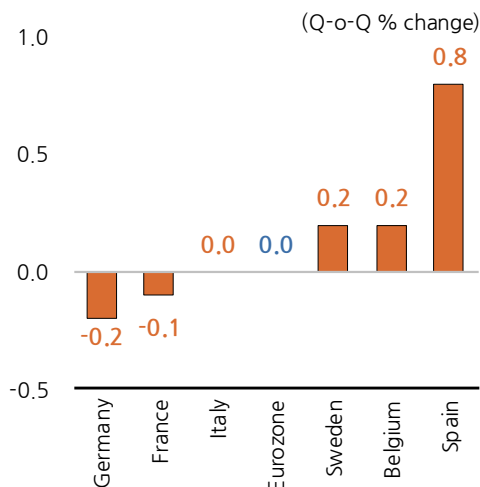

U.S. Employment and ISM Manufacturing PMI

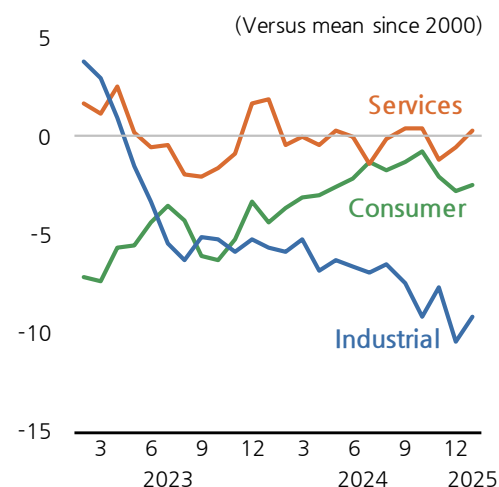

- The Eurozone economy remains weak, as manufacturing contraction and concerns over worsening external conditions have led to downward revisions in 2025 growth forecasts.

- Economic growth fell to 0.0% in Q4 last year, with major economies such as Germany and France registering negative growth, while household and business sentiment indicators remain mired in prolonged weakness.

Eurozone GDP Growth Rate for Q4 2024

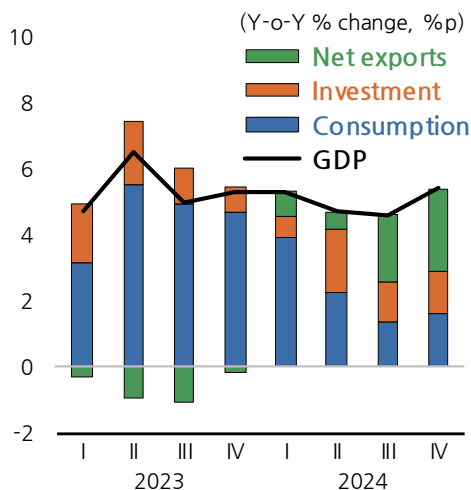

Economic Sentiment Indicators in Eurozone

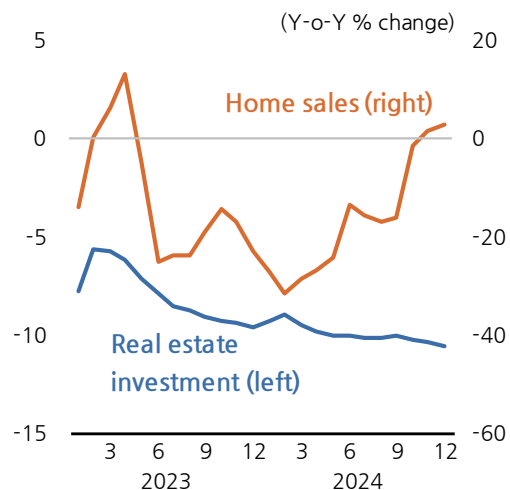

- While concerns over China's economic growth slowdown have somewhat moderated with gains in consumption and exports, significant downside risks persist given deteriorating external conditions and weak real estate investment.

- Although Q4 growth accelerated to 5.4% and December retail sales and housing sales showed improvement, several downside factors persist, including a deepening slump in real estate investment and subdued consumer sentiment.

China's GDP Growth Rate and Degree of Contribution by Sector

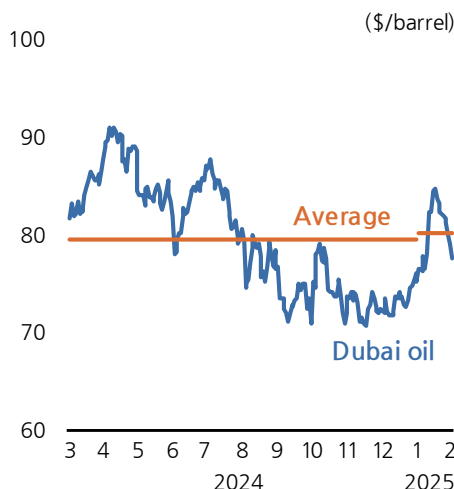

China's Real Estate Investment and Home Sales

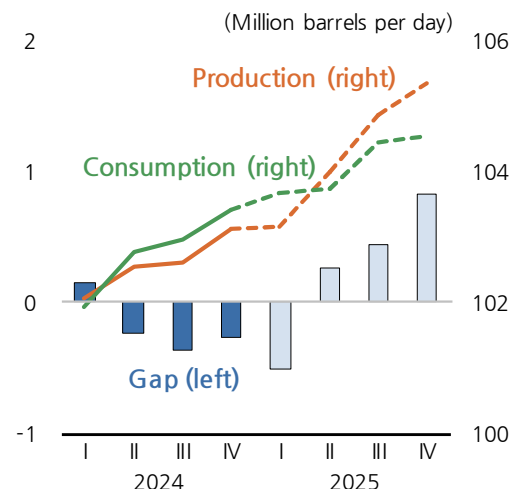

- Major commodity prices rose sharply, but energy prices, including international oil prices, plummeted after mid-January as supply concerns eased.

- Oil prices in 2025 are projected to exhibit high volatility due to U.S. policy uncertainty and geopolitical risks but are expected to decline from last year, averaging in the low- to mid-\$70 range amid increasing supply.

Oil Price

World Liquid Fuels Production and Consumption

Note: Forecasts after Q1 2025 are from EIA.

- Major institutions project the global economy to sustain modest growth in 2025, though downside risks to economic activity persist due to worsening global trade conditions.
 - The U.S. economy is expected to maintain solid growth in 2025, supported by consumption, while the Eurozone is likely to remain under pressure from weak economic conditions.

Source: IMF, *World Economic Outlook*, January 2025.

- Financial market volatility temporarily increased due to concerns over excessive investment by U.S. AI companies, but the dollar index and long-term interest rates declined after mid-January amid slowing inflation and the possibility of trade negotiations.
 - However, entering February, major financial indicators turned volatile again amid intensifying trade disputes between the U.S. and major economies.
