주: 실업률은 계절조정 기준(연간 제외)이며 국고채 수익률 · 종합주가지수 · 원/달러 환율은 기말 기준, 유가(두바이)는 기간평균 기준, 주택가격은 전년대비 증가율 기준임.

요약 및 평가※

■ 최근 우리 경제는 대외 여건이 급격히 악화되면서 **경기 둔화를 시사하는 지표가 나타나고 있음.**

● 건설업 부진이 내수 회복을 제약하는 가운데, 통상 여건 악화로 수출도 둔화 되는 모습

- 반도체를 중심으로 제조업생산이 양호한 흐름을 유지하고 있으며 관련 투자도 크게 증가
- 그러나 건설업 부진이 지속되면서 생산과 내수 증가세가 낮은 수준에 머무름.
- 이와 함께 미국의 관세인상에 따른 통상 여건 악화로 일평균 수출이 對미국 수출을 중심으로 감소

● 통상 여건 악화에 따른 글로벌 경기 둔화로 향후 수출을 중심으로 경기 하방 압력이 확대될 가능성

- 미국과 중국을 중심으로 세계경제 성장률 전망이 대폭 하향 조정되었으며, 국제 금융시장의 변동성도 확대되며 대내외 경제심리가 위축

※ 별도의 언급이 없을 경우 모든 증가율은 전년동월대비 기준임.

■ 광공업의 개선에도 불구하고 건설업을 중심으로 생산 증가세가 낮은 수준에 머무른 가운데, 통상 여건이 악화되면서 경기 둔화를 시사하는 지표가 점증

● 3월 전산업생산(1.2% → 1.3%)은 건설업의 부진이 지속되며 전월과 유사한 낮은 증가율을 기록

– 광공업생산(7.1% → 5.3%)은 반도체(12.3% → 26.8%), 전자부품(0.3% → 8.5%) 등의 증가폭이 크게 확대되며 양호한 증가세를 이어감.

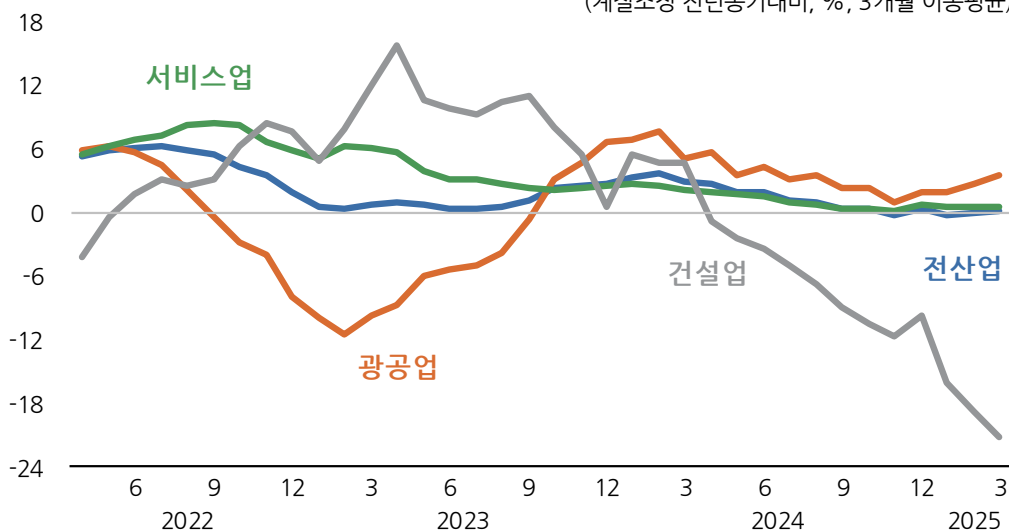

– 그러나 건설업생산(-20.2% → -14.7%)의 부진이 지속된 가운데, 서비스업생산(1.2% → 0.7%)도 정보통신업(1.7% → 0.2%), 금융·보험업(3.2% → 1.0%)을 중심으로 증가폭이 축소되며 전산업생산은 낮은 증가세에 머무름.

● 제조업생산이 확대되면서 평균가동률(73.2% → 74.9%)이 상승하고, 재고율(107.4% → 103.9%)은 하락

– 계절조정 전월대비 기준으로, 내수출하는 0.4% 감소했으나, 수출출하가 2.6% 증가하면서 제조업 출하는 0.9% 증가

산업별 생산지수

(계절조정 전년동기대비, %, 3개월 이동평균)

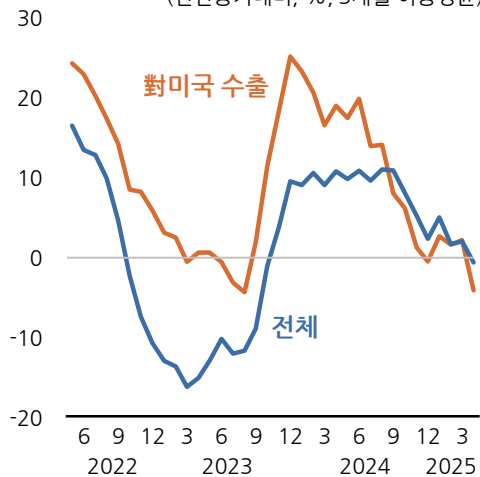

● 내수 회복이 지연되는 가운데, 수출 여건도 악화되며 경기 둔화에 대한 우려가 점증

- 소비 부진이 일부 완화되는 조짐이 나타났으나, 건설투자가 극심한 부진을 지속하며 내수 회복을 제약
- 일평균 수출이 對미국 수출을 중심으로 감소하는 등 미국 관세인상의 영향이 수출에 점차 반영되는 모습
- 세계경제에 대한 전망이 하향 조정되는 가운데, 통상정책 관련 불확실성이 높게 유지되며 기업심리는 낮은 수준에 머무름.

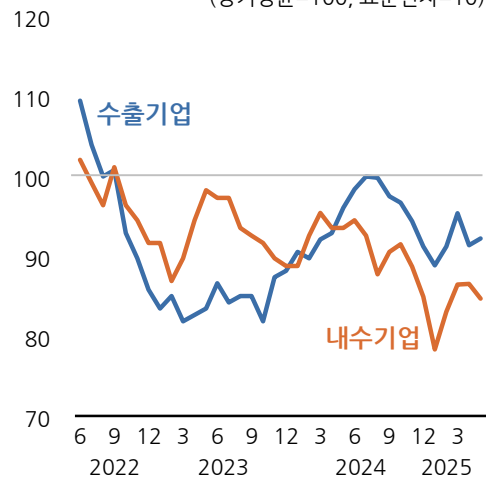

일평균 수출

(전년동기대비, %, 3개월 이동평균)

제조업 업황BSI 전망

(장기평균=100, 표준편차=10)

■ 상품소비 부진이 일부 완화되었으나, 소비자심리 위축이 지속되는 등 소비 회복은 지연되는 모습

- 개별소비세 인하에 따라 승용차가 높은 증가세를 지속하면서 소매판매가 증가하는 등 상품소비 부진이 부분적으로 완화

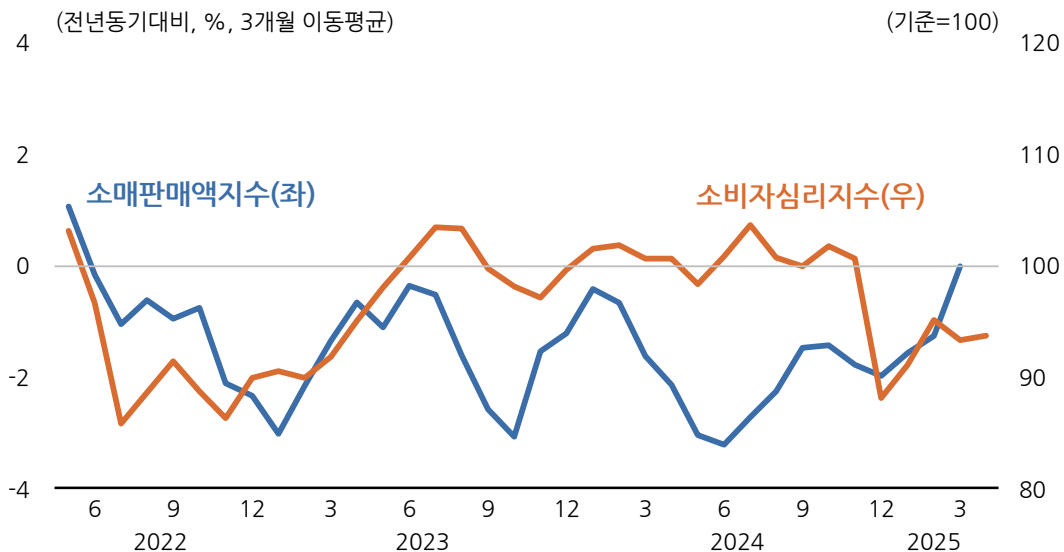

- 작년에 7.3% 감소하였던 승용차가 1~2월(10.1%)에 이어 3월에도 10.0%의 높은 증가세를 지속한 데 주로 기인하여 소매판매는 1.5% 증가
- 다만, 승용차를 제외한 소매판매는 0.5% 증가에 머물렀으며, 1/4분기로 보면 1.0% 감소
- 작년 3월 소매판매가 3.3% 감소한 것을 감안하면, 소매판매의 증가에는 기저효과도 일부 작용한 것으로 판단됨.

- 반면, 서비스소비는 숙박·음식점업 등 주요 업종을 중심으로 부진한 모습

- 숙박·음식점업(-3.7%), 교육서비스업(-1.3%), 예술·스포츠·여가서비스업(-0.7%) 등 소비와 밀접한 주요 서비스업의 생산이 감소세를 지속

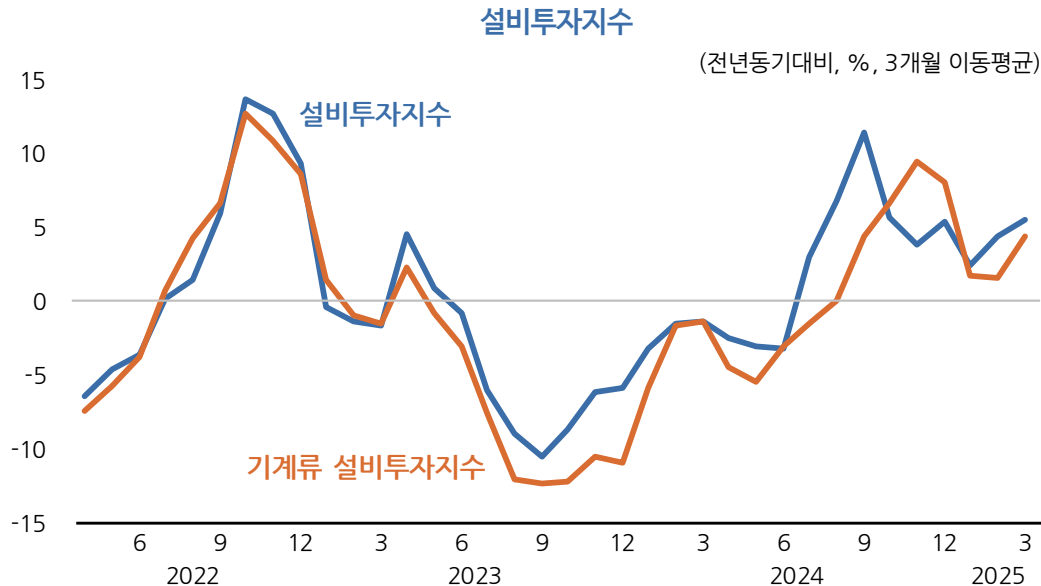

- 한편, 4월 소비자심리지수(93.8)는 전월(93.4)보다 소폭 상승하였으나 여전히 기준치(100)를 하회

소매판매액지수 및 소비자심리지수

■ 반도체 관련 투자는 양호한 흐름을 유지하고 있으나, 높은 대외 불확실성에 따른 설비투자 하방 위험도 상존

- 3월 설비투자(8.0% → 14.1%)는 반도체 관련 투자의 호조가 이어지는 가운데, 전년 동월(-4.9%)의 기저효과도 작용하면서 높은 증가율을 기록
 - 기계류(8.3% → 16.0%)는 반도체제조용장비(11.7% → 68.2%), 정밀기기(21.2% → 17.7%) 등 반도체 관련 투자를 중심으로 크게 증가
 - 선행지표인 4월 반도체제조용장비 수입액(85.1% → 26.8%)도 높은 증가세를 지속
 - 운송장비(6.9% → 9.2%)는 개별소비세 인하에 따라 자동차(14.1% → 11.8%)를 중심으로 증가
- 다만, 통상 관련 불확실성이 높게 유지되면서 향후 설비투자 개선을 제약할 가능성도 존재
 - 한국은행 제조업 설비투자전망 BSI(90)가 장기평균(95)을 하회하는 수준을 지속하며 기업의 투자심리가 위축되어 있음을 시사

■ 건설기성이 전반적으로 대폭 감소하는 등 건설투자는 위축된 모습

● 3월 건설기성(-20.2% → -14.7%)은 큰 폭의 감소세를 지속하였으며, 계절조정 전월 대비로도 2.7% 감소하며 부진한 모습

- 건축부문(-23.2% → -16.1%)은 주거용과 비주거용 모두 큰 폭의 감소세를 나타냈으며, 토목부문(-9.8% → -11.0%)도 감소폭이 확대

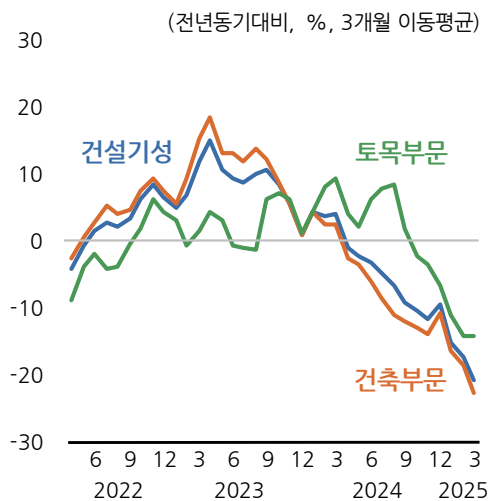

- 3월 건설투자의 부진에는 일부 공사 현장의 작업 중단 등 일시적 요인도 작용

- 이와 함께 1/4분기 국민계정상의 건설투자도 감소폭이 확대되며 부진이 심화

* 건설투자(%): ('24년 3/4분기) -5.7 → (4/4분기) -6.6 → ('25년 1/4분기) -12.2

● 다만, 선행지표인 건설수주가 2023년 말 이후 개선세를 나타내는 등 향후 건설투자에 대한 긍정적 지표도 관측됨.

건설기성(불변)

건설수주

■ ICT를 제외한 품목의 부진이 지속되고 미국 관세인상의 영향이 가시화되며 수출이 둔화되는 모습

- 4월 수출(3.7%)은 소폭 증가하였으나, 조업일수의 영향을 배제한 일평균 기준으로는 전월(5.3%)보다 낮은 0.6%의 감소를 기록

- 품목별로는 일평균 기준으로 ICT 품목(15.0% → 8.7%)의 증가세가 조정되는 가운데 이를 제외한 품목은 글로벌 수요 둔화가 지속되며 부진한 모습

* ICT 제외 일평균 수출액(3개월 이동평균, %): (2월) -2.5 → (3월) -0.7 → (4월) -2.7

- 1/4분기 국민계정상 실질상품수출도 0.8% 감소하며 수출이 점차 둔화

- 한편, 미국 관세인상의 부정적 영향이 점차 가시화되는 모습

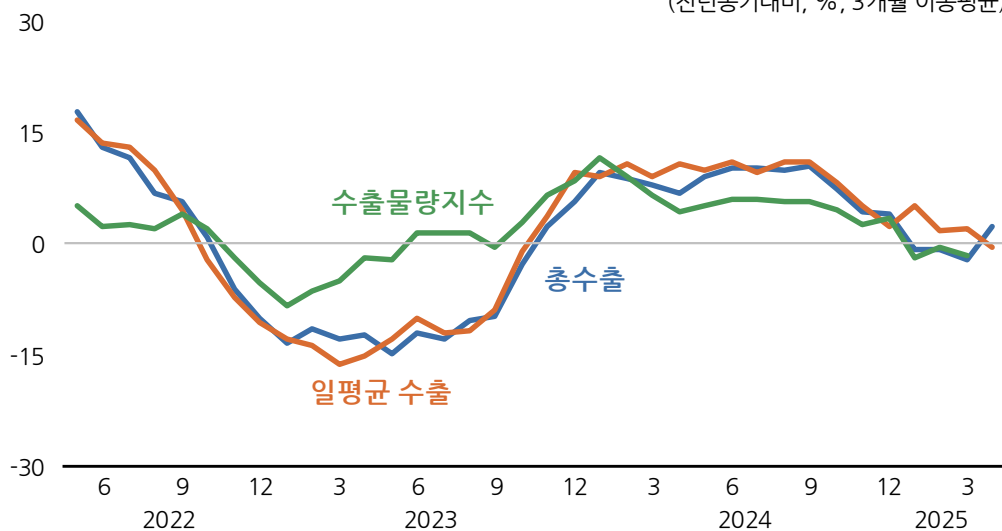

- 국가별로는 일평균 기준으로 미국을 제외한 국가로의 수출은 1.9% 증가한 반면, 對미국 수출(-10.6%)은 대폭 감소

- 아울러 관세율이 대폭 인상된 對미국 자동차(-20.7%)와 철강(-11.6%) 수출은 여타 국가로의 수출(자동차: 15.0%, 철강: -0.1%)에 비해 큰 폭으로 감소

- 수입(-2.7%)이 주요 에너지자원(-17.4%)을 중심으로 감소한 가운데, 무역수지는 48.8억달러의 흑자를 기록

총수출, 일평균 수출 및 수출물량지수

(전년동기대비, %, 3개월 이동평균)

■ 서비스업 고용의 양호한 증가세에도 불구하고 고용 여건은 건설업과 제조업을 중심으로 둔화 흐름을 지속

● 3월 취업자 수는 기저효과와 서비스업 고용 증가에 기인하여 전월(13.6만명)보다 증가폭이 확대된 19.3만명을 기록

- 계절조정 취업자 수는 전월대비 0.2만명 감소하며 전월과 유사한 수준을 지속
- 정부일자리사업과 밀접한 부문*(15.5만명)이 높은 증가세를 지속한 반면, 이를 제외한 부문(3.8만명)은 업황이 좋지 않은 건설업(-18.5만명)과 제조업(-11.2만명)을 중심으로 낮은 증가폭을 기록

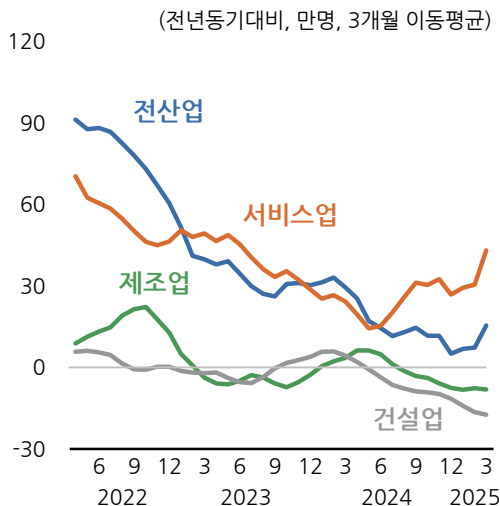

* 공공행정 및 보건복지 서비스업의 65세 이상 임시근로자를 의미

- 다만, 정보통신(6.5만명 → 6.1만명), 금융보험(2.9만명 → 6.5만명) 등 주요 서비스업은 양호한 증가세를 유지하고 있으며, 도소매·숙박음식(-0.9만명 → 3.0만명) 등 내수 밀접 서비스업에서도 개선 조짐이 나타남.

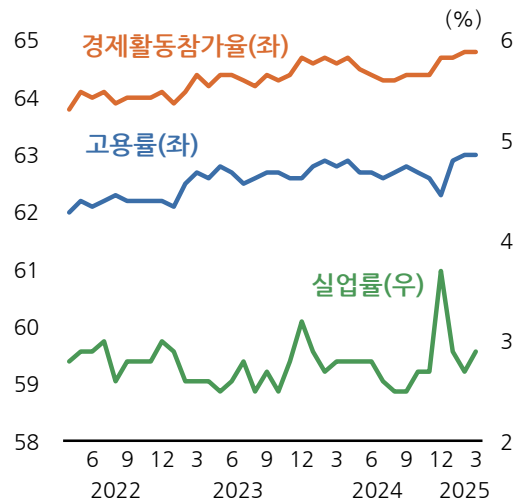

● 고용률이 정체된 가운데 청년층을 중심으로 실업률이 상승하는 모습

- 계절조정 고용률과 경제활동참가율은 각각 전월과 동일한 63.0%, 64.8%를 기록하였으며, 실업률(2.9%)은 15~29세(6.3% → 6.6%)를 중심으로 전월대비 0.2%p 상승

주요 산업별 취업자 증감

주요 고용지표(계절조정)

■ 수요 압력은 낮게 유지되고 있으나, 환율 상승 등에 기인하여 물가상승률은 2% 내외에서 등락

● 4월 소비자물가는 전월과 동일한 2.1%의 상승률을 기록

– 국제유가 하락으로 석유류(2.8% → -1.7%)가 하락하면서 물가 하방 요인으로 작용

* 두바이유(달러/배럴): (2월) 77.9 → (3월) 72.5 → (4월) 67.7

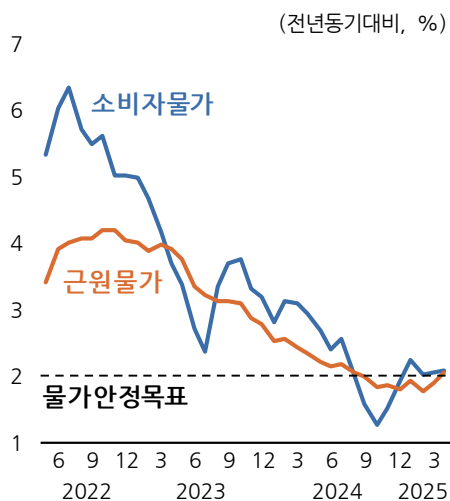

– 반면, 환율 상승에 따른 수입물가 상승으로 가공식품(3.6% → 4.1%) 등의 상승폭이 확대되고, 보험서비스료 등이 정책 요인*으로 인상되며 개인서비스(3.1% → 3.3%)의 상승폭도 확대

* 보험서비스료(15.1% → 16.3%)의 상승폭 확대는 금융당국의 새로운 가이드라인에 따른 보험료 인상에 주로 기인

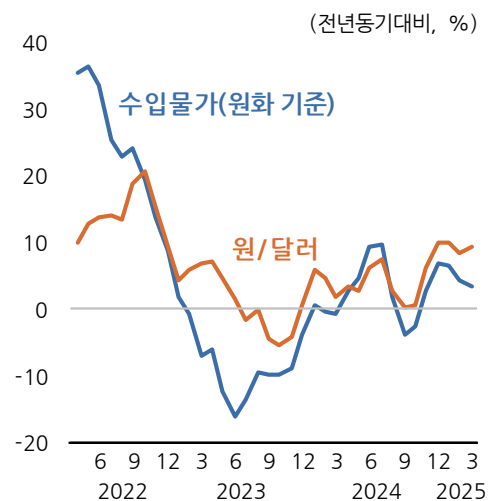

● 이에 따라 근원물가는 전월(1.9%)보다 소폭 높은 2.1%의 상승률을 기록

– 환율 및 정책 요인으로 근원물가 상승폭이 확대되었으나, 내수 부진에 따라 수요 측 물가 압력은 낮은 수준을 지속

소비자물가 및 근원물가

수입물가 및 환율

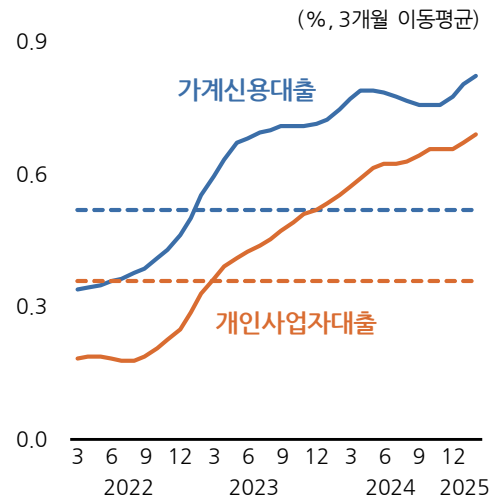

■ 금융시장은 국내 정치 상황 및 미국 관세정책 변화에 따라 높은 변동성을 보임.

- 원/달러 환율(0.3% → 0.7%)과 종합주가지수(0.9% → 1.2%)의 일간 변동폭이 확대되었으며, 코스피200 변동성 지수(25.4 → 20.7)도 높은 수준을 지속
- 국고채금리(3년)는 경기 둔화 우려로 전월 말(2.57%) 대비 하락한 2.27%를 기록
- 다만, CP스프레드(44bp)가 장기평균(43bp)과 유사한 수준을 기록한 가운데, CDS 프리미엄(38.7 → 32.3)이 하락하는 등 신용시장은 안정된 모습
- 한편, 2월 국내은행 연체율은 기업과 가계 대출 전반에서 상승세를 지속
 - 3개월 이동평균 기준으로, 개인사업자대출 연체율(0.67% → 0.69%, 장기평균: 0.36%)과 가계신용대출 연체율(0.80% → 0.82%, 장기평균: 0.52%)이 장기평균을 크게 상회하는 수준에서 상승세를 나타냄.

주가 및 환율

국내은행 연체율

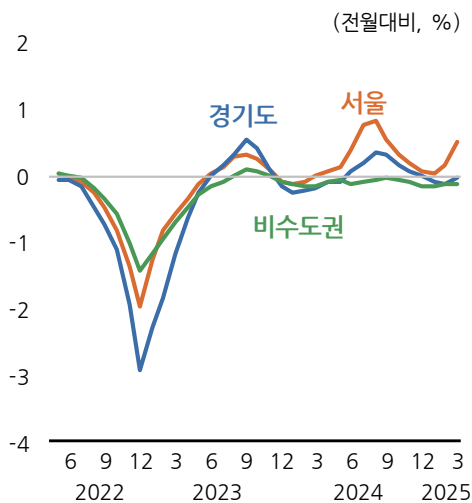

주: 점선은 2015년 이후 장기평균 수치를 나타냄.

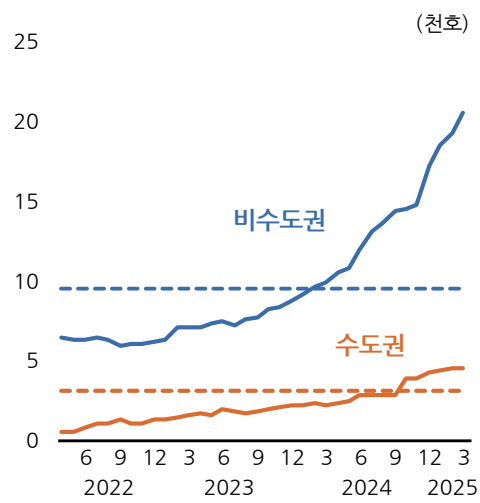

■ 수도권에서는 서울 강남권을 중심으로 매매가격이 상승한 반면, 비수도권에서는 준공 후 미분양이 증가하는 등 주택경기가 둔화

- 3월 주택매매가격(전월대비, -0.06% → 0.01%)은 보합세를 기록
 - 전세가격(-0.01% → 0.03%)도 보합세를 보였으며, 월세가격(0.08% → 0.09%)은 전월에 이어 낮은 상승세를 지속
- 서울 강남권의 토지거래허가구역 해제 등으로 서울의 매매가격이 상승하고 매매거래량도 크게 증가
 - 서울 매매가격(0.18% → 0.52%)의 상승폭이 크게 확대되었고, 매매거래량(12.9천호)도 증가폭이 확대되어 최근 3년의 3월 평균 거래량(5.7천호)을 큰 폭으로 상회
 - 이에 따라 수도권 매매가격(-0.01% → 0.15%)이 상승전환하였고, 매매거래량(3.6만호)도 크게 증가하며 최근 3년의 3월 평균 거래량(2.2만호)을 상회
- 반면, 비수도권에서는 매매가격 하락세가 이어지고 준공 후 미분양이 증가하는 등 주택경기 둔화가 지속되는 모습
 - 비수도권의 매매가격(-0.10% → -0.12%)은 장기간 하락세를 지속하고 있으며, 준공 후 미분양(23.7천호 → 25.1천호)도 비수도권을 중심으로 크게 증가

주택매매가격

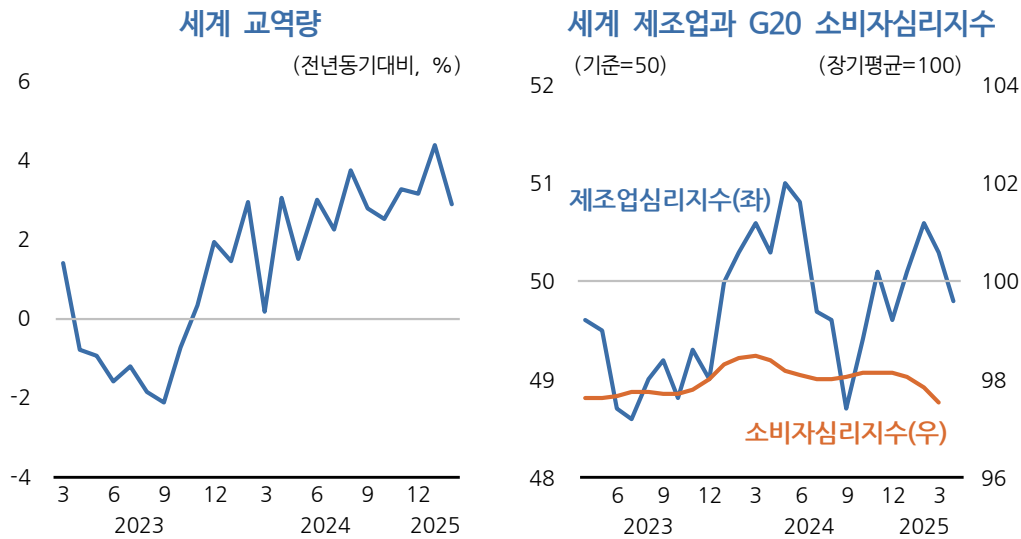

준공 후 미분양

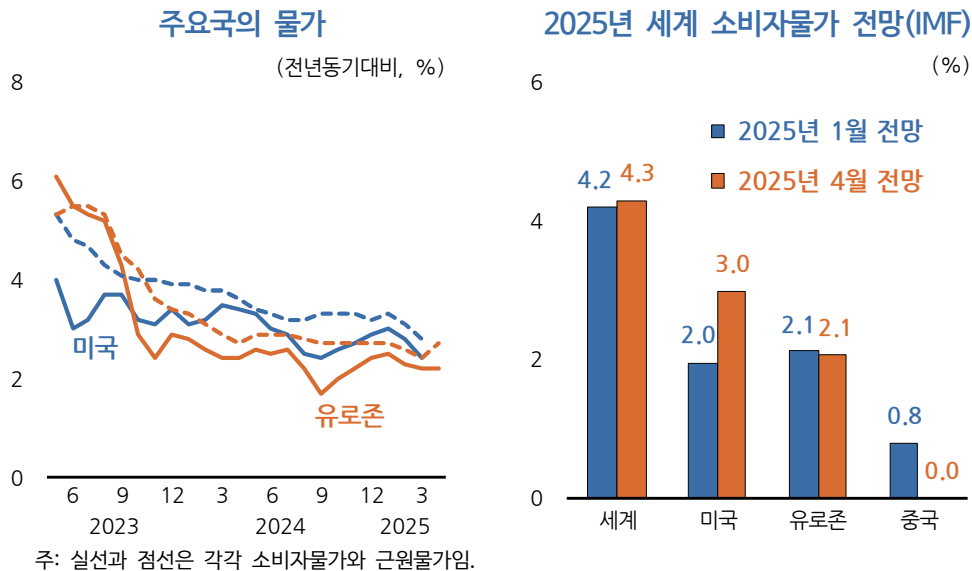

주: 점선은 10년(2015.4~2025.3) 평균.

■ 글로벌 통상 여건이 악화되면서 세계경제에 상당한 하방 압력으로 작용

- 상품교역 증가폭이 축소되고 제조업 업황과 소비 관련 심리지표도 부진한 흐름을 지속하는 등 글로벌 경기 둔화 가능성이 확대

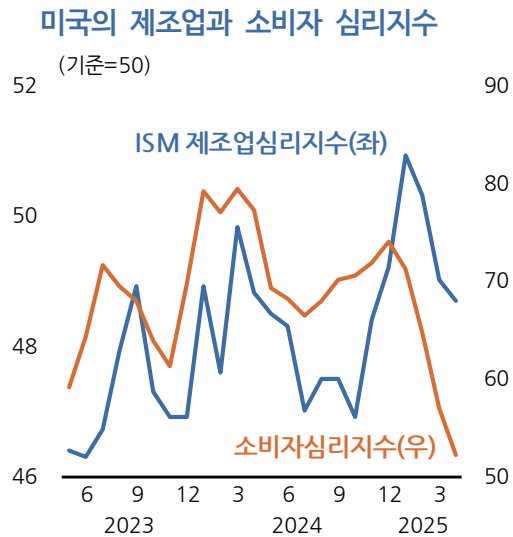

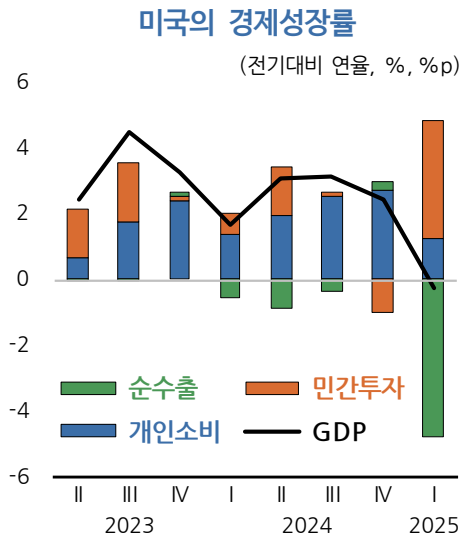

- 주요국의 물가 상승세가 완만하게 둔화되고 있으나, 관세인상이 반영되면서 미국의 인플레이션 전망이 상향조정됨.

주: 실선과 점선은 각각 소비자물가와 근원물가임.

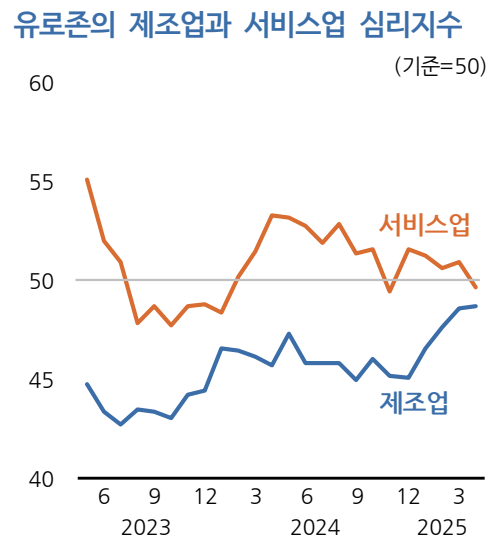

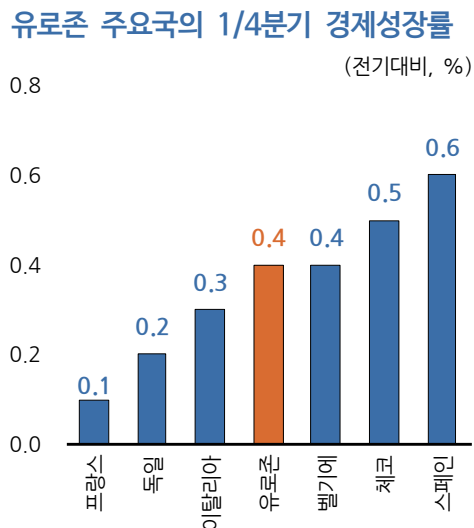

- 미국경제는 민간소비 부진과 수입 급증으로 역성장을 기록하였고, 주요 경제심리지표가 급락하면서 향후 경기 전망도 부정적 상황임을 시사

– 2025년 미국경제는 무역분쟁 등의 정책 불확실성 지속과 민간소비 위축의 영향으로 1%대 후반의 낮은 성장률을 기록할 전망

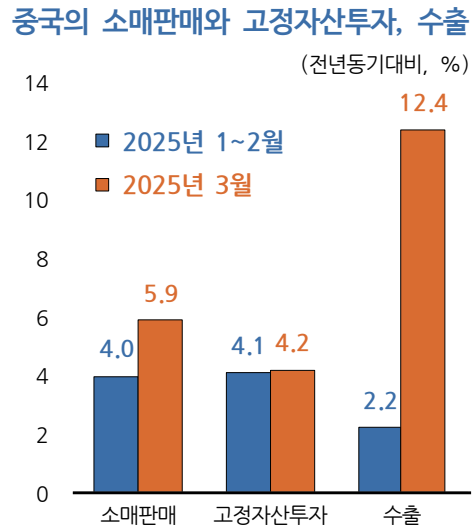

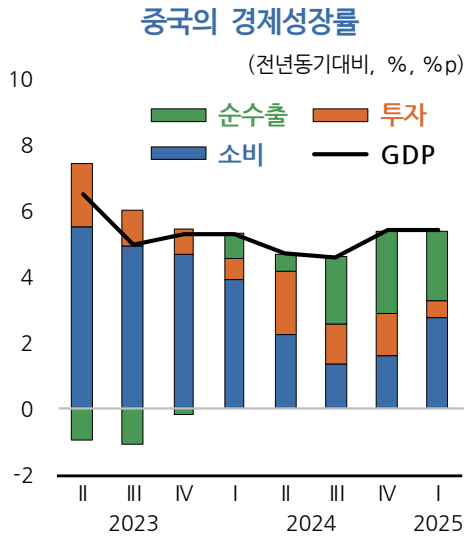

- 유로존 경제는 상품소비가 완만한 개선 흐름을 유지하면서 경기침체 우려가 완화되었으나, 통상 여건 악화로 선행지표가 부진하여 미약한 회복세에 머물 전망

– 물가 상승세의 둔화 흐름이 이어지고 대외 여건 악화로 경기 하방 압력은 높아지면서 금리 인하 기조가 지속되는 모습

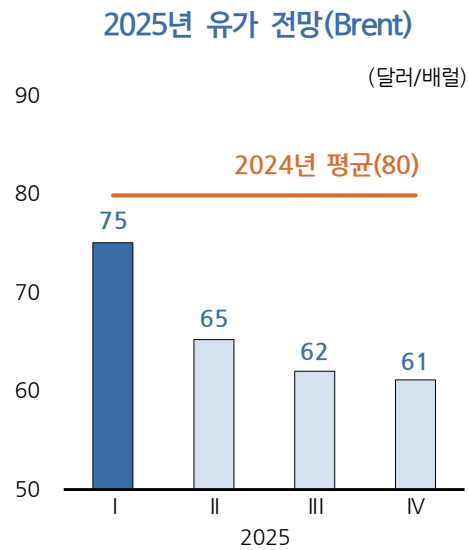

- 중국경제는 내수 회복과 수출 증가로 양호한 성장세를 보였으나, 대외 불확실성이 고조되면서 경기 하방 압력이 확대

- 3월 소매판매 증가세가 확대되고 수출도 반등하면서 1/4분기에 5.4%의 높은 성장률을 기록하였으나, 미국과의 통상 갈등이 심화되면서 성장 전망은 하향조정

- 4월 국제유가는 글로벌 경기 둔화와 OPEC+의 증산 확대 전망으로 급락하였으며, 미국의 통상정책과 이란 제재 등의 영향으로 불안정한 흐름을 나타냄.

- 주요 기관들은 무역 갈등에 따른 수요 둔화로 가격 하방 압력이 확대된 것으로 평가하면서 2025년에 유가가 크게 하락할 것으로 전망

주: 2025년 2/4분기 이후는 EIA의 전망치임.

● 세계경제는 글로벌 통상환경 악화와 경제심리 위축으로 성장세가 크게 둔화될 전망

- 최근 IMF는 미국과 중국 등 주요국의 성장 전망을 대폭 하향조정하면서 세계경제의 성장률도 2025년에 2%대 후반까지 낮아질 것으로 예상

2025년 세계 경제성장률 전망(IMF)

(%)

전망 시점	세계	미국	유로존	일본	중국	인도	브라질	멕시코
2025년 1월	3.3	2.7	1.0	1.1	4.6	6.5	2.2	1.4
2025년 4월	2.8	1.8	0.8	0.6	4.0	6.2	2.0	-0.3

자료: IMF, *World Economic Outlook*, April 2025.

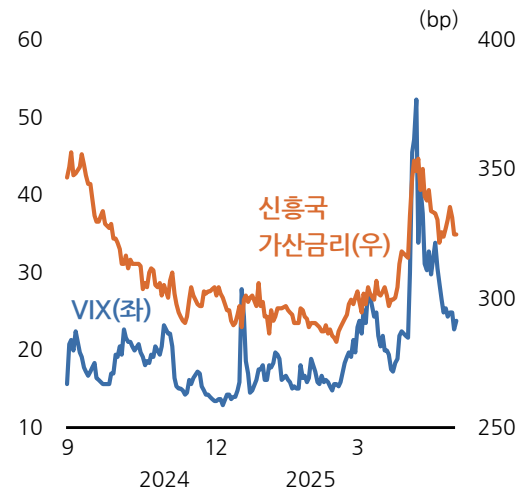

● 주요 금융시장 지표도 미국의 통상정책 불확실성 확대로 글로벌 경기 둔화 우려가 부각되면서 높은 변동성을 지속

- 특히 미국경제에 대한 부정적 견해가 급증하면서 달러 가치가 큰 폭으로 하락하였고, 금리도 인플레이션과 재정적자, 수급 불안 등으로 급등락을 반복

미국 장기금리와 달러지수

미국 주가변동성(VIX)과 신흥국 가산금리

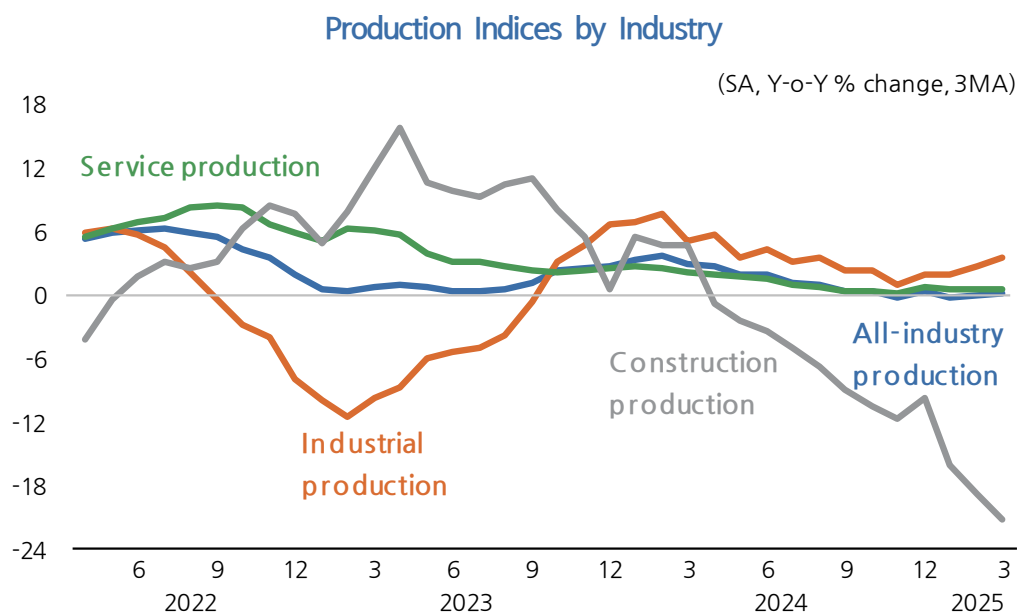

Summary and Assessment※

- The Korean economy is showing **signs of a slowdown**, as external conditions have sharply deteriorated.
 - A weakened construction sector is weighing on the recovery of domestic demand, while deteriorating trade conditions are slowing exports.
 - Manufacturing production remains on a favorable trajectory, led by semiconductors, accompanied by a significant increase in related investment.
 - However, the protracted downturn in construction is keeping overall production and domestic demand growth at low levels.
 - Average daily exports declined, led by exports to the U.S., amid worsening trade conditions stemming from recent U.S. tariff hikes.
 - The global economic slowdown, driven by worsening trade conditions, is expected to exert mounting downward pressure on economic activity, particularly in exports.
 - Global growth forecasts, especially for the U.S. and China, have been significantly downgraded, while elevated volatility in global financial markets is dampening economic sentiment both domestically and globally.

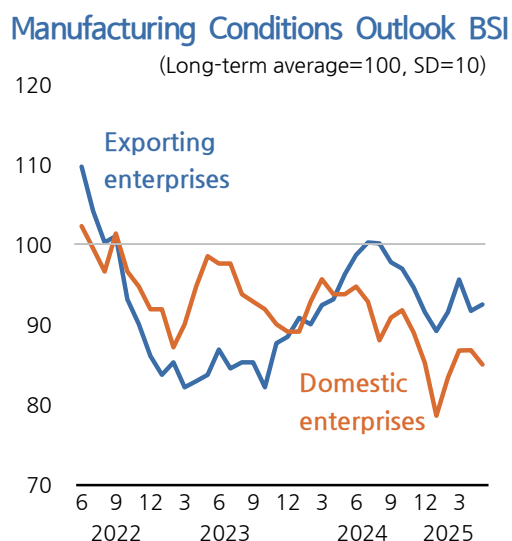

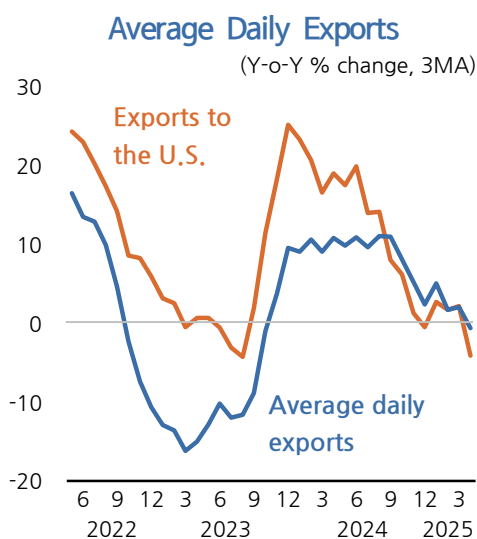

※ All growth figures are on a year-on-year basis unless otherwise noted. This document is an English translation of the original Korean version. In case of any ambiguities or discrepancies, the Korean version shall prevail.

■ Despite improvements in industrial production, **overall growth remains subdued**, mainly due to weakness in construction. As trade conditions deteriorate, **indicators suggesting an economic slowdown are gradually increasing**.

- All-industry production recorded low growth in March (1.2% → 1.3%), comparable to the previous month, as weakness in construction persisted.
 - Industrial production maintained a favorable growth trajectory (7.1% → 5.3%), driven by a sharp acceleration in semiconductors (12.3% → 26.8%) and electronic parts (0.3% → 8.5%).
 - However, all-industry production growth remained subdued as construction production (–20.2% → –14.7%) continued to contract, while growth in services production (1.2% → 0.7%) also moderated, reflecting slower gains in information and communications (1.7% → 0.2%) and financial and insurance services (3.2% → 1.0%).
- Amid the expansion in manufacturing production, the average capacity utilization rate rose (73.2% → 74.9%), and the inventory-to-shipment ratio declined (107.4% → 103.9%) at the same time.
 - On a seasonally adjusted month-on-month basis, domestic demand shipments decreased by 0.4%, while manufacturing shipments rose by 0.9% on the back of a 2.6% increase in export shipments.

- With the recovery in domestic demand delayed and export conditions deteriorating, concerns over an economic slowdown are intensifying.
 - While there are signs of partial easing in consumption weakness, the severe persistent contraction in construction investment continues to hinder the recovery of domestic demand.
 - Average daily exports are on a declining trend, particularly to the U.S., reflecting the gradual impact of recent U.S. tariff increases.
 - Amid downgraded global economic forecasts and elevated uncertainty surrounding trade policy, business sentiment remains weak.

■ The weakness in goods consumption has shown partial signs of easing; however, consumer sentiment remains subdued, indicating a **delayed recovery in consumption**.

● Retail sales increased, driven by sustained high growth in passenger cars supported by excise tax reductions, suggesting a partial alleviation in the sluggishness in goods consumption.

– Retail sales rose by 1.5%, largely due to passenger cars, which recorded robust growth of 10.0% in March following 10.1% in January-February, after a 7.3% contraction in the previous year.

– In contrast, retail sales, excluding passenger cars, grew by only 0.5%, and declined by 1.0% in the first quarter.

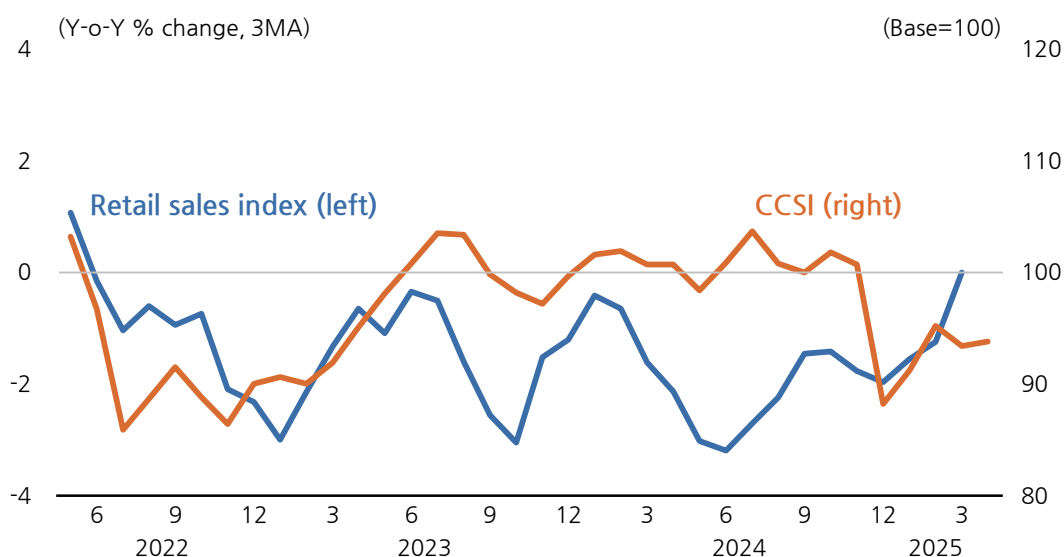

– Given that retail sales fell by 3.3% in March of last year, base effects also appear to have contributed in part to the increase.

● Service consumption, however, remains weak across major sectors including accommodation and food services.

– Production in key service industries closely tied to consumption continued to decline, including accommodation and food services (–3.7%), educational services (–1.3%), and arts, sports, and recreation-related services (–0.7%).

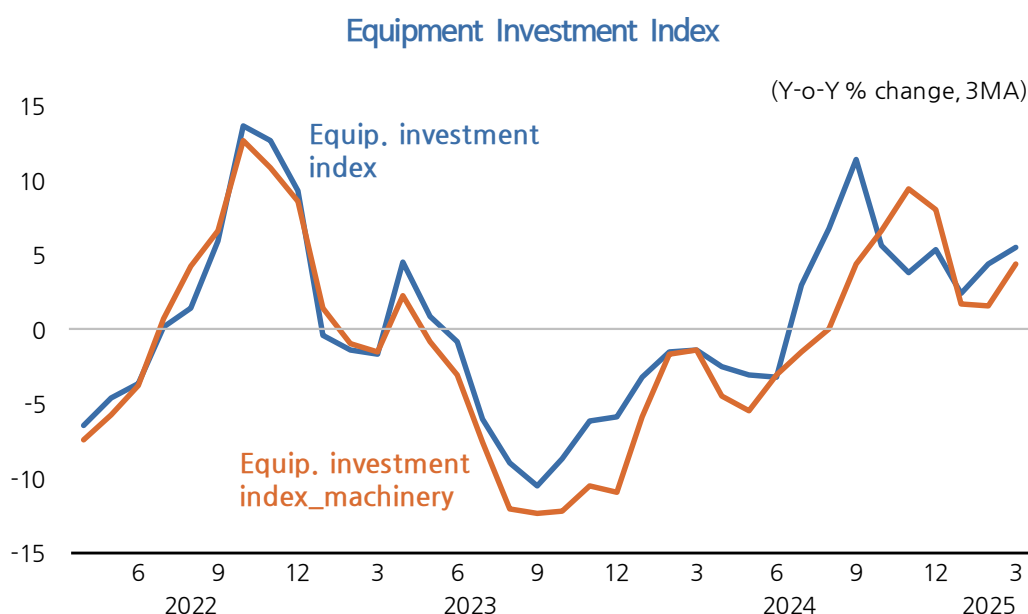

● Meanwhile, the Composite Consumer Sentiment Index (CCSI) rose slightly to 93.8 in April from 93.4 in the previous month, yet remained below the baseline (100).

Retail Sales Index and Composite Consumer Sentiment Index (CCSI)

■ **Semiconductor-related investment remains on a favorable trajectory, but downside risks to equipment investment persist** amid heightened external uncertainty.

- Equipment investment recorded strong growth in March (8.0% → 14.1%), supported by sustained semiconductor-related investment and base effects from a decline in the same month last year (-4.9%).
 - Machinery rose markedly (8.3% → 16.0%), primarily driven by semiconductor-related categories, including semiconductor manufacturing equipment (11.7% → 68.2%) and precision instruments (21.2% → 17.7%).
 - Imports of semiconductor manufacturing equipment, a leading indicator, continued to post strong growth in April (85.1% → 26.8%).
 - Transport equipment increased as well (6.9% → 9.2%), mainly in motor vehicles (14.1% → 11.8%), supported by excise tax reductions.
- However, with uncertainty surrounding global trade remaining elevated, it could potentially limit further improvement in equipment investment.
 - The Bank of Korea's Business Survey Index (BSI) outlook for equipment investment in the manufacturing sector remains below its long-term average (95), standing at 90, indicating continued subdued corporate investment sentiment.

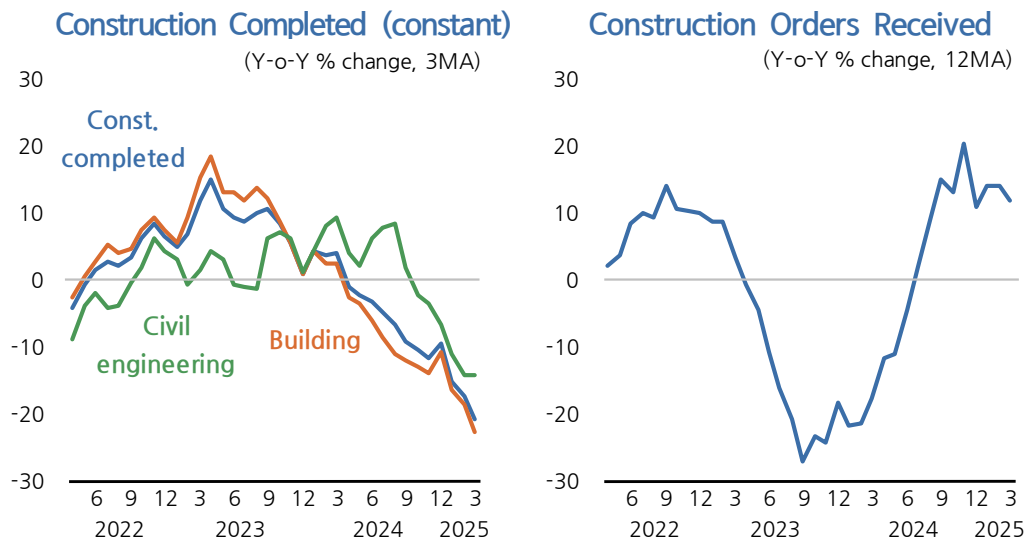

■ **Construction investment remains sluggish**, with the value of construction completed posting a sharp decline.

- The value of construction completed continued to decline sharply in March (-20.2% → -14.7%), remaining weak with a seasonally adjusted month-on-month decrease of 2.7%.

- The building construction sector (-23.2% → -16.1%) recorded substantial decreases in both residential and non-residential categories, while civil engineering (-9.8% → -11.0%) experienced a further widening of its decline.
- The weakness in construction investment in March was partially attributable to temporary factors, such as work stoppages at certain construction sites.
- In parallel, construction investment in the national accounts also recorded a deeper contraction in the first quarter, pointing to intensifying weakness.

* Construction investment (%): (Q3 '24) -5.7 → (Q4) -6.6 → (Q1 '25) -12.2

- However, positive signals for future construction investment are also being observed, as construction orders received, which serve as a leading indicator, have shown improvement since late 2023.

■ **Exports are decelerating** as non-ICT items continue to underperform and the effects of U.S. tariff hikes become increasingly evident.

- Exports rose slightly in April (3.7%); however, on an average daily basis—adjusted for the number of working days—they declined by 0.6%, falling below the previous month’s growth of 5.3%.

- ICT items (15.0% → 8.7%) showed moderated growth on an average daily basis, while non-ICT items remained sluggish amid sustained weakness in global demand.

* Average daily exports, excl. ICT items (3-month moving average, %): (Feb.) -2.5 → (Mar.) -0.7 → (Apr.) -2.7

- Real goods exports in the national accounts also declined by 0.8% in the first quarter, indicating a gradual loss of momentum.

- Meanwhile, the impact of the U.S. tariff hike is gradually becoming apparent.

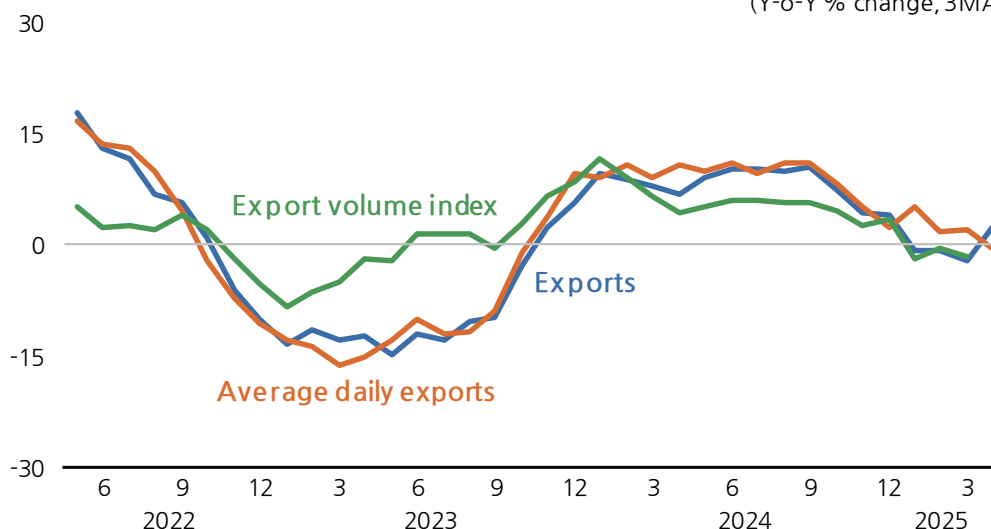

- By destination, on an average daily basis, exports to countries other than the U.S. rose by 1.9%, while exports to the U.S. declined sharply by 10.6%.

- In particular, U.S.-bound exports of motor vehicles (-20.7%) and steel (-11.6%), both subject to steep tariff hikes, declined significantly, in contrast to exports of the same items to other countries (motor vehicles: 15.0%, steel: -0.1%).

- Imports declined by 2.7%, primarily due to a sharp contraction in major energy resources (-17.4%), while the trade balance posted a surplus of \$4.88 billion.

Exports, Average Daily Exports and Export Volume Index

(Y-o-Y % change, 3MA)

■ Despite employment gains in the service industry, **overall labor market conditions remain subdued**, particularly in the construction and manufacturing sectors.

● The number of employed persons increased by 193,000 in March, accelerating from 136,000 in the previous month, supported by base effects and employment growth in the service industry.

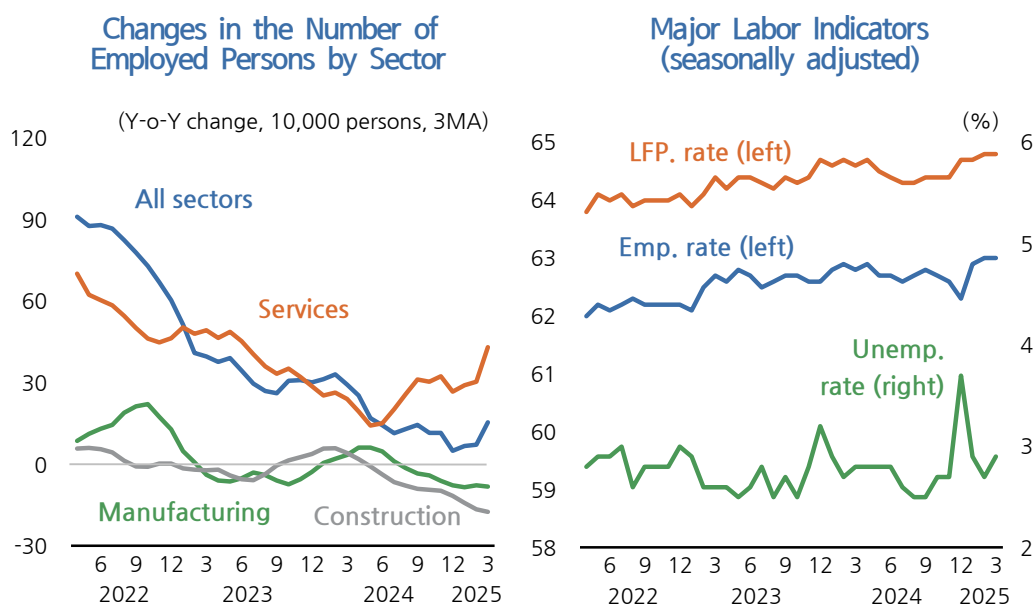

- On a seasonally adjusted month-on-month basis, the number of employed persons declined by 2,000, remaining broadly unchanged from the previous month.
- Employment in sectors closely tied to government-supported programs* sustained strong gains (155,000), while other sectors posted modest increases (38,000), led by construction (-185,000) and manufacturing (-112,000), where the business outlook remains weak.

* Temporary workers aged 65 and over in public administration and human health and social work activities.

- Major service sectors, including information and communications (65,000 → 61,000) and financial and insurance services (29,000 → 65,000), continued to post favorable growth. Sectors closely linked to domestic demand, such as wholesale and retail trade and accommodation and food services (-9,000 → 30,000), showed signs of improvement.

● The employment rate has stagnated, while the unemployment rate has risen, largely among young people.

- The seasonally adjusted employment rate and labor force participation rate remained at 63.0% and 64.8%, respectively, unchanged from the previous month. Meanwhile, the unemployment rate rose by 0.2%p to 2.9%, primarily driven by an increase in the 15-29 age group (6.3% → 6.6%).

■ Despite subdued demand-side pressures, **the inflation rate continues to fluctuate around 2%**, primarily reflecting factors such as a rising exchange rate.

● Consumer prices rose by 2.1% in April, unchanged from the previous month.

- Amid falling global oil prices, petroleum product prices (2.8% → -1.7%) declined, exerting downward pressure on overall inflation.

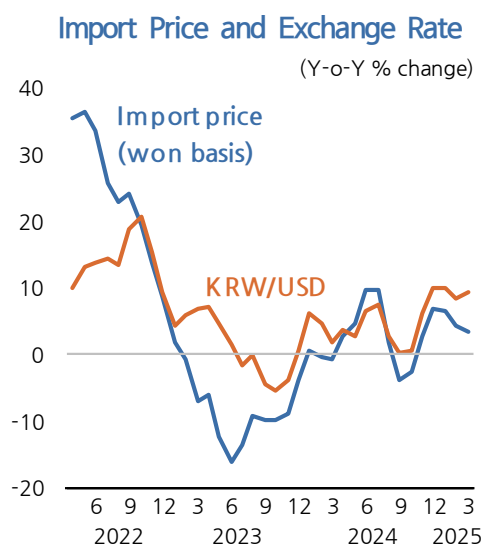

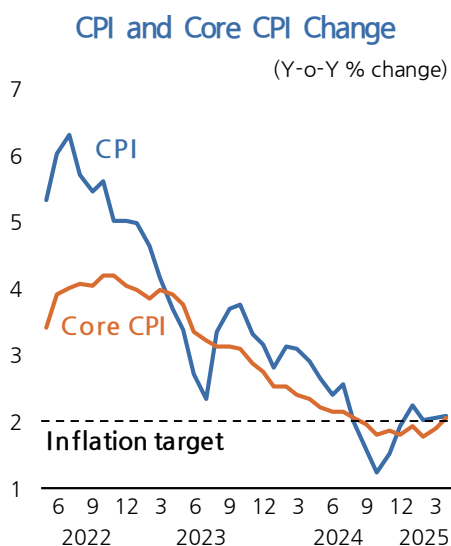

* Dubai crude oil (\$/barrel): (Feb.) 77.9 → (Mar.) 72.5 → (Apr.) 67.7

- However, processed food prices accelerated (3.6% → 4.1%), driven by higher import prices stemming from the exchange rate increase. Personal services prices increased at a faster pace (3.1% → 3.3%), mainly attributable to policy-driven* increases in insurance service fees.

* The acceleration in insurance service fees (15.1% → 16.3%) was primarily attributable to premium increases following new guidelines issued by financial authorities.

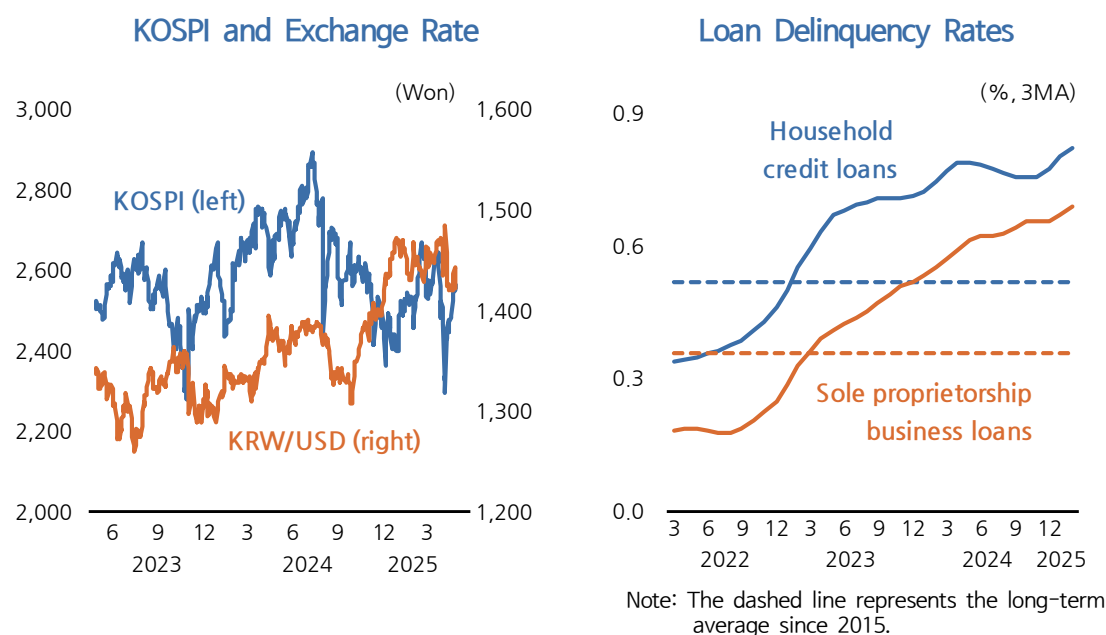

● As a result, core inflation rose slightly to 2.1%, from 1.9% in the previous month.

- While core inflation edged higher due to exchange rate and policy effects, demand-side price pressures remain muted amid weak domestic demand.

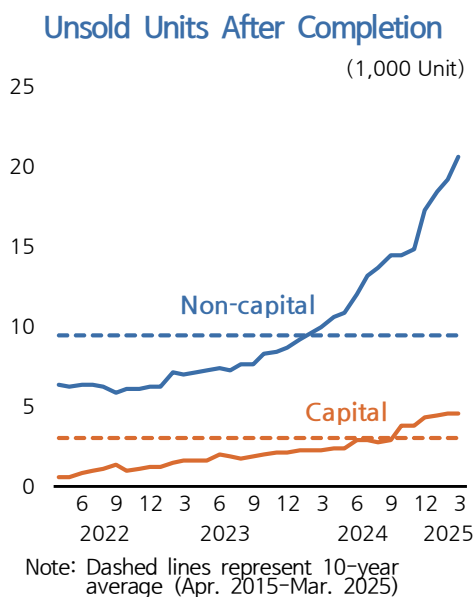

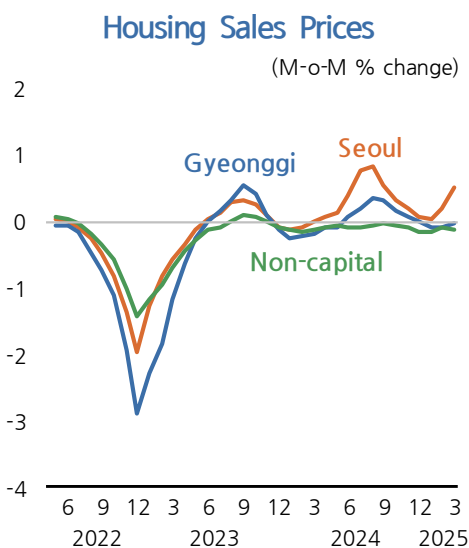

■ **Financial markets are showing heightened volatility**, reflecting domestic political developments and shifts in U.S. tariff policy.

- Daily fluctuations in the dollar-won exchange rate (0.3% → 0.7%) and the KOSPI (0.9% → 1.2%) widened, while the VKOSPI (25.4 → 20.7) remained elevated.
- The government bond yield (3-year) declined to 2.27% at end-April from end-March (2.57%), reflecting concerns over a potential economic slowdown.
- Credit markets remained stable, with the CP spread (44bp) holding near its long-term average (43bp), and the CDS premium declining (38.7 → 32.3).
- Meanwhile, the delinquency rate among domestic banks continued to rise in February across both business and household loans.
 - On a three-month moving average basis, the delinquency rate for sole proprietorship business loans (0.67% → 0.69%) and household credit loans (0.80% → 0.82%) remained on an upward trajectory, both significantly above their respective long-term averages (0.36% and 0.52%).

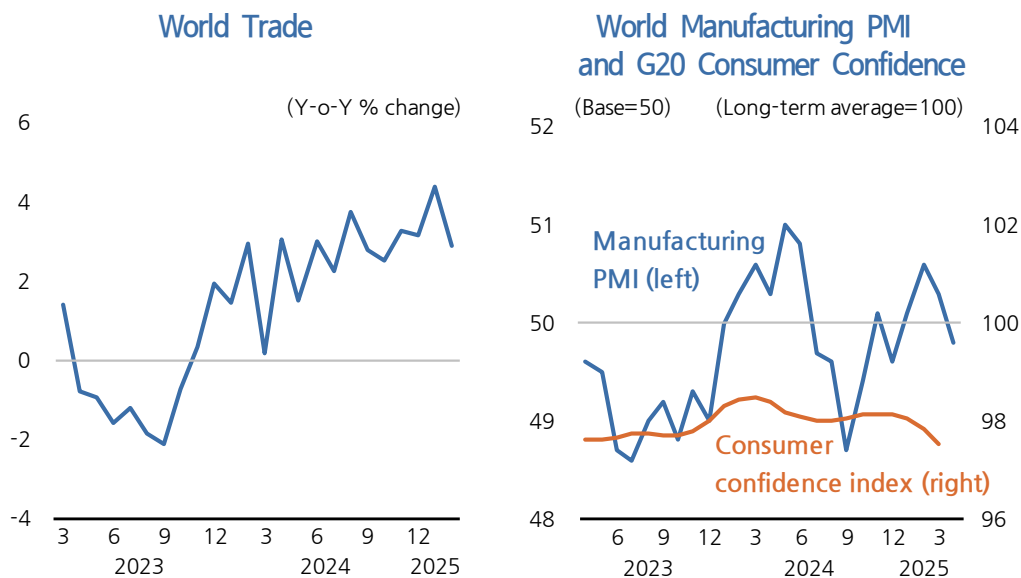

■ **The capital area saw rising housing sales prices**, led by Seoul's Gangnam area, whereas **the housing market in non-capital areas weakened**, as evidenced by an increase in unsold units after completion.

- Housing sales prices remained broadly stable in March (month-on-month, $-0.06\% \rightarrow 0.01\%$).
 - Jeonse prices ($-0.01\% \rightarrow 0.03\%$) showed little movement, while monthly rent prices ($0.08\% \rightarrow 0.09\%$) continued their modest upward trend.
- In Seoul, housing sales prices and transaction volumes rose markedly, particularly in the Gangnam area, following the removal of land transaction permission zone designations.
 - Sales prices in Seoul ($0.18\% \rightarrow 0.52\%$) recorded a significantly accelerated increase, while transaction volume (12,900 units) also rose sharply, far exceeding the March average (5,700 units) over the past three years.
 - As a result, sales prices in the capital area ($-0.01\% \rightarrow 0.15\%$) turned upward, and transaction volume (36,000 units) increased significantly, surpassing the three-year March average (22,000 units).
- By contrast, the housing market in non-capital areas continued to weaken, with sales prices declining and unsold units after completion increasing.
 - Sales prices in non-capital areas ($-0.10\% \rightarrow -0.12\%$) extended their long-term downward trend, while the number of unsold units after completion (23,700 $\rightarrow$ 25,100 units) rose sharply, concentrated in non-capital areas.

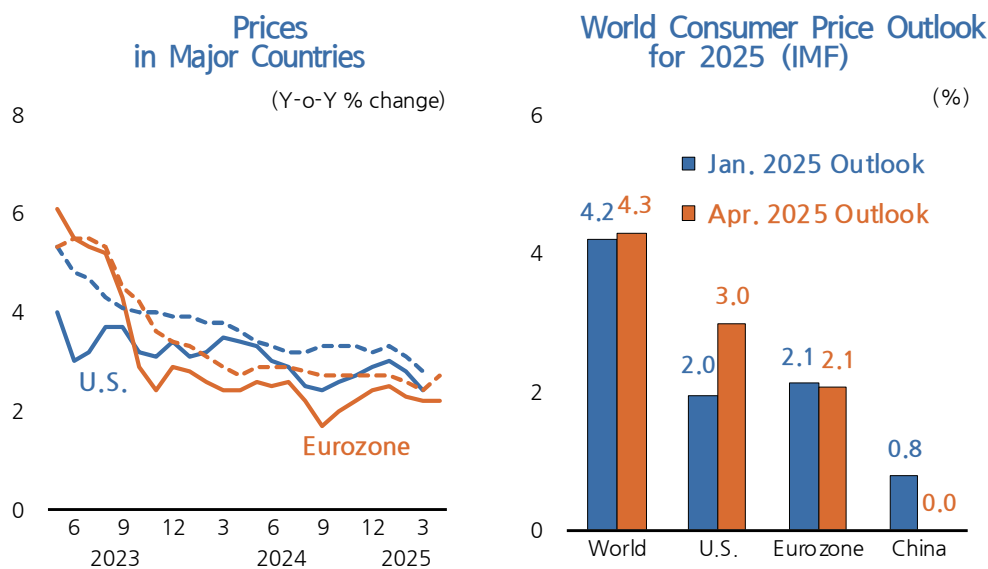

■ Global trade conditions have worsened, exerting substantial downward pressure on the world economy.

- The likelihood of a global economic slowdown is increasing, as demonstrated by decelerating growth in goods trade and persistent weakness in both manufacturing business outlook and consumption-related sentiment indicators.

- While inflation in major economies is gradually moderating, inflation forecasts for the U.S. have been revised upward, reflecting the impact of tariff increases.

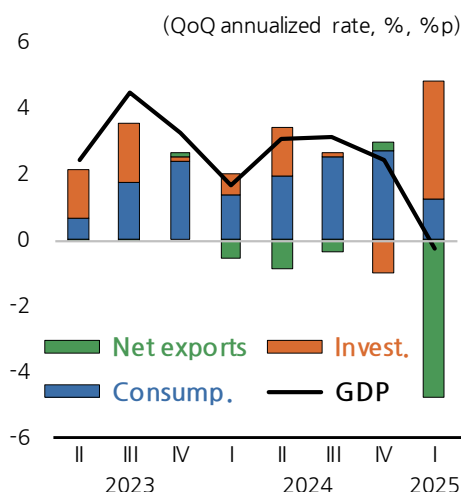

Note: Solid and dashed lines represent headline and core CPI, respectively.

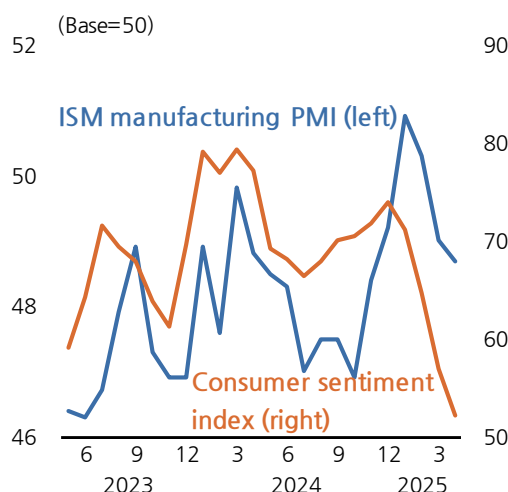

- The U.S. posted negative growth, affected by weak private consumption and a sharp increase in imports, while major sentiment indicators fell significantly, pointing to a deteriorating outlook.

– Growth is projected to remain subdued within the high 1% range in 2025 amid continued policy uncertainty, including trade disputes, and further weakening of private consumption.

U.S. GDP Growth Rate

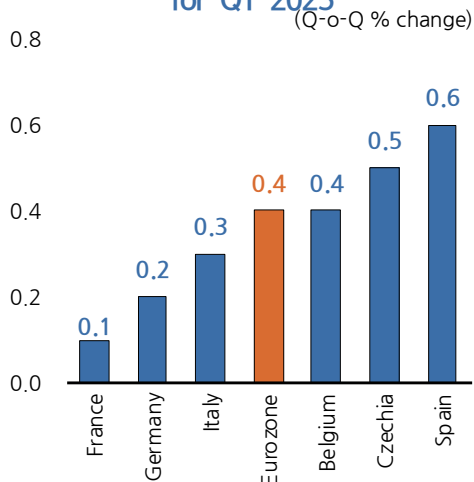

U.S. ISM Manufacturing PMI and Consumer Sentiment Index

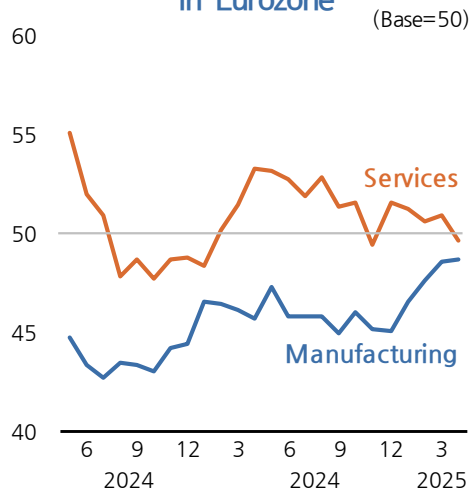

- The Eurozone sustained modest improvement in goods consumption, easing concerns over a potential recession. However, recovery is expected to remain weak as leading indicators continue to falter amid worsening trade conditions.

– As inflation continues to slow and downward pressure on the economy intensifies due to worsening external conditions, the policy stance of rate cuts remains in place.

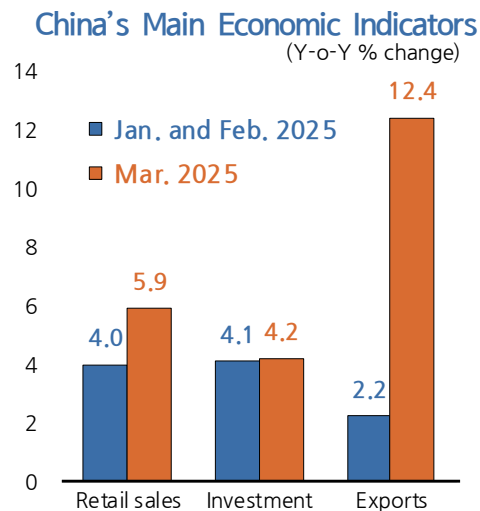

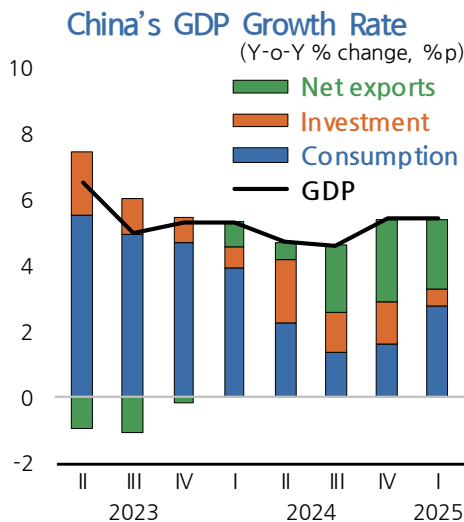

Eurozone GDP Growth Rate for Q1 2025

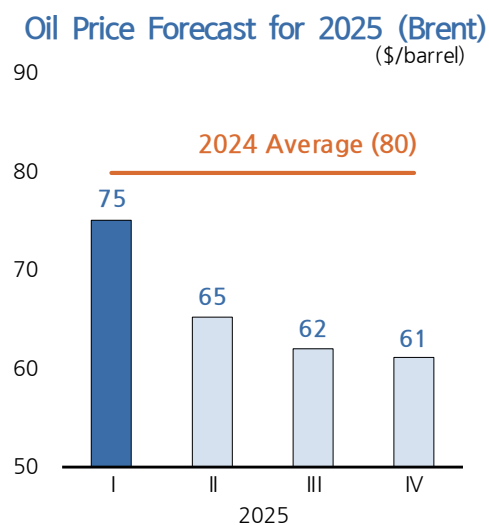

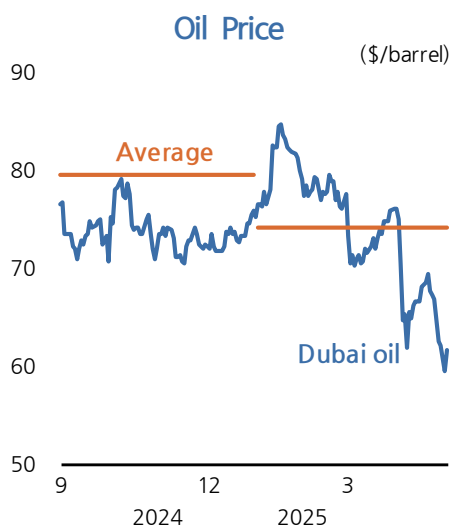

Manufacturing and Services PMI in Eurozone

- The Chinese economy recorded solid growth, supported by a recovery in domestic demand and an increase in exports. However, downward pressure has been mounting amid intensifying external uncertainty.
 - Growth in the first quarter was strong at 5.4%, with retail sales accelerating in March and exports rebounding. Nonetheless, growth forecasts have been revised downward amid escalating trade tensions with the U.S.

- International oil prices fell sharply in April, driven by expectations of a global economic slowdown and expanded output from OPEC+. Prices also exhibited volatility, shaped by U.S. trade policy and sanctions on Iran.
 - Major institutions project a notable decline in oil prices in 2025, citing expanded downward pressure stemming from weakening demand caused by trade disputes.

Note: Figures from Q2 2025 onward are EIA projections.

- The global economy is projected to slow markedly, amid worsening trade conditions and deteriorating economic sentiment.
 - The IMF has recently slashed growth projections for major economies, including the U.S. and China, forecasting global economic growth to decline to the high-2% range in 2025.

Source: IMF, *World Economic Outlook*, April 2025.

- Major financial market indicators remain highly volatile, as heightened uncertainty surrounding U.S. trade policy raises concerns over a potential global economic slowdown.
 - In particular, growing pessimism over the U.S. economic outlook has led to a sharp depreciation of the dollar, while interest rates exhibited pronounced fluctuations, reflecting concerns over inflation, fiscal deficits, and supply-demand imbalances.
