주: 실업률은 계절조정 기준(연간 제외)이며 국고채 수익률 · 종합주가지수 · 원/달러 환율은 기말 기준, 유가(두바이)는 기간평균 기준, 주택가격은 전기대비 증가율 기준임.

요약 및 평가※

■ 최근 우리 경제는 건설업 부진과 수출 여건 악화로 경기 하방 위험이 확대되는 모습

- 제조업생산은 반도체를 중심으로 개선세를 유지
 - 설 연휴와 임시공휴일로 조업일수가 축소되면서 제조업생산이 감소하였으나, 조업일수의 영향이 조정된 제조업 평균가동률은 상승세를 이어감.
- 그러나 건설투자의 부진이 지속되는 가운데, 수출 증가세도 축소되는 모습
 - 건설투자 및 건설업 고용의 부진이 지속되고 선행지표의 개선세도 약화
 - 주요 수출 품목인 반도체 수출가격이 하락하는 가운데, 대외 불확실성 확대의 영향이 점차 파급되며 수출이 낮은 증가세에 그침.
- 정국 불안의 영향은 완화되고 있으나, 대외 여건이 악화되며 경기 하방 위험이 높아짐.
 - 가계와 기업의 심리지표는 작년 말 정국 불안의 충격에서 점차 벗어나는 모습이나, 미국을 중심으로 통상 갈등이 심화되며 세계무역 위축에 대한 우려 확대

※ 별도의 언급이 없을 경우 모든 증가율은 전년동월대비 기준임.

■ 건설업을 중심으로 생산 증가세가 완만해지는 가운데, 수출 증가세도 축소되는 등 경기 하방 위험이 지속

● 1월 전산업생산(0.6% → -3.5%)은 건설업 부진이 지속된 가운데, 설 연휴와 임시공휴일로 조업일수(+0.5일 → -4.0일)가 축소됨에 따라 감소

- 광공업생산(4.4% → -4.1%)은 반도체(13.6% → 20.8%)의 높은 증가세에도 불구하고 전자부품(13.6% → -1.6%), 기계장비(0.3% → -7.5%) 등을 중심으로 일시적 감소를 기록
- 서비스업생산(0.3% → -0.9%)은 도소매업(-1.3% → -5.4%), 교육서비스업(-0.3% → -1.7%)의 감소폭이 확대된 가운데, 운수·창고업(7.7% → 2.9%)의 증가세도 축소되며 둔화
- 부진이 지속되고 있는 건설업생산(-7.4% → -27.3%)은 작년 1월 마무리공사 집중으로 생산이 급등한 데 따른 기저효과도 작용하면서 감소폭이 크게 확대

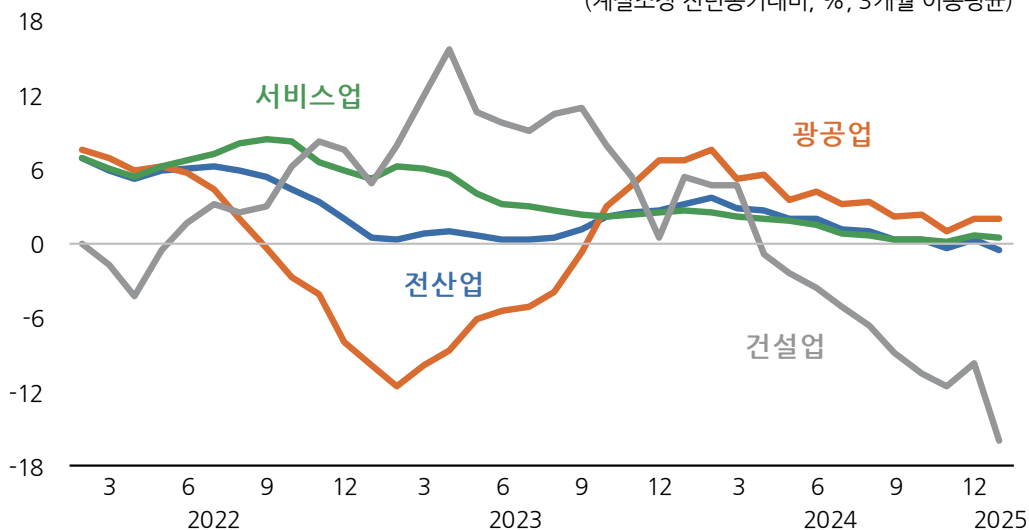

* 조업일수 영향이 보정된 계절조정 시계열의 전년동월대비 증가율을 보면, 건설업(-26.8%)과 서비스업(0.4%)은 부진하나, 광공업(3.6%)은 비교적 양호한 증가세를 보임.

● 재고율(105.8% → 110.1%)이 일시적 요인으로 상승하였으나, 평균가동률(73.3% → 73.8%)은 상승세를 지속하는 등 제조업경기는 전월의 개선세를 유지한 것으로 판단

- 제조업 출하(계절조정 전월대비, -6.2%)는 조업일수 감소와 반도체의 분기 초 출하 감소 경향이 반영되며 감소하였으나, 조업일수의 영향이 조정된 평균가동률은 전월에 이어 상승

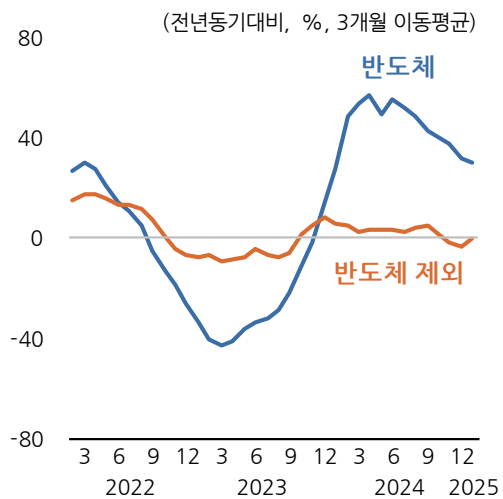

산업별 생산지수

(계절조정 전년동기대비, %, 3개월 이동평균)

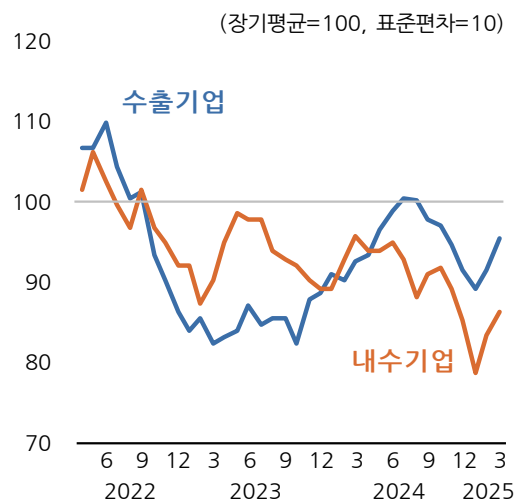

- 내수가 미약한 수준에 머무른 가운데, 대외 수요의 증가세도 점차 축소되는 모습
 - 소비와 건설투자의 부진이 이어진 가운데, 최근 부동산경기 하락으로 선행지표 개선세도 약화
 - 반도체 수출의 높았던 증가세가 점차 둔화되는 가운데, 이를 제외한 품목의 부진이 지속되며 수출 증가세가 낮은 수준에 그침.
- 정국 불안의 영향은 점차 완화되고 있으나, 국제 통상환경 악화에 대한 우려는 더욱 확대
 - 가계와 기업의 심리지표는 여전히 낮은 수준이지만, 작년 말의 급락에서는 점차 회복되는 모습
 - 반면, 미국과 여타 국가 간 통상 갈등이 심화되면서 향후 세계교역 위축 가능성이 확대

품목별 일평균 수출

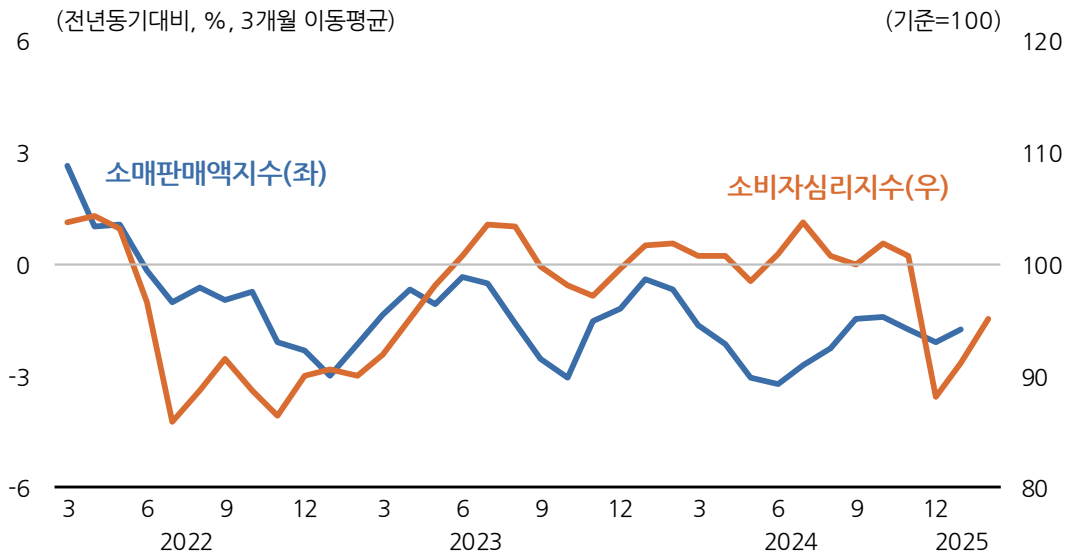

제조업 업황BSI 전망

■ 소비 부진이 지속되고 있으나, 소비심리 위축은 일부 완화되는 모습

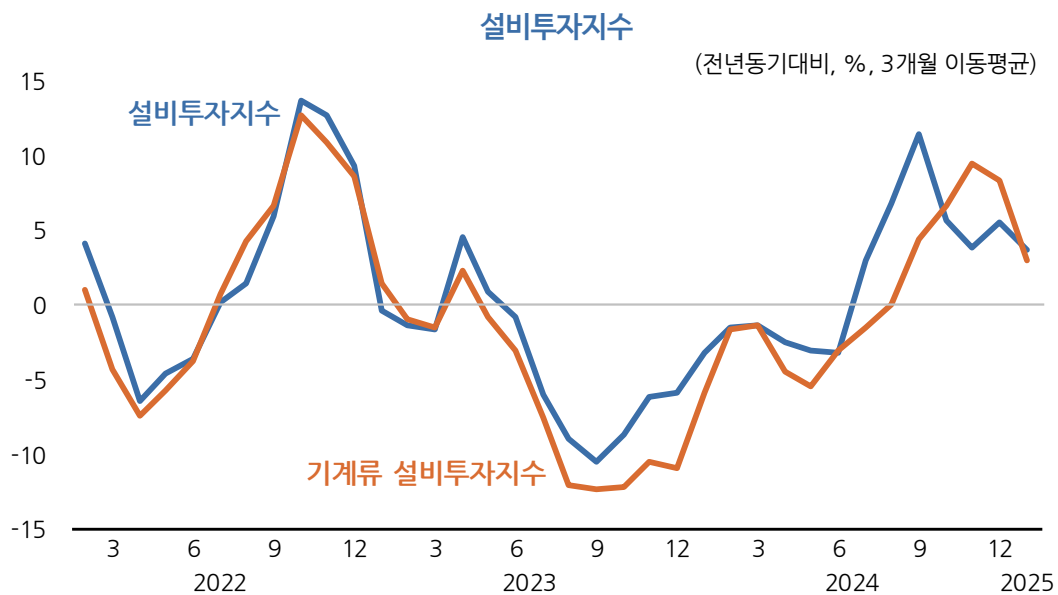

- 1월 소매판매(-2.5% → 0.0%)가 설 명절 등의 일시적 요인으로 보합세를 보였으나, 고금리 기조 및 소비심리 위축 등으로 여전히 부진한 흐름을 지속
 - 설 명절의 영향으로 음식료품(13.0%)이 일시적으로 높은 증가세를 보인 반면, 조업일수 감소 등으로 통신기기·컴퓨터(-23.4%), 가전제품(-11.9%) 등 내구재(-10.7%)는 대폭 감소
 - 계절조정 전월대비로도 0.6% 감소하면서 상품소비의 부진을 시사
- 서비스소비도 설 명절 등의 영향으로 숙박·음식점업 등 주요 업종에서 감소
 - 숙박·음식점업(-3.3%), 교육서비스업(-1.7%), 예술·스포츠·여가서비스업(-0.4%) 등 소비와 밀접한 주요 서비스업의 생산이 감소세를 지속
- 한편, 2월 소비자심리지수가 여전히 기준치(100)를 하회하고 있으나, 전월(91.2)보다 높은 95.2를 기록하며 소비심리 위축이 점진적으로 완화되고 있음을 시사

소매판매액지수 및 소비자심리지수

■ 설비투자는 반도체 중심의 회복세를 지속하였으나, 대외 불확실성에 따른 하방 위험이 확대되는 모습

- 1월 설비투자(10.5% → -3.1%)는 조업일수 축소 등 일시적 요인으로 감소하였으나, 선행지표를 감안하면 여전히 양호한 흐름을 유지하고 있는 것으로 판단됨.
 - 운송장비(18.9% → 14.2%)가 높은 증가세를 지속하였으나, 기계류(7.5% → -7.9%)는 반도체제조용장비(31.6% → -2.9%)를 중심으로 감소
 - 다만, 선행지표인 2월 기계류 수입액(0.9% → 15.9%)이 반도체제조용장비(2.0% → 33.5%)를 중심으로 크게 증가한 것을 감안할 때, 1월의 설비투자 감소는 일시적인 것으로 판단됨.
- 다만, 통상 갈등에 따른 대외 불확실성 확대로 향후 설비투자 여건이 제약될 가능성
 - 대외 불확실성 확대의 영향이 수출에 파급되면서 국내 투자에도 하방 요인으로 작용할 가능성

■ 건설기성의 감소세가 확대된 가운데, 선행지표의 개선세도 약화되며 건설투자의 부진이 심화

- 1월 건설기성(-7.4% → -27.3%)은 건축과 토목 모두에서 감소세가 확대되며 부진한 흐름을 지속

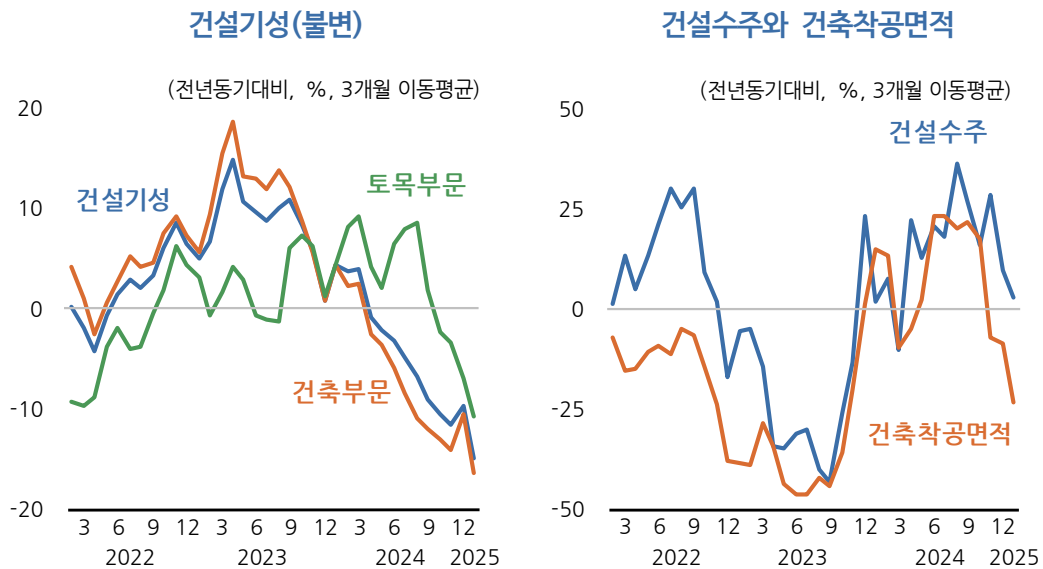

– 건설기성이 대폭 감소한 데에는 기저효과(전년동월: 17.2%)도 일부 작용하였으나, 계절조정 전월대비로도 6개월 연속 감소하며 건설경기의 부진을 나타냄.

* 건설기성(계절조정 전월대비, %): ('24년 11월) -3.1 → (12월) -1.9 → ('25년 1월) -4.3

– 건축부문(-5.1% → -29.2%)과 토목부문(-12.1% → -20.1%) 모두 감소폭이 확대

- 이와 함께 부동산경기가 둔화되며 선행지표의 개선세가 약화되는 모습

– 건축착공면적(-32.6%)의 감소세가 지속된 가운데, 건설수주(-25.1%)도 전월에 이어 비교적 크게 감소

■ 수출은 ICT 품목의 높았던 증가세가 조정되는 가운데, 이를 제외한 품목들의 감소세가 지속되며 둔화되는 모습

- 2월 수출(-10.2% → 1.0%)은 소폭 증가하였으나, 일평균 기준으로는 전월(7.7%)보다 낮은 -5.9%의 증가율을 기록

- 품목별로는 일평균 기준으로 ICT 품목(-5.1%)이 범용 반도체 부진에 주로 기인하여 감소한 가운데, 글로벌 수요 둔화로 ICT 제외 수출액(-6.2%)도 감소하는 모습

* 범용 반도체의 부진은 가격 하락(DDR4 8GB: -25.0%, NAND 128GB: -53.1%)에 주로 기인함.

- 국가별로는 일평균 기준으로 범용 반도체 비중이 높은 對중국 수출(-8.2%)이 감소하였고, 對미국 수출(-5.9%)도 통상정책 불확실성의 확대로 일반기계(-24.6%)를 중심으로 감소

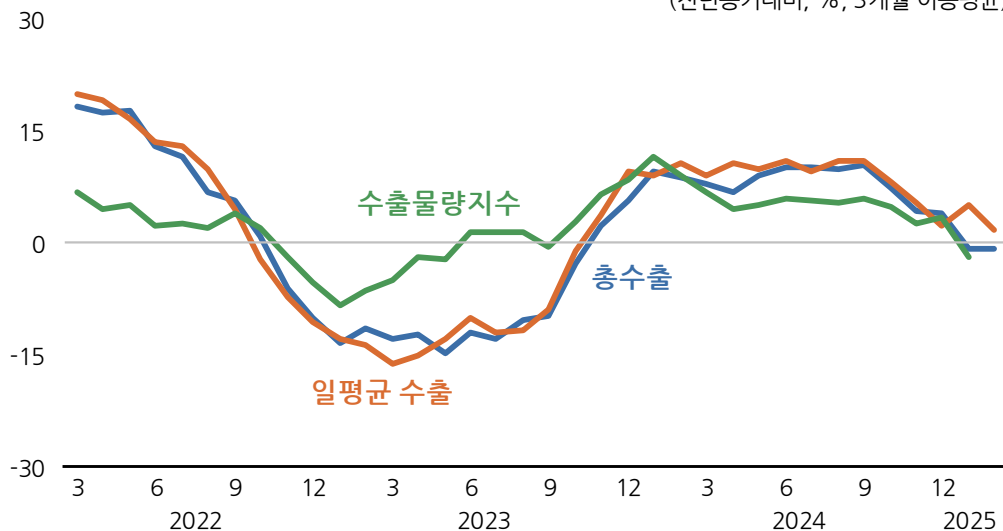

- 설 명절의 영향이 배제된 1~2월 평균 수출도 4.8% 감소하며, 상품수출의 둔화를 시사

- 수입(-6.4% → 0.2%)은 주요 에너지자원(-12.4% → -18.1%)이 감소하였으나, 이를 제외한 품목(-4.0% → 7.5%)을 중심으로 소폭 증가함에 따라 무역수지(-18.6억달러 → 43.0억달러)는 흑자로 전환

- 한편, 미국의 관세 인상은 향후 수출에 하방 압력으로 작용할 가능성(Box 참조)

총수출, 일평균 수출 및 수출물량지수

(전년동기대비, %, 3개월 이동평균)

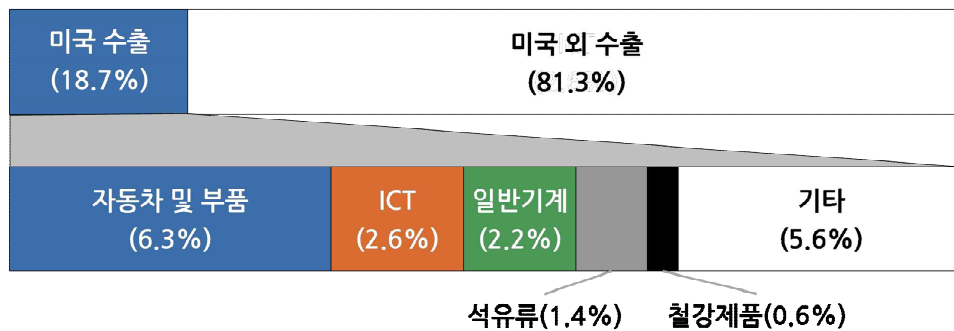

Box. 품목별 對미국 수출 비중

■ 전체 수출에서의 비중을 고려했을 때, 자동차, ICT 및 일반기계에 대한 관세 인상이 우리 수출에 크게 영향을 미칠 수 있음.

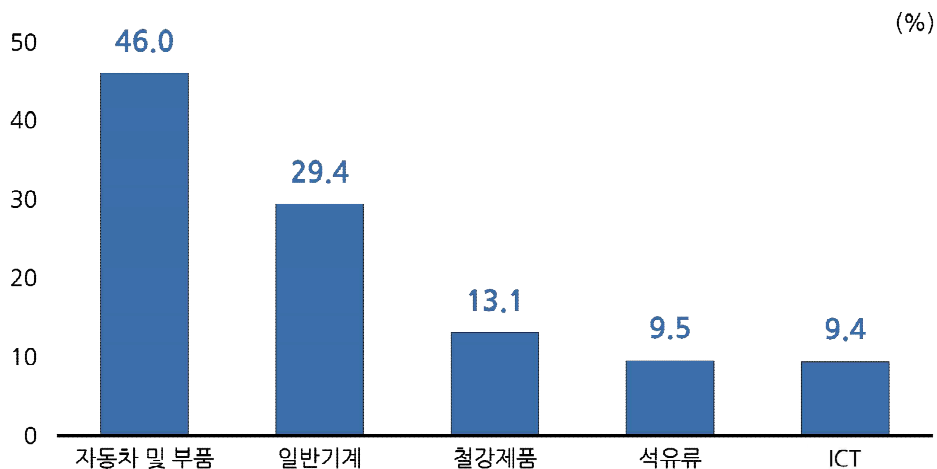

- 2024년 전체 수출 중 對미국 수출은 18.7%이며, 對미국 자동차 및 부품, ICT, 일반기계가 전체 수출에서 큰 비중을 차지

품목별 對미국 수출이 전체 수출에서 차지하는 비중

- 산업별 영향을 중심으로 보면, 각 품목의 수출 중 對미국 수출 비중이 높은 자동차 및 부품, 일반기계, 철강제품이 미국 관세 인상의 직접적 위험에 크게 노출

품목별 對미국 수출이 각 품목의 수출에서 차지하는 비중

■ 업황이 부진한 건설업과 내수밀집 서비스업의 노동수요가 감소하며 고용 여건이 둔화되는 모습

● 1월 취업자 수는 정부 일자리사업 재개에도 불구하고 건설업과 내수밀집 서비스업의 부진이 지속되며 13.5만명 증가

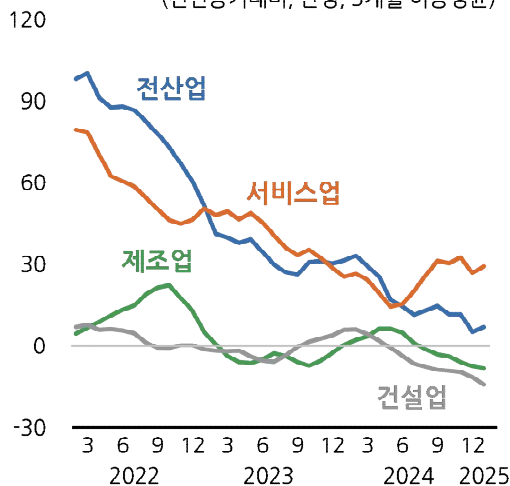

- 정부일자리 비중이 높은 공공행정(0.3만명 → 3.3만명)과 보건·사회복지(-0.3만명 → 11.9만명)가 증가하면서 서비스업(17.5만명 → 34.4만명)의 증가폭이 확대되었으며, 제조업(-9.7만명 → -5.6만명)도 감소폭이 축소
- 그러나 내수와 밀접한 도소매(-9.6만명 → -9.1만명), 숙박음식(1.2만명 → 2.7만명)의 부진이 지속된 가운데, 업황이 좋지 않은 건설업(-15.7만명 → -16.9만명)도 큰 폭의 감소를 기록
- 이에 따라 정부일자리 비중이 높은 임시직(-8.6만명 → 7.2만명) 증가폭이 크게 확대된 반면, 자영업자(0.7만명 → -2.8만명) 및 일용근로자(-15.0만명 → -11.6만명)는 감소세를 지속

● 정부 정책의 영향으로 계절조정 고용률과 실업률이 급등락했으나, 15~64세 고용률(69.7%)은 전월과 유사한 수준을 지속

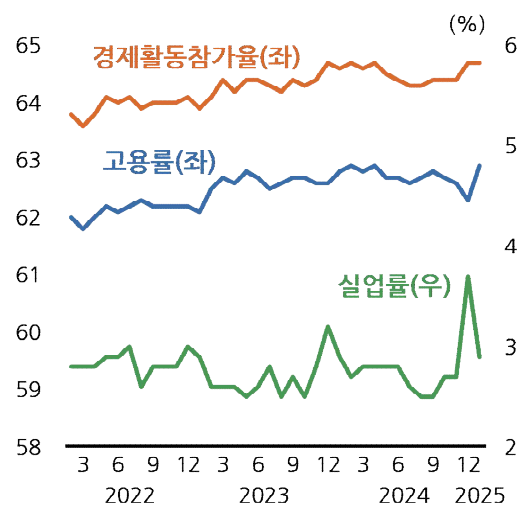

- 다만, 20대 고용률(60.4%)은 하락세를 지속하며 청년층 고용 여건의 둔화를 시사

주요 산업별 취업자 증감

(전년동기대비, 만명, 3개월 이동평균)

주요 고용지표(계절조정)

■ 수요 압력이 낮게 유지되면서 물가 상승세가 둔화 흐름을 나타냄.

- 2월 소비자물가는 상품과 서비스 가격 모두 하락하며 전월(2.2%)보다 낮은 2.0%의 상승률을 기록

- 상품(2.2% → 1.9%)은 농산물(0.6% → -1.2%)이 하락하며 상승폭이 축소
- 설 명절로 인해 일시적으로 상승했던 여행 관련 품목의 가격이 안정되면서, 외식 제외 개인 서비스(3.5% → 2.9%) 상승폭이 크게 축소
- 한편, 최근 국제유가가 하락세를 지속하면서 향후 물가 하방 압력으로 작용할 가능성

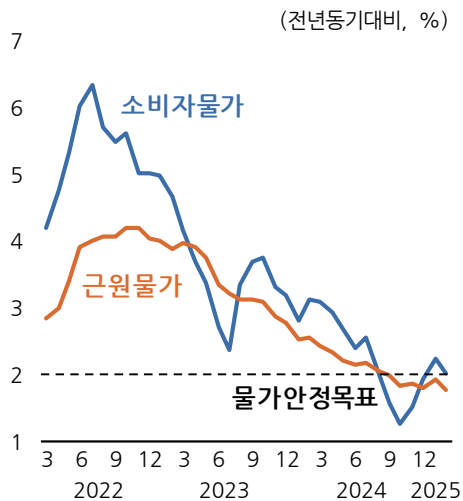

* 두바이유(달러/배럴): (1월) 80.4 → (2월) 77.9 → (3월 1~6일) 71.3

- 근원물가(1.9% → 1.8%)의 상승세도 소폭 축소되는 등 기조적인 물가 상승세의 둔화 흐름이 지속

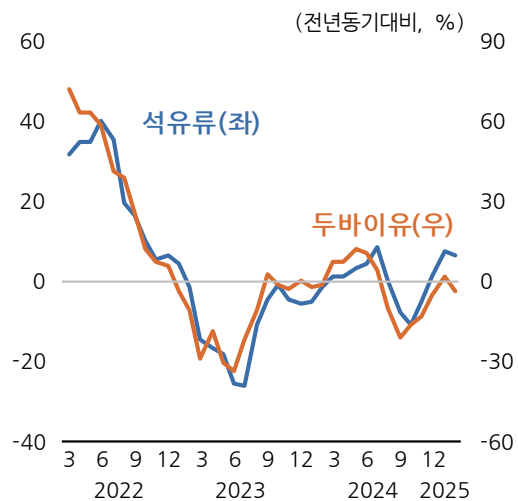

- 소비 부진이 지속되면서 기조적인 물가 상승세가 낮은 수준을 유지
- 이와 함께 기대인플레이션율도 점차 하락하는 모습

* 기대인플레이션율(소비자동향조사 기준, %): ('24년 12월) 2.9 → ('25년 1월) 2.8 → (2월) 2.7

소비자물가 및 근원물가

석유류 가격 및 국제유가

■ 신용시장의 안정세가 유지되었으나, 대외 불확실성이 확대되며 금융시장의 변동성이 높은 수준을 지속

- 2월 CP스프레드(38bp → 29bp), 신용스프레드(63bp → 59bp), CDS프리미엄(33bp → 29bp)이 하락하는 등 자금 조달 여건이 개선
- 그러나 미국의 관세정책 관련 불확실성 등으로 환율이 상승하고 금융시장의 변동성이 높은 수준을 지속
 - 원/달러 환율은 전월 말 대비 0.7% 상승한 1,463.4원을 기록
 - 환율(0.4% → 0.4%)과 주가(KOSPI, 0.7% → 0.9%)의 일간 변동폭이 전월에 이어 비교적 높은 수준을 기록하고 코스피200 변동성 지수(18.8 → 22.9)도 전월 대비 상승
- 한편, 가계대출은 둔화 추세를 지속하였으나, 개인사업자의 연체율은 높은 수준을 유지
 - 전 금융권 가계대출 증가액(조원): ('24년 11월) 5.0 → (12월) 2.0 → ('25년 1월) -0.9
 - 개인사업자 연체율(3개월 이동평균)은 0.65%를 기록하며, 장기평균(0.36%)을 크게 상회

CDS프리미엄

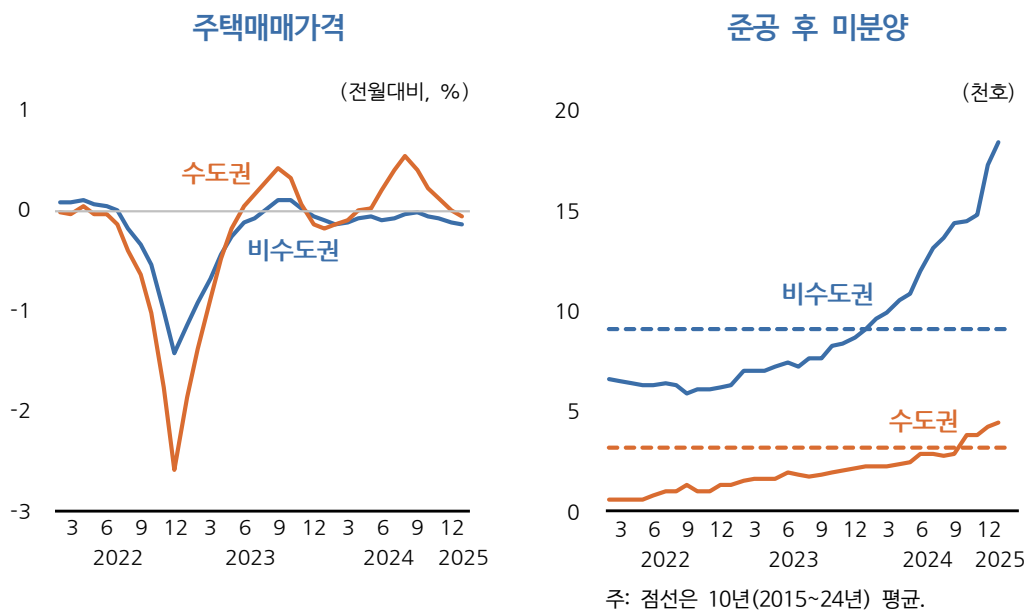

주가 및 환율

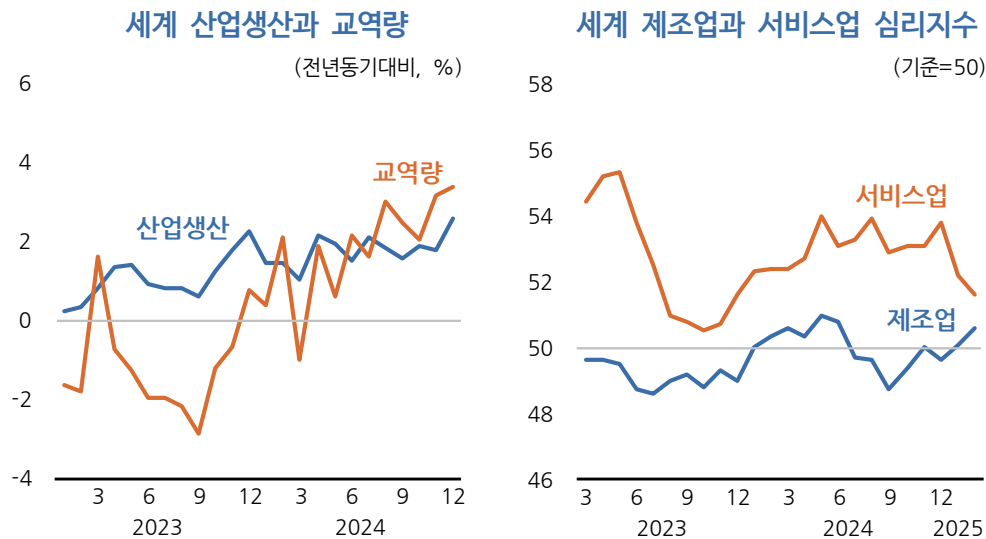

■ 매매가격의 하락세와 거래량의 감소세가 지속되며 주택경기 둔화를 시사

- 1월 주택매매가격(전월대비, -0.07% → -0.10%)은 하락폭이 소폭 확대되었고, 주택 매매거래(3.8만호)도 전월(4.6만호)보다 감소
 - 수도권의 매매가격(0.00% → -0.06%)이 하락하였고, 비수도권의 매매가격(-0.14% → -0.14%)도 전월에 이어 하락세를 지속
- 주택 임대시장에서도 전세가격(0.01% → -0.02%)이 하락으로 전환
 - 전세가격은 수도권(0.03% → -0.02%)에서 하락으로 전환되었고, 비수도권(-0.01% → -0.02%)에서도 소폭의 하락세가 지속
 - 월세가격(0.10% → 0.08%)도 상승폭이 소폭 축소
- 비수도권을 중심으로 준공 후 미분양이 증가하며 비수도권의 주택공급 과다에 대한 우려가 점증
 - 주택 준공(4.2만호)은 비수도권(2.6만호)을 중심으로 최근 3년(2022~24년) 1월 평균 준공물량(2.8만호)을 상회
 - 주택 수요가 위축된 비수도권에서 신규주택의 공급이 확대됨에 따라 준공 후 미분양(2.3만호)은 비수도권을 중심으로 증가

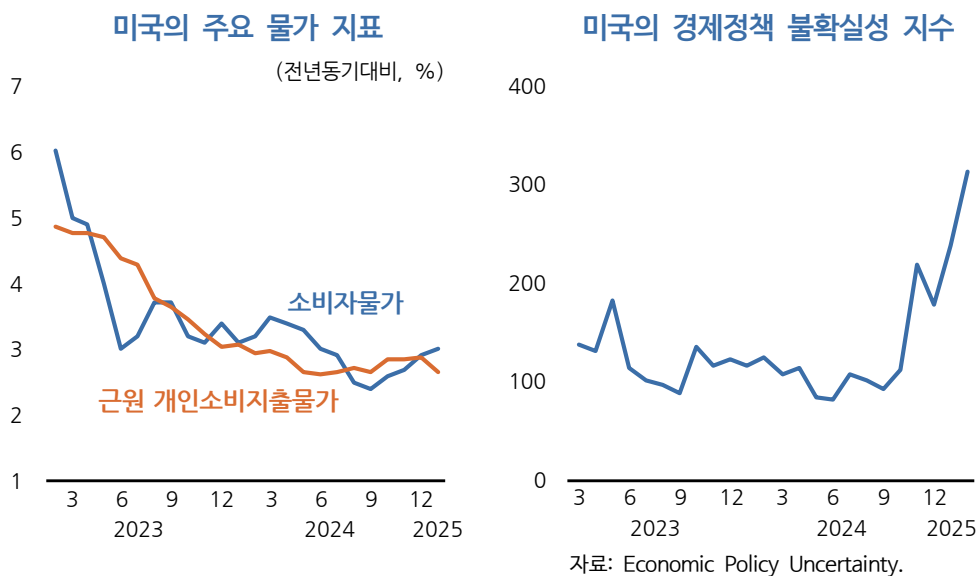

■ 세계경제의 완만한 성장 흐름이 이어지고 있으나, 글로벌 통상 여건에 대한 불확실성도 높게 유지

- 주요국의 성장세가 유지되고 관세 인상을 대비한 미국의 수입 증가도 반영되면서 글로벌 상품교역이 증가하였고, 제조업 업황도 회복 국면을 이어감.

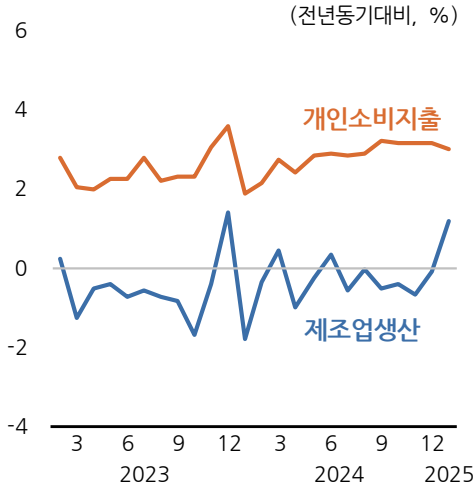

- 한편, 미국 물가 상승세의 기초적 둔화 흐름은 지속되었으나, 무역분쟁이 격화됨에 따라 경제정책 전반의 불확실성은 매우 높은 상황

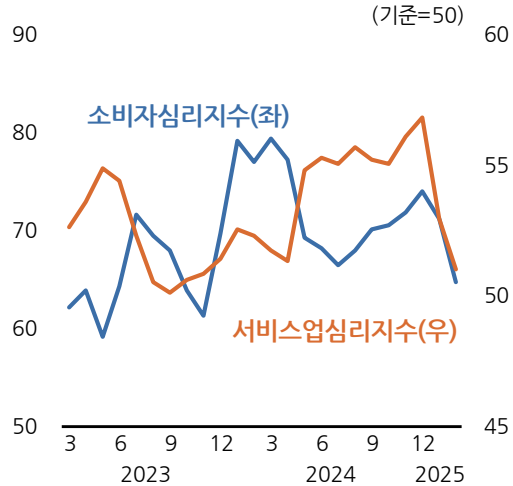

- 미국경제는 제조업 부진 완화에도 불구하고 주요 경제심리가 크게 위축되는 등 통상 정책 변화의 부정적 파급에 대한 우려가 확대되는 모습

– 가계소비 증가세가 지속되고 제조업생산도 증가로 전환되었으나, 2월 이후 미국의 성장을 견인했던 소비와 서비스 중심으로 부정적 선행지표가 늘어남.

미국의 제조업생산과 개인소비지출

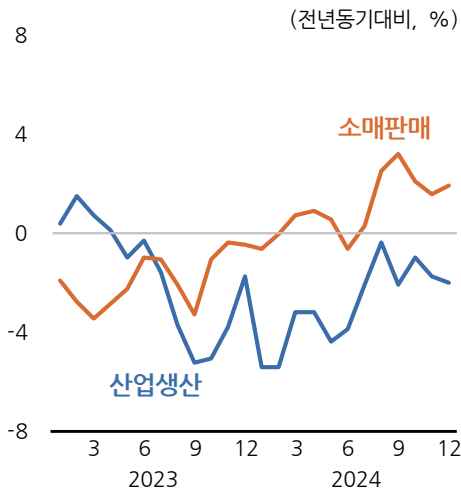

미국의 소비자심리와 서비스업 심리지수

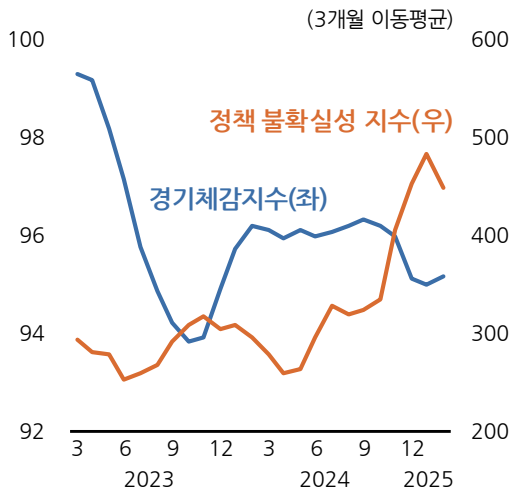

- 유로존 경제는 상품 소비의 회복에도 불구하고, 생산 감소와 가계 및 기업 심리의 약화 등 경기 전반이 부진한 흐름을 나타내고 있음.

– 이와 함께 미국과의 무역분쟁이 격화되고 유로존 내 정치적 불확실성도 높게 유지되면서 하방 압력이 더욱 확대된 것으로 판단됨.

유로존의 산업생산과 소매판매

유로존의 경기체감지수와 유럽 정책 불확실성

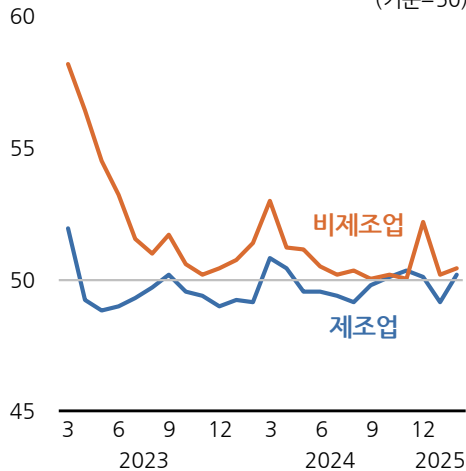

- 중국경제는 경기부양책에 힘입어 성장세를 유지하였으나, 부동산투자와 제조업 심리지표의 부진, 미국과의 통상갈등 격화로 경기 불확실성이 지속

- 다만, 완화적 통화정책 기조가 유지되면서 유동성 공급 관련 지표가 개선되었고, 주택시장에서도 거래가 완만한 속도로 증가하는 등 회복 신호도 일부 나타남.

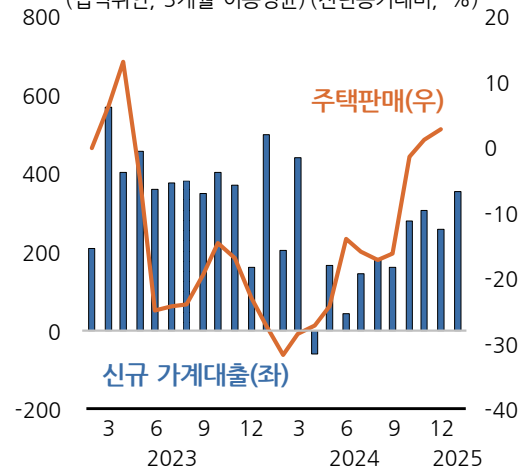

중국의 제조업과 비제조업 심리지수

(기준=50)

중국의 신규 가계대출과 주택판매

(십억위안, 3개월 이동평균) (전년동기대비, %)

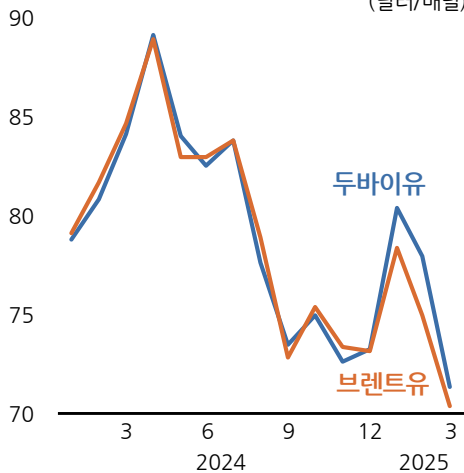

- 유가는 통상환경 악화에 따른 수요 둔화 우려와 러시아·우크라이나 종전 협상 기대로 하락하였으나, 미국 천연가스와 다수의 금속 가격은 상승

- 한편, OPEC+의 공급량 감소와 對러시아 추가 제재로 아시아 지역의 수급 여건이 불안정 해지면서 두바이유 가격이 상대적으로 높게 유지되었으나 최근 들어 격차가 빠르게 축소

국제유가

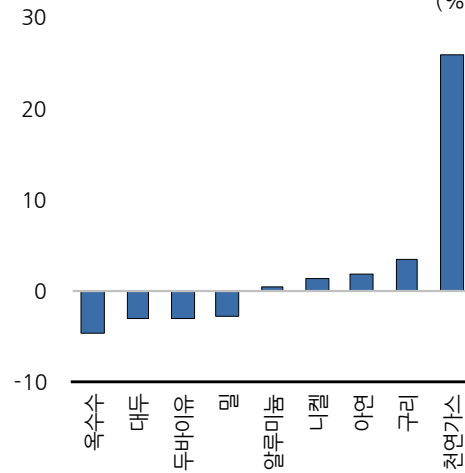

(달러/배럴)

주: 2025년 3월은 1~6일 평균.

주요 원자재 가격

(%)

주: 2025년 1월 말 대비 2월 말 기준.

- 미국의 통상정책 불확실성과 선행지표의 부진으로 경제성장 둔화에 대한 우려가 제기되면서 달러가 약세를 나타내고 2월 말에는 금리와 주가도 하락으로 전환

– 비교적 낮은 수준을 유지해 왔던 주요 선진국의 주가 변동성과 신흥국 가산금리도 상승하는 등 금융시장 불안이 확대되는 모습

Summary and Assessment※

- **The Korean economy exhibits growing downside risks** amid a deepening slump in the construction sector and worsening export conditions.
 - Manufacturing production continues to improve, driven by semiconductors.
 - Despite lower production in manufacturing due to fewer working days during the Lunar New Year and temporary public holidays, the average capacity utilization rate, adjusted for working days, maintained its upward trend.
 - However, construction investment remains subdued, and export growth is slowing.
 - Both construction investment and employment in the sector remain subdued, while the improvement in leading indicators is also weakening.
 - With semiconductor export prices, a key export item, declining, the impact of rising external uncertainties is gradually spreading, keeping export growth subdued.
 - The impact of political instability is easing, yet deteriorating external conditions are increasing downside risks to the economy.
 - Household and business sentiment indicators are gradually recovering from the political instability shock of late last year; however, concerns over a global trade slowdown are growing, driven largely by escalating U.S.-led trade tensions.

※ All growth figures are on a year-on-year basis unless otherwise noted. This document is an English translation of the original Korean version; the Korean version takes precedence in case of any ambiguities or discrepancies.

■ Amid moderating production growth, led by the construction sector, export growth is also slowing, indicating continued downside risks to economic activity.

● All-industry production in January (0.6% → -3.5%) fell due to persistent weakness in construction and fewer working days (+0.5 day → -4.0 days) resulting from the Lunar New Year holiday and temporary public holidays.

– Industrial (mining and manufacturing) production (4.4% → -4.1%) temporarily declined, despite robust growth in semiconductors (13.6% → 20.8%), primarily due to decreases in electronic parts (13.6% → -1.6%) and machinery equipment (0.3% → -7.5%).

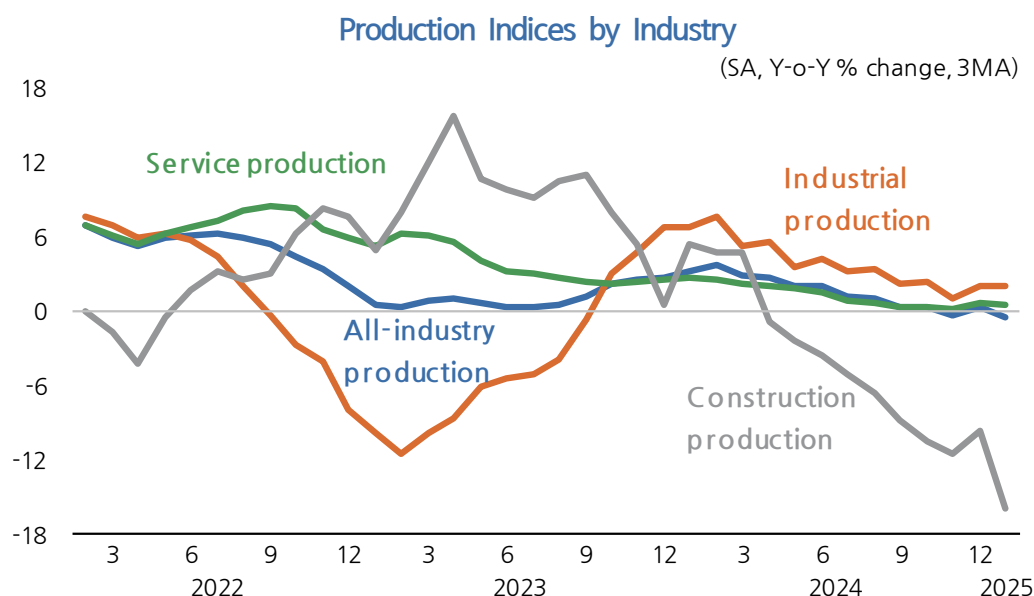

– Services production (0.3% → -0.9%) slowed as declines widened in wholesale and retail trade (-1.3% → -5.4%) and educational services (-0.3% → -1.7%), while growth in transportation and storage (7.7% → 2.9%) also slowed.

– Construction production (-7.4% → -27.3%) saw a sharp decline, partly due to the base effect of last January's surge in production, when finishing works were carried out intensively.

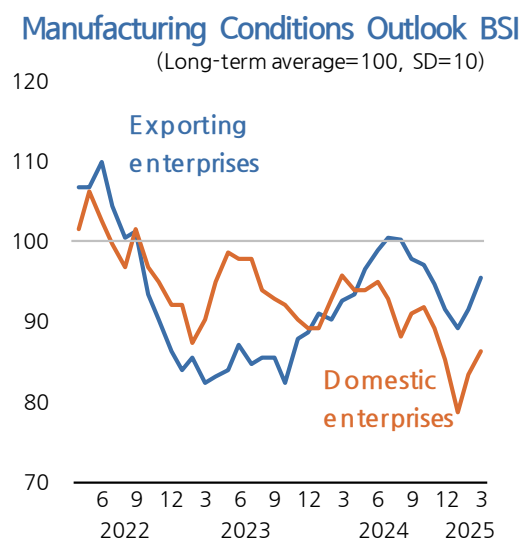

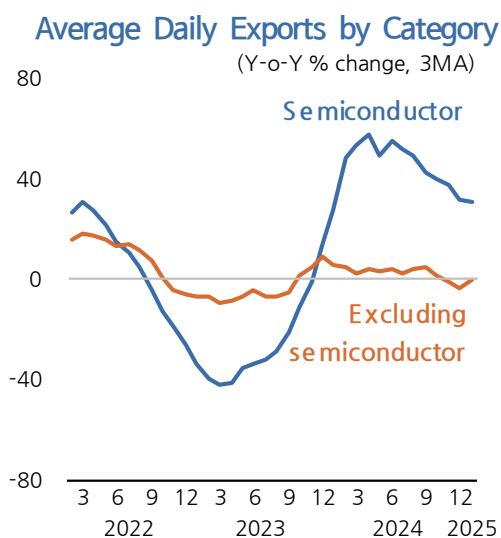

* Based on year-on-year growth in seasonally adjusted time series corrected for working day effects, construction (-26.8%) and services (0.4%) remain weak, while mining and manufacturing (3.6%) exhibit relatively solid growth.

● The inventory-to-shipment ratio (105.8% → 110.1%) increased due to temporary factors, yet the average capacity utilization rate (73.3% → 73.8%) continued its upward trend, suggesting manufacturing conditions sustained the improvement momentum from the previous month.

– Manufacturing shipments (seasonally adjusted month-on-month: -6.2%) declined due to reduced working days and the quarterly trend of lower semiconductor shipments at quarter-start; however, the working-day adjusted average capacity utilization rate rose, extending the previous month's trend.

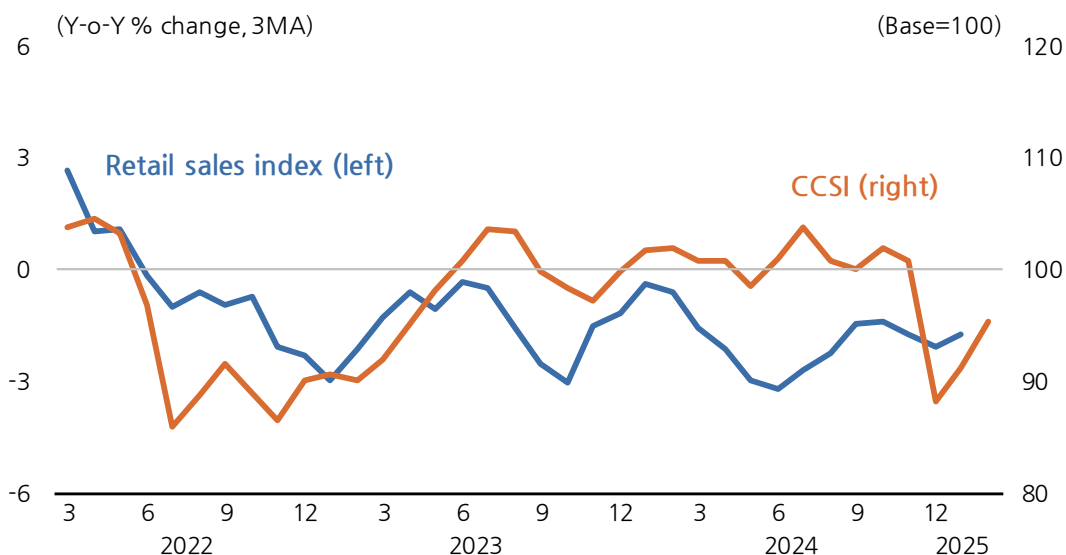

- Domestic demand remains weak, while growth momentum in external demand appears to be gradually weakening.
 - Consumption and construction investment remain sluggish, while the recent downturn in the real estate market has further weakened improvements in leading indicators.
 - While the previously high growth in semiconductor exports is gradually moderating, persistent weakness in other categories has kept overall export growth modest.
- The impact of political instability is gradually subsiding, yet concerns over the deteriorating global trade environment are escalating.
 - Household and business sentiment indicators, though still at low levels, are gradually recovering from the sharp decline observed late last year.
 - Meanwhile, the likelihood of a contraction in global trade is rising as trade conflicts between the U.S. and other countries intensify.

■ **Consumption remains weak**, although the contraction in consumer sentiment is easing somewhat.

- Retail sales in January (-2.5% → 0.0%) remained largely unchanged due to temporary factors such as the Lunar New Year holiday, yet conditions remain subdued amid high interest rates and dampened consumer sentiment.
 - Sales of food and beverages (13.0%) temporarily showed strong growth due to the Lunar New Year holiday effect, while durable goods (-10.7%) recorded substantial declines, notably in communication devices and computers (-23.4%) and household electrical appliances (-11.9%), primarily due to reduced working days.
 - On a seasonally adjusted basis, retail sales decreased by 0.6% month-on-month, indicating weakness in goods consumption.
- Service consumption also decreased, particularly in key sectors such as accommodation and food services, partly due to the effects of the Lunar New Year holiday.
 - Services production continues to decline in major sectors closely linked to consumption, including accommodation and food services (-3.3%), educational services (-1.7%), and arts, sports, and recreation-related services (-0.4%).
- Meanwhile, the CCSI in February, though still below the baseline (100), rose to 95.2, higher than the previous month (91.2), suggesting a gradual recovery from earlier contractions in consumer sentiment.

Retail Sales Index and Composite Consumer Sentiment Index (CCSI)

■ Equipment investment maintained its recovery momentum driven by semiconductors, yet downside risks are increasing due to external uncertainties.

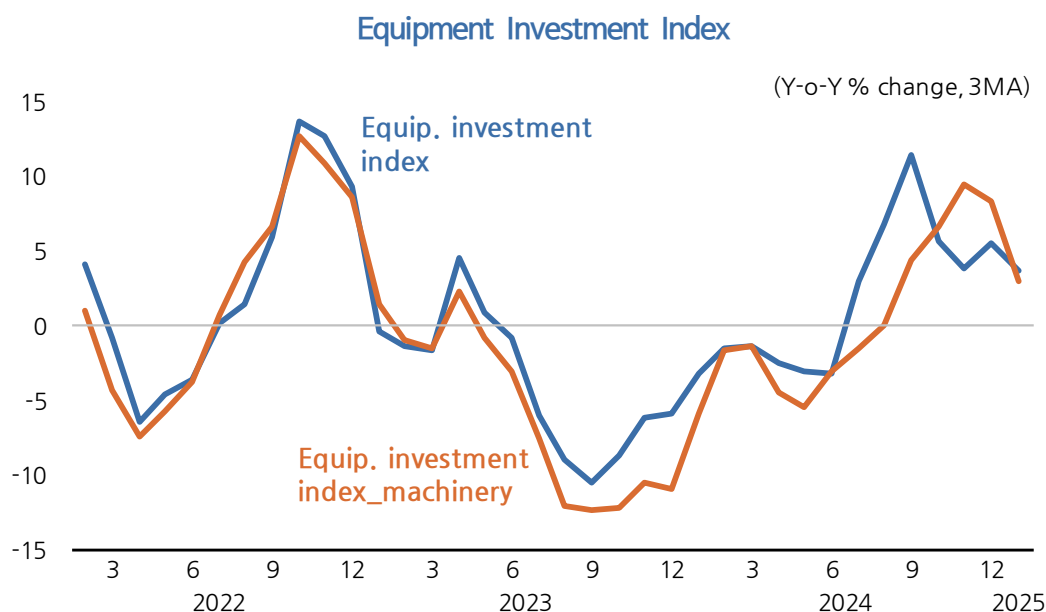

● Equipment investment in January (10.5% → -3.1%) decreased owing to temporary factors such as reduced working days, yet still remains on a favorable trajectory considering trends in leading indicators.

– Transport equipment (18.9% → 14.2%) maintained strong growth, whereas machinery (7.5% → -7.9%) declined, primarily semiconductor manufacturing equipment (31.6% → -2.9%).

– However, considering the significant increase in February's machinery imports (0.9% → 15.9%)—a leading indicator—particularly in semiconductor manufacturing equipment (2.0% → 33.5%), the decline in January's equipment investment is viewed as temporary.

● Rising external uncertainties stemming from trade conflicts could constrain conditions for equipment investment going forward.

– As the impact of heightened external uncertainties extends to exports, it may act as a downward factor for domestic investment.

■ **Construction investment is weakening further**, as the decline in the value of construction completed accelerates and improvements in leading indicators slow.

● The value of construction completed in January ($-7.4\% \rightarrow -27.3\%$) extended its downward trend with broad-based declines across both building construction and civil engineering sectors.

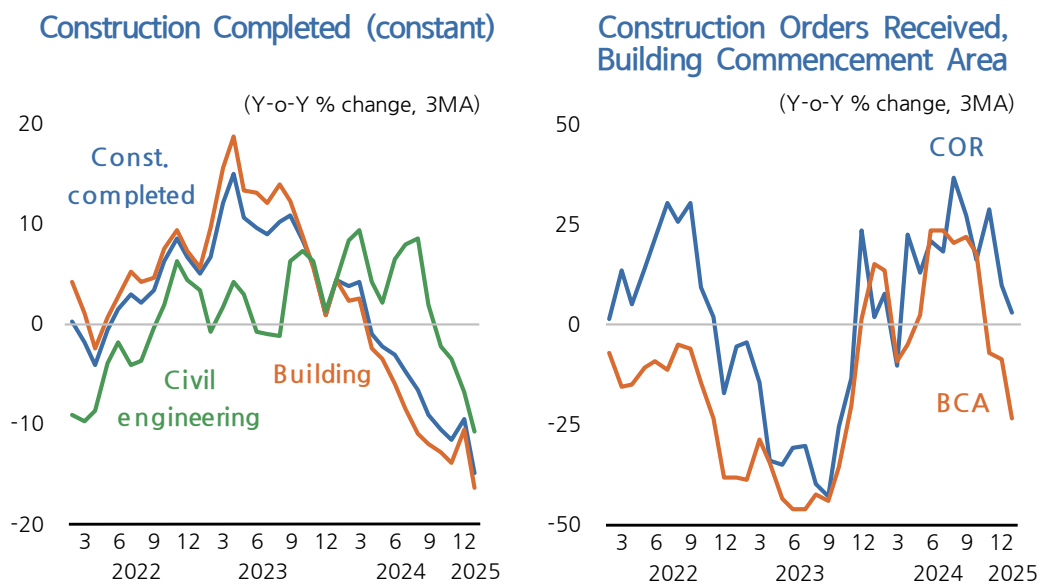

– Although this sharp decline partly reflects base effects (17.2% a year earlier), the seasonally adjusted month-on-month figure has fallen for six consecutive months, indicating persistent weakness in the construction sector.

* Value of construction completed (SA, MoM, %): (Nov. '24) $-3.1 \rightarrow$ (Dec.) $-1.9 \rightarrow$ (Jan. '25) -4.3

– Declines intensified in both the building ($-5.1\% \rightarrow -29.2\%$) and civil engineering ($-12.1\% \rightarrow -20.1\%$) sectors.

● Concurrently, the real estate market slowed, weakening the improvement trend in leading indicators.

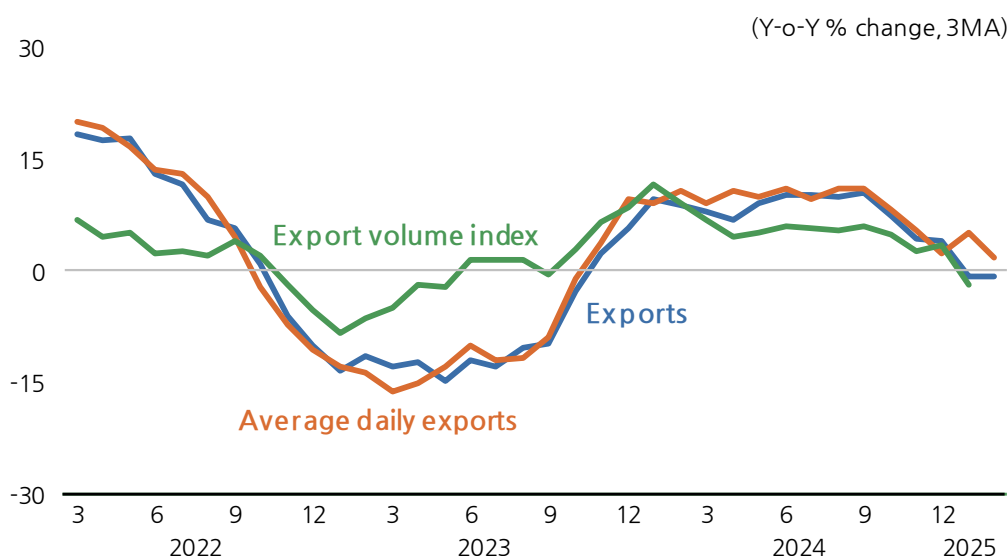

– The building commencement area (-32.6%) continued its downward trend, while construction orders received (-25.1%) also fell sharply, extending the previous month's decline.

■ **Exports are slowing** as the previously robust growth in ICT items moderates, while declines in non-ICT categories persist.

- Exports in February (-10.2% → 1.0%) slightly increased; however, on an average daily basis, growth recorded -5.9%, lower than the previous month (7.7%).
 - By category, average daily exports of ICT products (-5.1%) declined mainly due to weakness in general-purpose semiconductors, while exports of non-ICT products (-6.2%) also fell amid slowing global demand.
 - * The sluggishness in general-purpose semiconductor exports is primarily attributable to price declines (DDR4 8GB: -25.0%, NAND 128GB: -53.1%).
 - By destination, average daily exports to China (-8.2%), where general-purpose semiconductors constitute a high proportion, declined. Exports to the U.S. (-5.9%) also decreased, notably in general machinery (-24.6%), amid escalating trade policy uncertainties.
 - Average exports for January-February, excluding Lunar New Year effects, declined by 4.8%, indicating a slowdown in goods exports.
- Imports (-6.4% → 0.2%) rose slightly, reflecting declines in major energy resources (-12.4% → -18.1%) but increases in other items (-4.0% → 7.5%). Thus, the trade balance (-\$1.86 billion → \$4.30 billion) returned to surplus.
- Meanwhile, U.S. tariff hikes may pose downward pressure on future exports (see Box).

Exports, Average Daily Exports and Export Volume Index

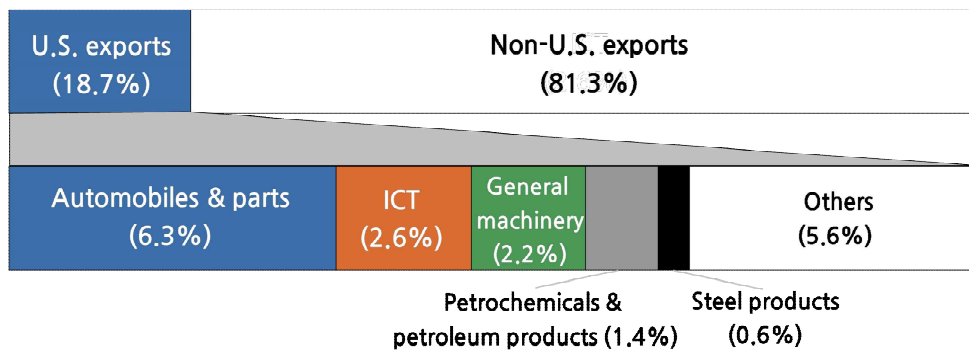

Box. Share of Exports to the U.S. by Item

■ Given each item's share in total exports, the automobile, ICT, and general machinery sectors could be significantly impacted by U.S. tariff hikes.

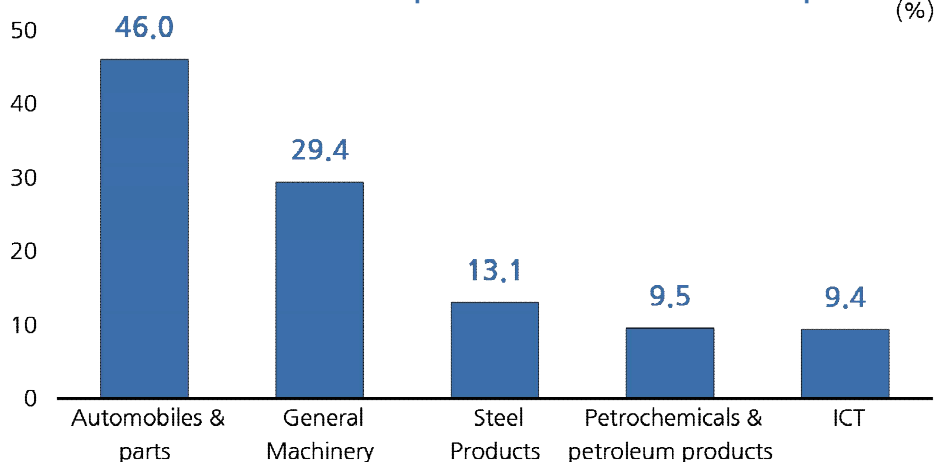

● In 2024, exports to the U.S. represented 18.7% of total exports, with automobiles and parts, ICT products, and general machinery accounting for significant proportions of overall export volume.

Share of Each Item's Exports to the U.S. in Total Exports

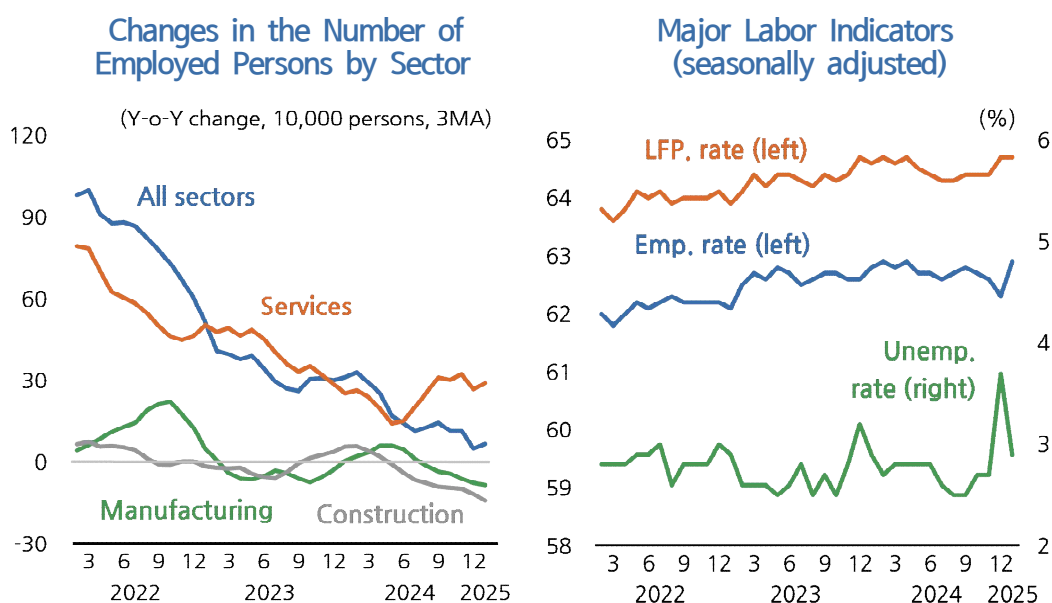

● Focusing on sector-specific impacts, automobiles and parts, general machinery, and steel products—each with a substantial share of U.S.-bound exports—are particularly exposed to direct risks from potential U.S. tariff hikes.

Share of U.S.-Bound Exports in Each Item's Total Exports

■ **Employment conditions are weakening** as labor demand declines in the sluggish construction sector and domestic demand-driven services.

- In January, the number of employed persons rose by only 135,000, despite the resumption of government job programs, reflecting persistent contraction in construction and domestic demand-oriented service businesses.
 - Employment growth in services (175,000 → 344,000) accelerated, driven by gains in public administration (3,000 → 33,000) and human health and social work activities (-3,000 → 119,000), both of which have high proportions of government-supported jobs. Meanwhile, manufacturing (-97,000 → -56,000) experienced a narrower decline.
 - However, domestic demand-oriented businesses such as wholesale and retail trade (-96,000 → -91,000) and accommodation and food services (12,000 → 27,000) continued to struggle, while construction (-157,000 → -169,000), facing challenging business conditions, also recorded substantial employment declines.
 - Consequently, the number of temporary workers (-86,000 → 72,000), largely influenced by government programs, increased significantly. Conversely, self-employed (7,000 → -28,000) and daily workers (-150,000 → -116,000) continued to decline.
- The seasonally adjusted employment and unemployment rates fluctuated considerably due to government policy effects; however, the employment rate among individuals aged 15-64 (69.7%) remained similar to the previous month.
 - The employment rate among those in their 20s (60.4%) continued to decline, indicating deteriorating employment conditions for young adults.

■ Price increases are slowing amid persistently weak demand.

- Consumer prices in February rose 2.0%, down from the previous month (2.2%), as increases slowed in both goods and services prices.

- Goods prices (2.2% → 1.9%) rose at a slower pace, as agricultural product prices (0.6% → -1.2%) declined.
- Increases in personal services excluding dining-out (3.5% → 2.9%) significantly moderated, as prices for travel-related items, temporarily elevated by the Lunar New Year holiday, stabilized.
- Meanwhile, recent downward trends in international oil prices may exert additional downward pressure on prices moving forward.

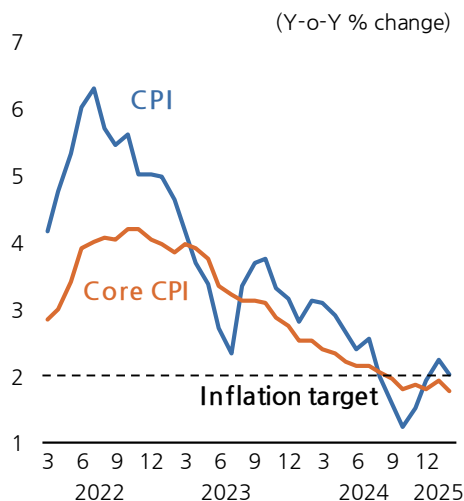

* Dubai crude oil price (\$/barrel): (Jan.) 80.4 → (Feb.) 77.9 → (Mar. 1-6) 71.3

- Core inflation (1.9% → 1.8%) also slightly decelerated, indicating a continued moderation in underlying inflationary pressures.

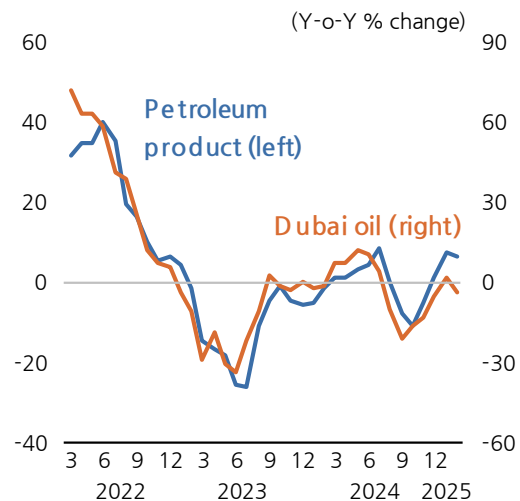

- With consumption remaining weak, underlying inflation remains at subdued levels.
- Accordingly, expected inflation has gradually declined as well.

* Expected inflation (Consumer Tendency Survey, %): (Dec. '24) 2.9 → (Jan. '25) 2.8 → (Feb.) 2.7

CPI and Core CPI Change

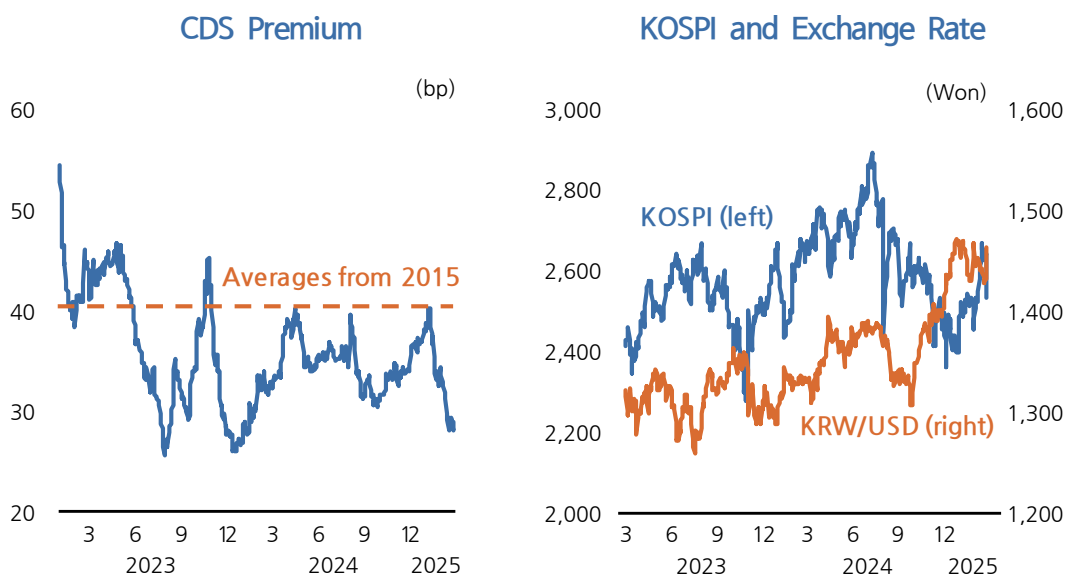

Petroleum Product Prices and International Oil Prices

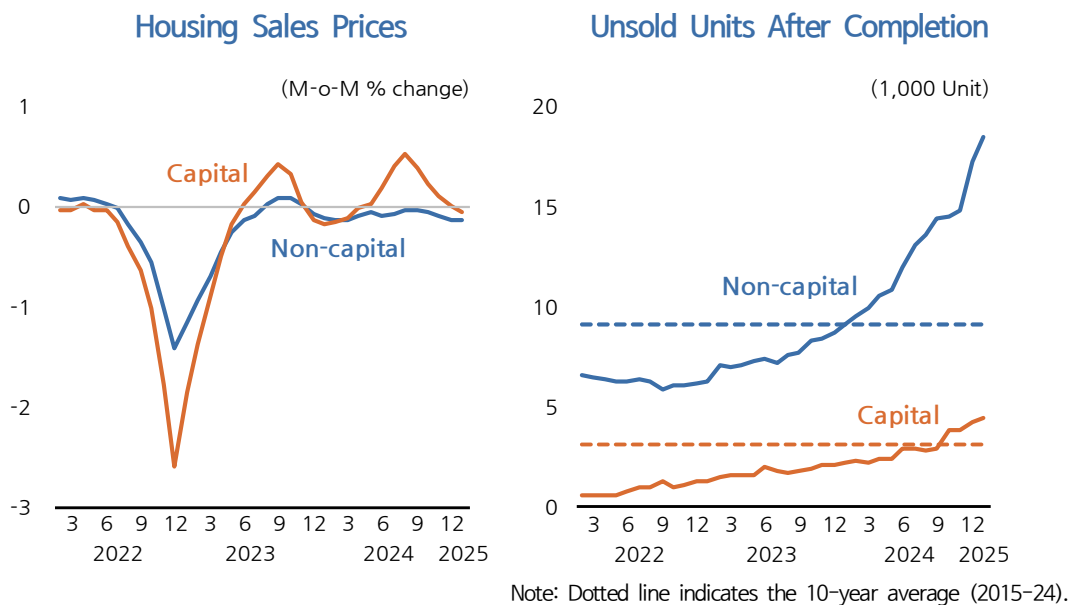

■ **Credit markets remain stable, while financial markets continue to be highly volatile** amid growing external uncertainties

- In February, funding conditions improved, as evidenced by declines in CP spreads (38bp → 29bp), credit spreads (63bp → 59bp), and CDS premiums (33bp → 29bp).
- However, due to uncertainties related to U.S. tariff policies, exchange rates rose, and financial markets remained highly volatile.
 - The exchange rate reached 1,463.4 won per dollar, up 0.7% from the previous month-end.
 - Daily fluctuations in the exchange rate (0.4% → 0.4%) and stock prices (KOSPI, 0.7% → 0.9%) remained relatively elevated following the previous month, and the KOSPI 200 volatility index (18.8 → 22.9) also increased compared to the previous month.
- Meanwhile, household lending continued to slow, yet the delinquency rate among sole proprietorship business owners remained high.
 - Increase in household loans across all financial sectors (trillion won): (Nov. '24) 5.0 → (Dec.) 2.0 → (Jan. '25) -0.9
 - The delinquency rate for sole proprietorship business owners (three-month moving average) reached 0.65%, significantly exceeding the long-term average (0.36%).

■ The continued decline in housing sales prices and transaction volumes indicates a **slowdown in the housing market**.

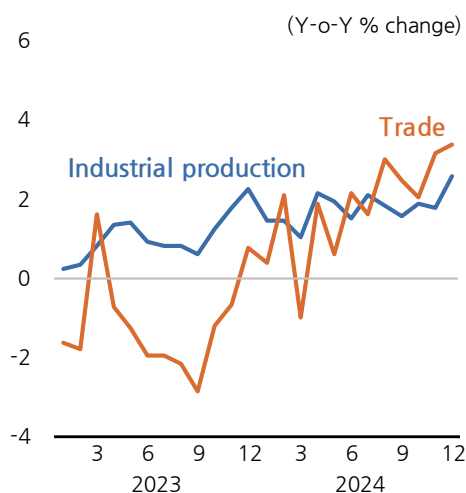

- Housing sales prices in January (month-on-month, $-0.07\% \rightarrow -0.10\%$) experienced a slightly accelerated decline, and housing sales transactions (38,000 units) also decreased compared to the previous month (46,000 units).
 - Sales prices in the capital area ($0.00\% \rightarrow -0.06\%$) decreased, while those in non-capital areas ($-0.14\% \rightarrow -0.14\%$) maintained their decline from the previous month.
- The housing rental market also saw jeonse prices ($0.01\% \rightarrow -0.02\%$) shift downward.
 - Jeonse prices turned negative in the capital area ($0.03\% \rightarrow -0.02\%$), while those in non-capital areas ($-0.01\% \rightarrow -0.02\%$) continued their slight downward trend.
 - Monthly rental prices ($0.10\% \rightarrow 0.08\%$) saw a slight deceleration in growth.
- Concerns over housing oversupply in non-capital areas are growing as unsold units after completion increase, particularly in these regions.
 - Housing completions (42,000 units) exceeded the average January level for the past three years (2022-24: 28,000 units), with non-capital areas (26,000 units) accounting for a substantial share.
 - Unsold units after completion (23,000 units) increased, primarily in non-capital areas, reflecting an expansion in new housing supply amid weakening demand in these regions.

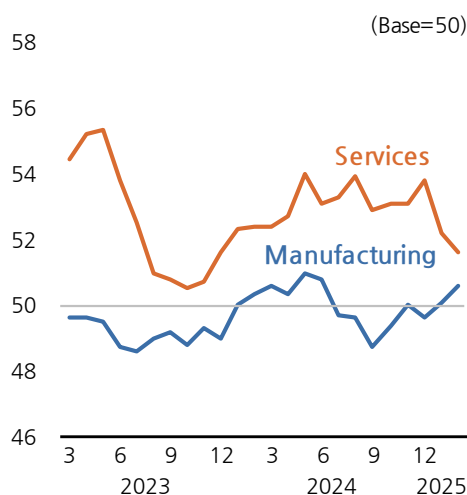

■ The global economy continues its moderate growth trajectory, yet uncertainty regarding global trade conditions remains elevated.

- Global goods trade expanded as major economies maintained their growth momentum, and U.S. imports increased in anticipation of upcoming tariff hikes, while manufacturing conditions continued on their recovery path.

World Industrial Production and Trade

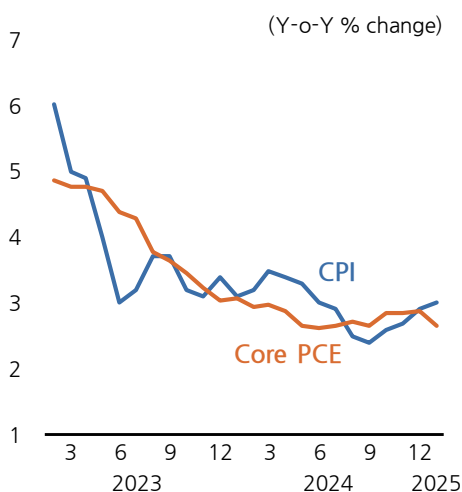

World Manufacturing and Services PMI

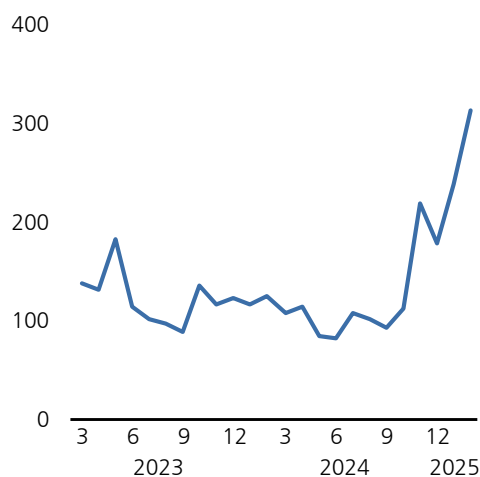

- Meanwhile, the underlying slowdown in U.S. price growth persists, while economic policy uncertainty remains significantly high amid escalating trade disputes.

U.S. CPI and Core PCE

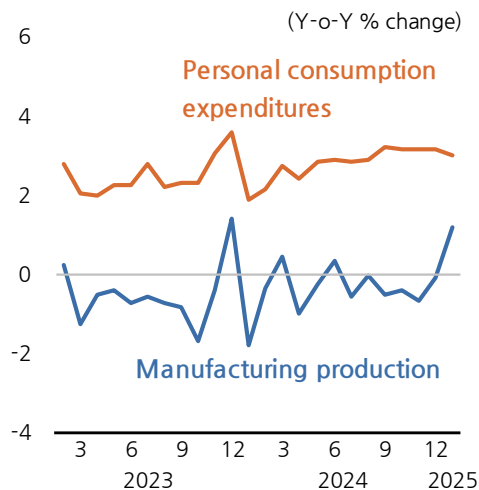

U.S. Economic Policy Uncertainty Index

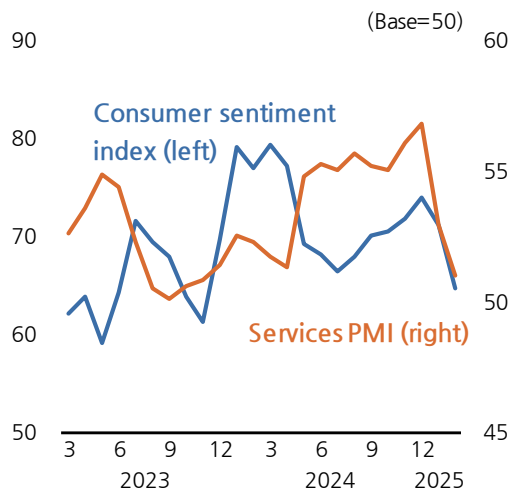

Source: Economic Policy Uncertainty.

- The U.S. economy faces growing concerns regarding negative spillover effects from trade policy shifts, as indicated by sharp contractions in key economic sentiment indicators, despite moderating declines in manufacturing.
 - Household consumption growth continues, and manufacturing production shifted upward. However, since February, negative signals from leading indicators, particularly in consumption and services—which have driven U.S. economic growth—have intensified.

U.S. Manufacturing Production and Personal Consumption Expenditures

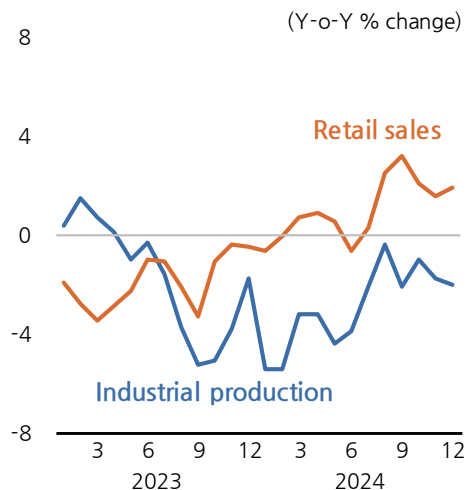

U.S. Consumer Sentiment Index and Services PMI

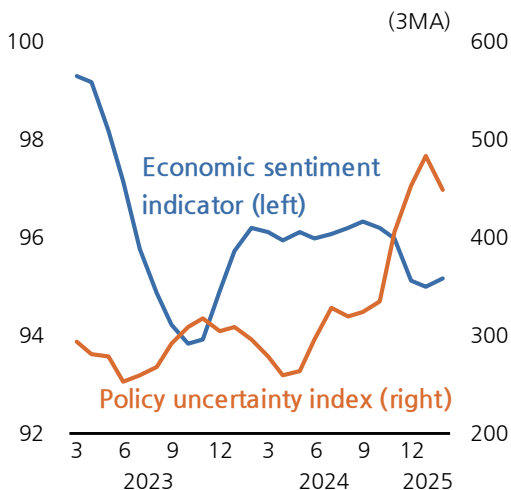

- The Eurozone economy shows broad-based weakness, demonstrated by declining production and weakening household and business sentiment, despite a recovery in goods consumption.
 - Additionally, downward pressures have intensified due to escalating trade disputes with the U.S., combined with persistent political uncertainties within the Eurozone.

Industrial Production and Retail Sales in Eurozone

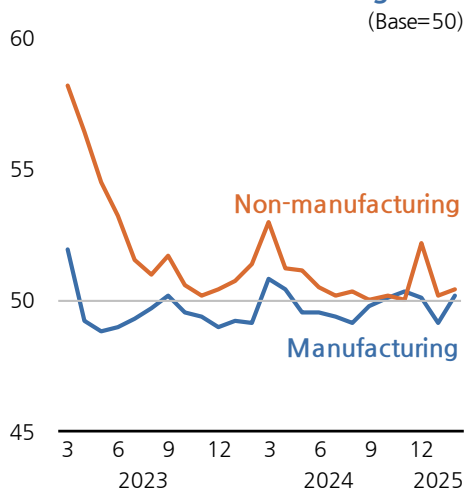

Eurozone Economic Sentiment Indicator and European Policy Uncertainty Index

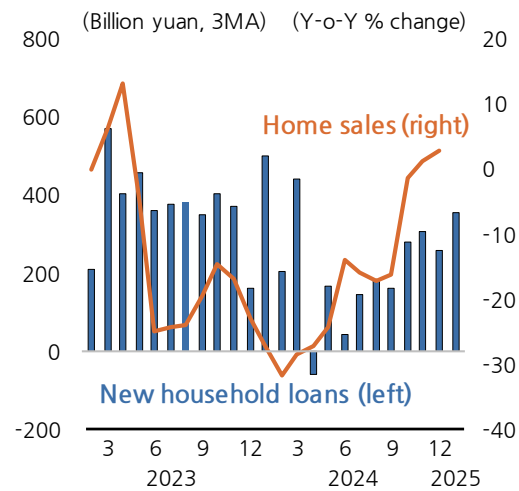

- The Chinese economy sustained its growth momentum, supported by stimulus measures, but economic uncertainty persists due to weakness in real estate investment, subdued manufacturing sentiment, and intensifying trade tensions with the U.S.
 - Some recovery signals have emerged, including improved liquidity indicators reflecting sustained accommodative monetary policy and a gradual increase in housing market transactions.

China's Manufacturing and Non-manufacturing PMI

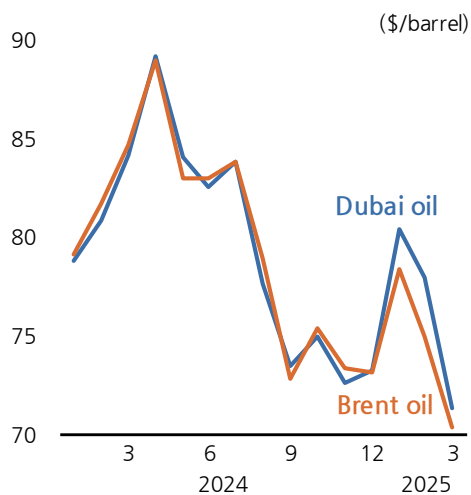

China's New Household Loans and Home Sales

- Oil prices declined amid concerns over weakening demand driven by deteriorating global trade conditions and expectations of peace negotiations between Russia and Ukraine, whereas U.S. natural gas and numerous metal prices increased.

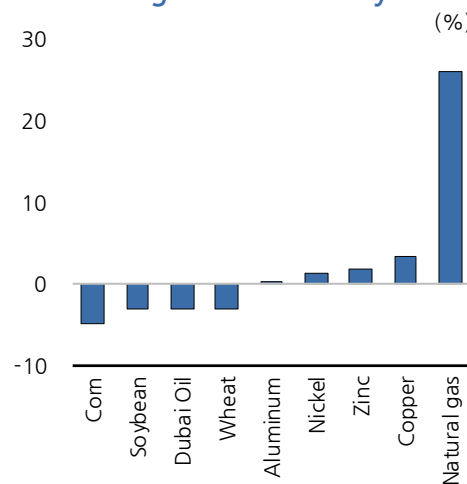

- Dubai crude prices remained relatively high due to unstable supply-demand conditions in Asia, stemming from OPEC+ supply cuts and additional sanctions on Russia, though the price gap has recently narrowed significantly.

Oil Price

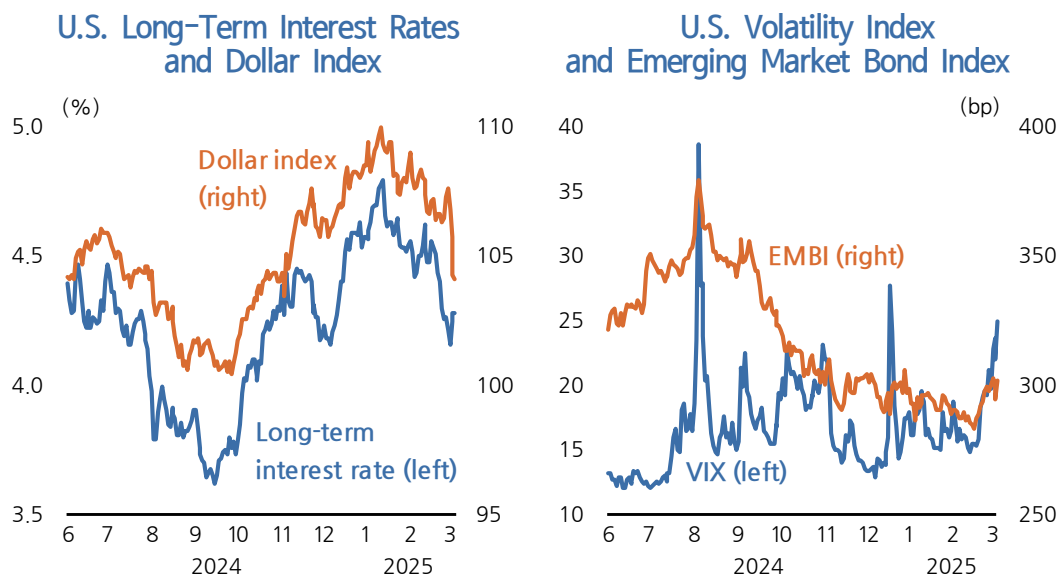

Note: March 2025 average for March 1-6.

Changes in Commodity Price

Note: As of end-February vs end-January.

- The dollar weakened amid concerns over economic slowdown stemming from U.S. trade policy uncertainty and weakening leading indicators, while interest rates and stock prices also decreased at the end of February.
- Financial markets appear to face increased volatility, as evidenced by rising stock market fluctuations in major advanced economies—previously at relatively low levels—and widening spreads in the EMBI.
